BOWA MEDICAL bipolar forceps for electrosurgical coagulation during surgical interventions

Standard bipolar forceps are suitable for electrosurgical coagulation during surgical interventions. They have the European flat plug connection for all conventional electrosurgical devices.

Reusable instruments are cost effective

Reusable instruments protect your budget. The bipolar forceps are autoclavable and can be reprocessed up to 75 times.

Application areas for bipolar coagulation

The BOWA MEDICAL bipolar forceps can be used in:

- general surgery
- paediatric surgery
- orthopaedic and trauma surgery
- plastic and cosmetic surgery
- thoracic surgery
- visceral surgery
- gynaecology
- ENT
- dermatology
- oral and maxillofacial surgery
- urology
