KaWe FLAPLIGHT F.O. Macintosh blade

REF 03.42053.621

REF 03.42053.631

REF 03.42053.641

Add to inquiry list

Macintosh blades with replaceable fibre optics

- The movable blade tip facilitates lifting of the epiglottis and enables a good visibility of the intubation process even in the case of difficult anatomic conditions. An improved visibility and a lower lever action reduce the risk of injury of the larynx and of the teeth. The fibre optic illumination cannot be replaced by the customers themselves. The blades must therefore be sent to KaWe.
- can be bent up to 60°
- mat stainless steel – prevents back reflection
- replaceable light guide
- easy to clean
- environmentally friendly and cost-effective
- fibre optic illumination Ø 4 mm, 5500 single fibres minimum
- can be treated in autoclave at up to 134°C – approx. 2000 times
- in accordance with DIN ISO 7376

Laryngoskope Laryngoscopes

Das große KaWe Qualitätsversprechen

Ob im OP oder bei einem Notfall-Einsatz, immer ist es ein Wettlauf gegen die Zeit. Deshalb muss jeder Handgriff sitzen, jeder muss wissen, was er zu tun hat. Und: Anästhesist und Notarzt brauchen Instrumente, auf die sie sich verlassen können. Instrumente, die für solche Einsätze gemacht sind. Laryngoskope von KaWe sind dafür die idealen Partner: modernste Technologie, höchster Qualitätsstandard – ob im LED-, Fiberoptik-, Konventionell- oder Einmal-Bereich – KaWe bietet weltweit mit das größte Laryngoskop-Sortiment!

Abgerundet wird das Programm durch unsere Ladestation KaWe MedCharge 4000 – international einsetzbar – für 2,5 V oder 3,5 V-Griffe. Neben unserem hohen Qualitäts-Niveau steht ein gutes Preis-/Leistungs-Verhältnis, verbunden mit Zuverlässigkeit und einem Optimum an Sicherheit!

The great KaWe quality guarantee

Whether during an operation or in an emergency, there is a race against time. In times like these, everything must run smoothly and everyone must know what needs to be done. Above all, anaesthesiologists and doctors need instruments that they can rely on – instruments that are made for critical times like these. KaWe laryngoscopes offer the ideal solution: the most modern technology, the highest-quality standard – be they LED, fibre optic, conventional or single-use models – KaWe offers one of the largest laryngoscope product lines worldwide!

Our new KaWe Med-Charge 4000 charging station – internationally usable – for 2.5 V or 3.5 V handles rounds out our product line. In addition to our high level of quality, we also offer an excellent cost/effectiveness ratio combined with reliability and optimum safety.

F.O. Griffe | F.O. handles

DETAILANSICHT | DETAILED VIEW

Im Mund- und Rachenraum herrschen extrem schlechte Lichtverhältnisse. Um diesem Umstand Rechnung zu tragen, hat KaWe durch weiterentwickelte Lichttechnik (LED – bis 70 % mehr Licht) und neueste F.O. Glasfaserbündel eine höhere Sicherheit für eine leichte Intubation geschaffen. Das leistungsstarke LED Licht (2,5 V oder 3,5 V) sitzt bei allen KaWe Fiber Optik-Laryngoskopen im Griff. Die bewährte Xenon-Beleuchtung ist nach wie vor erhältlich. Übrigens: Sie können die Xenon-Beleuchtung durch einfachen LED Lampenwechsel im Griff (ohne weitere Komponenten), updaten. Ein umfangreiches Sortiment an F.O.-Spateln (Macintosh, Miller, Foregger, KaWe FLAPLIGHT, TEPRO, KaWe MEGALIGHT, Economy, Polio) ermöglicht die Anpassung selbst an schwierige anatomische Verhältnisse. Die Macintosh-Spatel sind sowohl mit integrierter als auch mit auswechselbarer Fiber Optik erhältlich. Besonderen Wert legen unsere Techniker auf eine leichte Handhabung und garantieren ein schnelles Wechseln der Spatel. Alle Spateltypen sind aus Edelstahl, selbstverständlich kompatibel zu DIN ISO 7376 und die Mehrweg-Spatel im Autoklaven bei 134°C sterilisierbar.

In the mouth and throat, the lighting conditions are very poor. In order to accommodate for these conditions, KaWe has created a safe and easy intubation method using advanced light technology (LED – with up to 70 % more light) and the latest F.O. light guides. All KaWe fibre optic laryngoscopes have a powerful LED light (2.5 V or 3.5 V) in their handles. The tried and tested xenon light is still available as well. You can, by the way, update the xenon lamp in your handle simply by replacing it with an LED lamp (no other components are required). An extensive selection of F.O. blades from the fibre optic line (Macintosh, Miller, Foregger, KaWe FLAPLIGHT, TEPRO, KaWe MEGALIGHT, Economy, Polio) makes it possible to meet the needs of even very difficult anatomic conditions. Macintosh blades are available with integrated as well as with exchangeable fibre optics. Our technicians place a particular importance on easy handling and guarantee that the blades can be exchanged quickly. All blade types are made of stainless steel, are compliant with DIN ISO 7376 standards and the reusable blades can be sterilized in an autoclave at 134°C.

Ladebatterie oder Batteriebetrieb möglich

Ausnahme: LED 2,5 V

Rechargeable battery or battery operation possible

exception: LED 2.5 V

F.O. Xenon

BATTERIE-/LADEGRIFFE | BATTERY/CHARGING HANDLES

Merkmale der Fiber Optik-Fasern:

- hoher Transmissionsgrad über den gesamten sichtbaren Wellenlängenbereich
- numerische Apertur 0,64
- hervorragende Abstrahlcharakteristik
- mehr als 4000 Sterilisations-Zyklen im Autoklaven bei 134°C
- min. 3500 / 5500 / 8000 Einzelfasern je Spateltyp sorgt für optimalen Lichtaustritt

Merkmale der Xenonlampe:

- Xenonlampe mit über 20 Stunden Lebensdauer
- Lampenschutzhülle aus Metall sorgt für längere Lebensdauer der Xenonlampe

Features of the fibre optic bundles:

- high transmission factor within the entire visible wavelength range
- numerical aperture 0.64
- excellent radiation properties
- more than 4000 sterilization cycles in the autoclave at 134°C
- 3500 / 5500 / 8000 single fibres minimum per blade type ensure optimal light emission

Features of the xenon lamp:

- xenon lamp with a service life of more than 20 hours
- metal protective lamp cap ensures that the xenon lamp has a longer service life

72

Mit Xenon-Beleuchtung

- alle Griffe sind kompatibel nach DIN ISO 7376
- Lampenhülle aus Metall, Vorteil: schnellere Entnahme der Xenon-Lampe für Sterilisationsvorgang
- leichtes Eigengewicht, da keine Kapsel und keine Innenhülle
- alle KaWe F.O. Xenon-Griffe 2,5 V (klein + mittel) haben eine Doppelfunktion
 - mit Batterien = Batteriegriff
 - mit Ladebatterie = Ladegriff für Ladestation KaWe MedCharge 4000
- sehr lange Lebensdauer der Ladebatterien 2,5 V + 3,5 V (NiMH)
- umweltschonend
- alle KaWe F.O. Xenon-Griffe 3,5 V (klein + mittel) können nur mit Ladebatterie in Verbindung mit KaWe MedCharge 4000 verwendet werden
- hohe Energiedichte der Li-Ion Ladebatterie 3,5 V

With xenon illumination

- all handles are compatible according to DIN ISO 7376
- metal light sockets, advantage: xenon-bulb can be removed very quickly to be sterilized
- light-weight (no casing or interior socket)
- all KaWe 2.5 V (small and medium) fiber optic xenon handles perform dual functions
 - with batteries = battery handle
 - with rechargeable battery = charging handle for KaWe MedCharge 4000 charging station
- very long rechargeable battery life 2.5 V + 3.5 V (NiMH)
- environmentally-friendly
- all KaWe 3.5 V (small + medium) fiber optic xenon handles can be used only with rechargeable battery and charged with the KaWe MedCharge 4000
- the 3.5 V lithium-ion rechargeable battery has a high energy density

 - auswechselbare Lichtleiter
 - leichte Reinigung
 - umweltfreundlich und zugleich wirtschaftlich
 - Fiberoptik Ø 4 mm, min. 5500 Einzelfasern
 - autoklavierbar bis 134°C – für ca. 2000 Zyklen
 - kompatibel nach DIN ISO 7376
-
- matte stainless steel – prevents back reflection
 - replaceable light guide
 - easy to clean
 - environmentally-friendly and cost-effective
 - fibre optic illumination Ø 4 mm, 5500 single fibres minimum
 - can be treated in autoclave up to 134°C – approx. 2000 times
 - compatible according to DIN ISO 7376

**Confirmation of the minimum achievable operating time REF 12.80220.722
(Li-Ion secondary charging battery)**

KIRCHNER & WILHELM GmbH + Co. KG (*KaWe*) hereby confirms that the secondary charging batteries "Type C, 3.5V, Lithium-Ion (*Li-Ion*), medium" (REF 12.80220.722) achieve a minimum operating time of 3 hours with all compatible *KaWe* laryngoscope handles and the illuminants compatible with these handles.

This applies under the restriction that the rechargeable batteries are in technically perfect condition and are used correctly. Please follow the instructions in the corresponding instructions for use.

There is generally no warranty claim on *KaWe* charging batteries.

KaWe MedCharge 4000 charging station

REF 12.80005.002

KaWe MedCharge 4000 is the charging station for the KaWe EUROLIGHT, KaWe COMBILIGHT, and the laryngoscope product lines metal handles in small (AA) and medium (C) models, with the exception of the Economy, LED 2.5 V and plug-in charging handles. The operation time of a medium-sized rechargeable batteries is approximately 3 hours, whereas the smaller models last approx. 2 hours. This is however, dependent on the type of bulb used.

Description

- charging station
- for charging handles 2.5 V / 3.5 V
- intelligent electronics control
- with universal power plug
ALL in ONE: EU 240 V, GB 240 V, US 110 V
- 2 adapter sleeves for (AA) handles
- incl. wall-mounted holder

Technical data

- input voltage: 100V – 240V +/- 10%, 50 – 60 Hz
- max. power: 1.2 A
- efficiency factor: 90 – 93 %
- chargeable capacity: min. 250 mAh, max. 4500 mAh
- input voltage charging station: 9 VDC +/- 10 %
- output voltage in stand-by: < 9 VDC
- rated output voltage: 2x 3.6 VDC
- rated charging current: 2x 250 mA +/- 10 %
- charge end power: 10 – 30 mA for Li-Ion
- electric strength: 4 kV
- protection class: II
- operating temperature: 0° C – +40° C
- storage temperature: -25° C – +70° C

Emergency bag, for max. 4 blades + 1 handle
