

04/05/2020

Esteemed Customer,

we are proud to inform you that Fluid-o-Tech has obtained ISO 14001:2015 certification.

Respect for the environment and sustainable development have always been an integral part of Fluid-o-Tech's DNA, and adherence to this environmental standard allows us to be harmonized within a structured management system.

The path that led to ISO 14001 certification has also made it possible to:

- identify environmental risks and opportunities for improvement;
- ensure compliance with all regulatory requirements relevant to the environment;
- evaluate and minimize the environmental impact of our products in every phase of their life cycle, from cradle to grave;
- define targets of reduction of energy and raw material consumption
- improve our system of internal separate collection;
- reduce the amount of hazardous waste produced.

This certification gives us the opportunity to offer our customers a further guarantee of quality and correct environmental management of our processes.

The ISO 14001 certification is certainly a great achievement for us but, more importantly, a landmark in our journey towards excellence.
