SYSTEM ADMINISTRATOR

WORK HISTORY

-  System Administrator
US Software Solutions · Full-time Dec 2023 – Oct 2024 · 11 mos
-  System Administrator
MicroInvest · Full-time May 2022 - Dec 2023 · 1 yr 8 mos
-  System Administrator(windows)
DAAC System Integrator · Full-time Dec 2024 - Present · 1 yr 4 mos

PROFESSIONAL SUMMARY

- Personal Projects**
- Worked directly with clients to understand business requirements, recommend suitable technical solutions, provide project updates, deliver completed solutions, and provide post-launch support and maintenance.
 - Participated in the development of the **Registrul Fermierului (LPIS)** information system for the **Ministry of Agriculture**, contributing to frontend and backend development, feature implementation, bug fixing, testing, and system improvements.
 - Designed and delivered e-commerce platforms such as **Instastore.md** and **MegHome.md**, managing the full implementation process from planning and development to deployment.
 - Developed the **Den-Van Logistics** platform for a **Polish logistics company**, implementing business requirements and delivering a scalable web solution.
 - Successfully completed several additional websites and custom software solutions for businesses, including ongoing improvements, maintenance, and technical support.
- System Administrator**
- Managed and maintained Windows Server infrastructure, ensuring system stability, security, and high availability.
 - Administered Active Directory, Microsoft 365, Exchange Online, Intune, Microsoft Teams, SharePoint, and Entra ID (Azure AD).
 - Installed, configured, and maintained VMware virtual environments and Microsoft SQL Server, including database backup and recovery.
 - Configured backup and disaster recovery solutions, monitored infrastructure performance, and automated administrative tasks using PowerShell.
 - Managed network infrastructure, including VPN, DNS, DHCP, switches, VLANs, firewall configuration, and network troubleshooting.
 - Performed server deployments, operating system installations, migrations, software updates, and security hardening.
 - Provided technical support for hardware, software, and network-related issues while managing IT assets and ensuring reliable day-to-day operations.
