

Peavey Photo Rulers

Ideal for use in photographs featuring bite marks, injuries, toolmarks, or any other small evidence. Our L-Scale features a 90-degree scale printed on ridged, vinyl plastic and allows you to measure in millimeters. Our T-Scale runs perfectly perpendicular to the ground and features a hanging hole for use on vertical surfaces. Measures in both inches and millimeters.

Item #	Description
09952	L-Scale (1)
95067	T-Scale (2)

Forensic Star™

An innovation that offers a technically feasible method to evaluate and photograph the spatial relationship between forensic measurement scales and evidence. Place two L-scales (#09952) in the grooves of the Forensic Star at 90° angles to each other. Locate in close proximity of the evidence. The free standing design provides for a clearer field of photography and also allows for evaluation of depth by developing a reproducible "Z" axis. Each "star" is intended to be retained with the evidence to avoid cross contamination. Comes 10 to a package. L-Scale rulers not included.

Item #	Description	Quantity
95197	Forensic Star	10 pk.

Reversible Scale

Designed for tire track and footwear impressions. Printed black on white on one side and white on black on the other. Glare-free finish ideal for a variety of lighting conditions and measures in both inches and millimeters.

Item #	Description	Size
02126	Reversible Scale	300 x 150mm

Folding Scale

Three 12 inch rulers in one! This versatile ruler can extend as long as 36 inches or as short as 12 inches to accommodate the size of evidence to be photographed.

Item #	Description
05225	Folding Scale - Inches
