Expert assessments no. G 85/2, no. G 182/2 and no. G 183/2

Regarding a temporary extension of validity due to the current review of harmonized standard EN 81-3:2000+A1:2008+AC:2009 (D)

Dear Mr. Oelsmeier,

We are responding to your email enquiry from 05/04/2016 regarding the temporary extension of the validity of the following expert assessments:

| Certificate number | Date of issue | Type |
|--------------------|---------------|---------|
| G 85/2 | 13.12.2010 | TV 3074 |
| G 182/2 | 14.12.2010 | TV90 |
| G 183/2 | 15.12.2010 | TV90a |

We have no objections against a temporary extension to the validity of the assessments listed above.

It is required, however, that the assessments listed above are re-issued upon publication of the new EN 81-3:2000+A1:2008+AC:2009 (D) standard at the latest.

All conditions and information provided in the assessments listed above remain valid and must be observed until the review is completed.

Please do not hesitate to contact us if you have any further questions.

Kind regards,

Department for
Lifts and safety components
Peter Retzbach
