

Better Care, Better Life

JINHUA JINGDI MEDICAL SUPPLIES CO., LTD.

Professional manufacturer for medical and healthcare disposables

JINGDI MEDICAL

Better Care, Better Life

JINHUA JINGDI MEDICAL SUPPLIES CO., LTD.

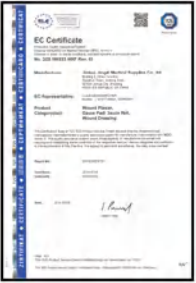

Profile

Jingdi is a manufacturer. Starting from 2004, we are dedicated to produce quality medical and homecare disposables under ISO 13485 and GMP system. Jingdi is certified/registered with CE and FDA.

Major products include Wound Plaster, Medical Tape, Sterile Wound Dressing, Alcohol Pad, First Aid Kit, Cooling Gel Patch, Kinesiology Tape, Hydrocolloid Dressing as well as Medical and Protective Masks. Adhesive bandages, tapes and sterile wound dressings are well-known legacy items favorited both domestically and internationally.

Our success is largely rooted in strong customer loyalty, competitiveness and strict quality consistency contributed by our staff of sufficient knowledge, integrity, diligence and frugality. Contact us today, you are warmly welcome to visit our workshops, laboratories and Research & Development center.

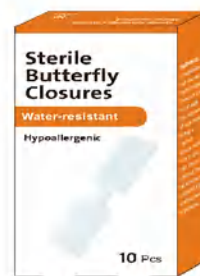

Stay with Jingdi, let's make better life with better care together.

Better Care, Better Life

For protection and absorption

Non-adherent Dressing Pad

Ideal for covering & protecting wound

Non-adherent dressing pad has an absorbent layer to help the wound keeping clean and dry, the ventilated outer film allows fluid to pass into the absorbent center while providing a non-stick contact layer against the wound. Can cut to any sizes.

- Non-adherent**
Ventilated film allows the wound to breathe and provides an ouchless removal
- Cushions & pretexts**
Soft and flexible material covers wound and minimizes disruption
- Absorbent**
Cotton/polyester core pulls excess fluid away from the wound

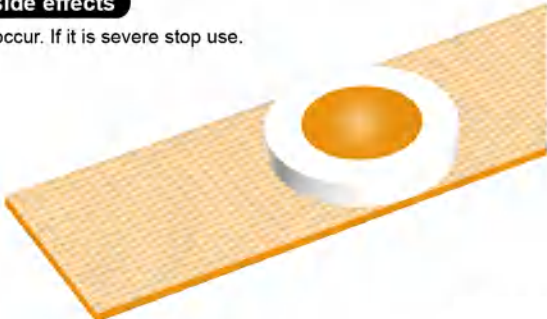

Corn Plaster

Gentle and natural corn removal
Moisturises and softens skin providing pain relief

- Active ingredients**
Salicylic acid, polyvinyl alkyl, ether adhesive, titanium dioxide, liquid paraffin, antioxidant, red iron oxide and black iron oxide.
- Possible side effects**
Irritation may occur. If it is severe stop use.

- Instructions for use:**
- 1.Ensure the skin is clean and dry.
 - 2.Place firmly the medicated round part over the center of corn, adhesive next to skin.
 - 3.Repeat treatment daily until corn can be removed.
 - 4.Do not use for more than two weeks, unless your doctor tells you to.

Better Care, Better Life

I.V. and Catheter Fixation Dressing

It can be used to protect I.V. catheter sites and wounds, to secure devices to the skin and to maintain a moist environment for wound healing.

- Provides a waterproof, sterile barrier to external contaminants including liquids, bacteria and viruses.
- The dressing provides continuous visibility to the I.V. insertion site.
- Adhesive is friendly on skin.
- Dressing flexes with skin for greater patient comfort.
- High breathable, the skin can breath freely.

COHESIVE BANDAGE

Description:

Hand-tear non-woven cohesive bandage

Length and width can be made as per request

One color printing on fabric can be customized according to customer's idea

Print your logo on the fabric to present your company to all users impressively

Benefits:

Print lovely pattern on the bandage to relax users

Quality cohesive bandage performance

Also for Pet Hospital/clinic

Application:

Securing pads and dressings, protective bandage

Pressure bandage to promote circulation and healing

Sprains and strains

partial immobilization

Post-operatively leg wrap

Caution: This product contains natural latex which may cause allergic reactions

POST-COLLECTION DRESSINGS

Round Adhesive Band-aid Packed With Dispenser Box

Application: Recommended for hemostasis and protection of the epidermis of wounds and punctures with needles. Indicated for medical or home use.

Composition: Made of polystyrene, absorbent pad, glassine paper and AC glue.

Non-sterile.

Size: Ø 25 mm

Storage: Store in a cool, dry and low light place.

Disposal: Dispose of the product in an appropriate location for potentially contaminated materials.

Skin disinfection

Instructions for use:

1. Check the integrity of the packaging and shelf life.
2. Remove the adhesive and place the absorbent region is in contact with the wound or puncture.

Precautions:

1. Do not touch the absorbent region of the dressing.
2. Clean and disinfect the wound before using the dressing.
3. Do not reuse the product.
4. Use on minors must be accompanied by the supervision of an adult.
5. Do not use if it is out of expiry date.
6. If the dressing is wet, perform replacement with another dressing.
7. To maintain hygiene, change the dressing if it's necessary.

Better Care, Better Life

Wound Skin Closure Strips

For closing small wound.

Used in hospitals to help improving cosmetic results.

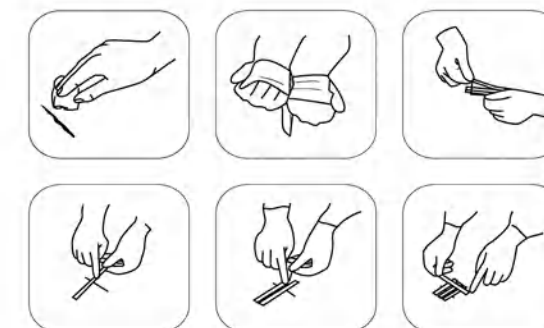

Application:

The wound skin closure strips can inhibit the tension on both side of skin, It can control the expansion of the wound in time when use in the early stage of wound healing.

Instruction for use:

1. Clean the wound with saline water and dry the wound area.
2. Stick the wound skin closure to the wound vertically from the middle of the wound.
3. Apply the wound skin closure from two ends of the wound to the middle part to avoid wound opening.
4. Stick to the rest parts of wound.
5. The medical band aid can be left in place for several days.

Wound Skin Closure (Elastic Bandage)

First aid dressing for closing small wounds

Application:

It's used for skin surface suture and pull, wound tension, effectively reducing the lateral tension on both sides of the wound, preventing scar widening at the suture and reducing the probability of scar formation.

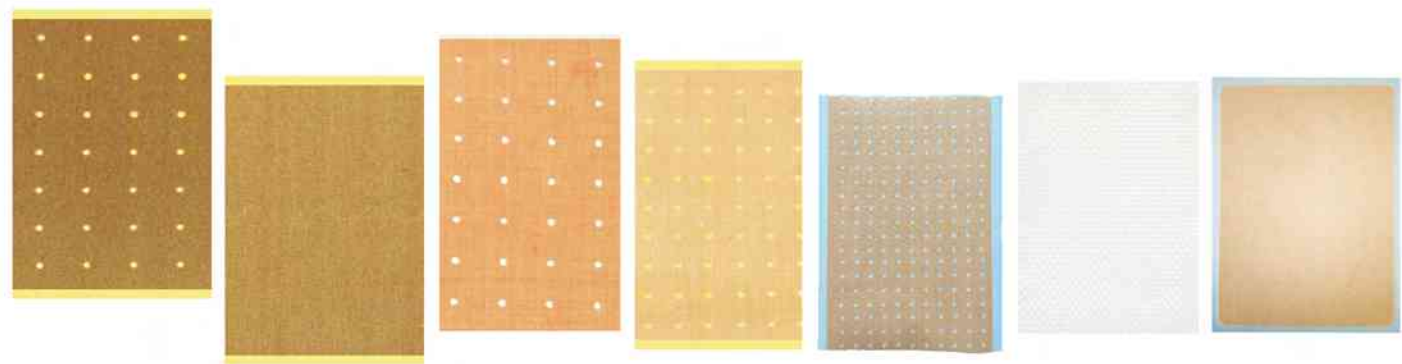

Instruction for use:

1. Clean the wound and surroundings.
2. Take out the dressing and position it over the central of the wound.
3. Press down the edges of dressing firmly and remove the release paper.
4. Pull the dressing from two ends and disinfect the wound after it is closed.
5. Secure the edges of dressing with adhesive tape if long time stay on the skin.
6. Use an extra sterile dressing to cover if the wound is large.

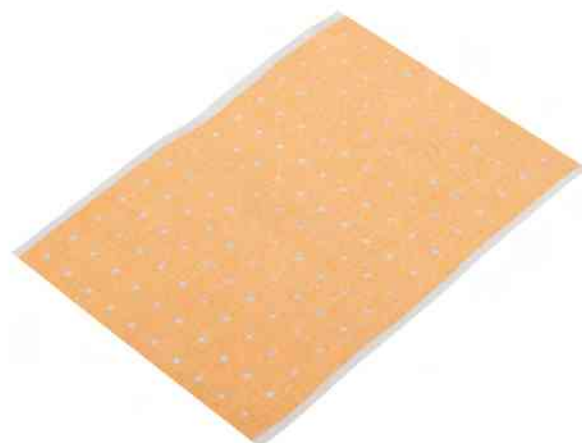

Better Care, Better Life

HYDROCOLLOID DRESSING

Application

- Low or moderate exuded.
- Crura venous ulcer.
- I-II degree.
- Small superficial burn wound.
- Post operation.
- Donated skin area.
- Superficial wound and beauty operation wound.
- Period of granulation and epithelialisation of chronic wound.

Characteristics

- Good absorbency for exudation from the wound.
- Keep the wound moist and accelerate the wound healing; reduce the pain and avoid the secondary damage to the wound.
- Waterproof, permeable and prevent the wound from bacteria outside.
- Excellent alesticity and self-adhesive, easy for application.
- Change the dressing when it turns white.
- Easy for peeling off and it will not stick to the wound and keep patients comfortable.

Better Care, Better Life

Silicone Dressing

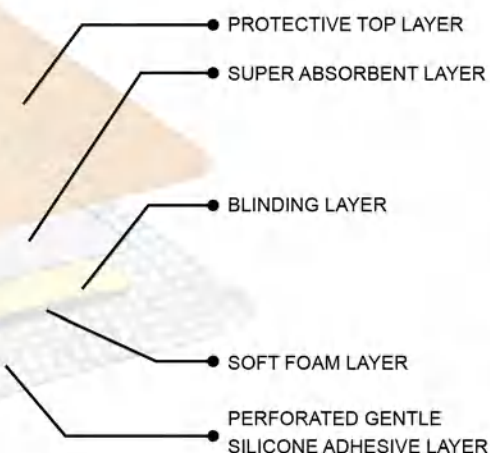

Silicone dressing consists of a gentle silicone wound contact layer, a super absorbent pad layer, and a vapor permeable and waterproof film, is an ideal dressing for advanced wound exudate management. The multi-layers construction facilitates dynamic fluid management to provide optimal moist wound environment, which promotes wound healing, minimizes trauma and reduces pain during dressing changes.

Benefits

- Conformable dressing - provide super gentle silicone contact layer for fragile skin.
- Minimize trauma and pain during dressing change.
- Easy to apply and remove - the dressing can be repositioned easily without losing its adherent properties.
- Shower proof dressing allowing patients to shower with the dressing in place.
- Customized shape design to adapt different requirements. Maintains its integrity during use

Application:

- Pressure ulcer • Leg ulcer • Non-infected diabetic foot ulcer
- Donor sites • Skin abrasions • Post-operative wound dressing
- Lacerations and abrasion

Foam Dressing

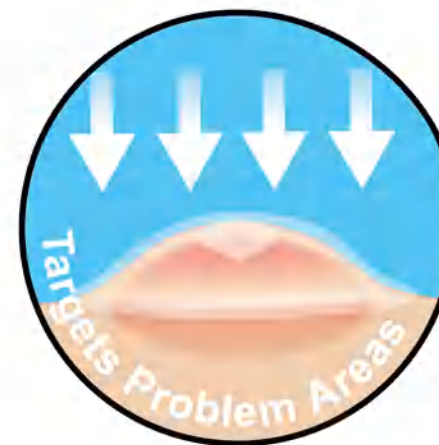

Foam dressing is a highly absorbent dressing made from hydrophilic polyurethane foam, ideally designed for heavily exuding wounds. The soft flexible foam absorbs large amount drainage, ensures patients comfort; the top backing film protect wounds against external bacterial.

Application:

- Foam dressing is indicated for the moderate to heavily exuding wounds
- Pressure ulcer
- Leg venous ulcer
- Diabetic foot ulcer
- First and second degree burns
- Skin grafts and donor site
- Post-operative and traumatic wounds

Better Care, Better Life

Hydrocolloid Acne Patch

Cover blemishes invisibly

Ultra-thin invisible
Suppress acne
Easy makeup
Waterproof

Instructions for use:

1. Cleanse the problem area and dry.
2. Remove desired size patch from film, apply over blemish. Try not to touch the adhesive side with your fingers.
3. Leave patch on for 6-8 hours for best results. Patch will turn to white.
4. Remove and discard used patch; replace with new patch, if needed.

Hydrocolloid Blister Plaster

Blisters are fluid filled lesions that develop in response to repeated friction on the skin. What blisters can do is to:

Prevent: protecting feet from rubbing.

Relieve: providing instant pain relief.

Protect: protecting the blister from further friction.

Fast healing: offer closed fast healing environment.

Cushions and protects

Instructions for use:

1. Clean and dry the skin.
2. Peel off the release paper.
3. Apply the plaster on the skin.
4. Press the edges of plaster firmly.

MACHINE

AUTOMATIC PACKAGE MACHINE FOR WOUND PLASTER

MAX.size of masterial roll: 380mm
MAX.width size of the material tape: 85mm
MAX.size of the plaster: 78mm
Plaster Orientation: NO
MAX.size of the wrapper paper: 95mm
Produce Speed: 0-720pcs/minute.
Wrapping Paper Orientation: NO
Machine Power: 3.5KW
Power Voltage: 380V
Machine size: 2800*750*1900mm
Machine Weight: 1500kgs

ADHESIVE COATING MACHINE

Stylle: THB-560/THB-1100
The width of the coated: 560mm/1100mm
Amount of glue: 20-200g
Coating speed: 0-60m
Unwinding diameter: 1000mm
Rolling diameter: 80mm
The feeding device: 3"air expansion core
Correction device: gold medal optional
Installed power: 18KW/28KW
Electric source: 380V
The length of the whole machine: 4500mm-6800mm
The width of the whole machine: 1500mm/2000mm
The height of the whole machine: 1500mm-1900mm
Controlled temperature: 60°C-230°C
