

Innovative positioning solutions for Canon CT

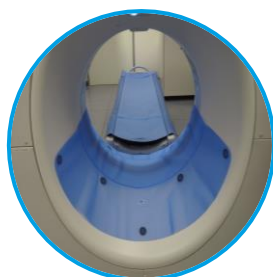

Solutions

CT Table Cover

The CT Table Covers are protective sleeves made of PU foil and are available for CT table mats from various manufacturers.

- Extra safety thanks to specially adapted flaps
- Durable surface even with 90% alcohol disinfection
- Durable and hard-wearing materials with high-quality workmanship

CT Gantry Cover

The CT Gantry Covers are protective covers made of PU foil and are available for the CT gantry of various manufacturers.

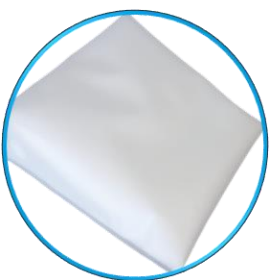

- Perfect fit and thoughtful design
- Can be cleaned easily without leaving residue
- Routine work on the CT through simple and intuitive handling

ProBelt

ProBelt is the first belt system without velcro for the fixation of patients on imaging tables and is compatible with all manufacturers.

- Simple adjustment with hook-eyelet
- Rail adapter available for all imaging tables
- Perfectly hygienic PU foil without hook and loop fastener

PearlFit

PearlFit positioning aids are available in various sizes and shapes and can be used for stable but yet comfortable patient position.

- Durable surface allows easy cleaning
- Stable positioning without pressure points
- High-quality manufacture using tear resistant materials
