Booth for interpreter

Overview

The 2-Person Interpretation Booth is a lightweight, modular, and easy-to-install unit. Built to ISO 4043 standards, it has 35mm thick panels and a sturdy aluminum alloy frame. The interior includes sound-absorbing panels to reduce dust and ensure comfortable breathing for interpreters.

Features

- The modules connect using hook-style fittings, requiring no tools for installation.
- Installation time: approximately 5 minutes.
- The complete set includes 8 panels (4 with windows, 1 door panel), 2 roof covers, 1 tabletop, 2 cable holes, 1 ventilation hole, and 2 ventilation fans.
- Standard window: 860mm high x 680mm wide; standard tabletop height: 740mm from the ground, dimensions: 1530mm x 500mm; cable hole size: 160mm x 80mm.
- Outward-opening door meets safety standards.
- Silent top-mounted ventilation fan with 8 air changes per minute.
- Door options: rear or side opening.
- Table load capacity: 30kg.
- Comes with flight case + cardboard packaging (wooden packaging recommended for stationary setups to reduce costs).

Technical Parameters

Outside Dimension: W1600 x D1600 x H2035 (mm)

Inside dimension: W1530 x D1530 x H2000 (mm)

Package size: W2080 x D700 x H1050 (mm)

Weight: 236KG

Net weight(without flight case): 180KG

Thickness of wall panel: 35mm

Exterior Color: Dark grey, customizable

Internal Color: Light grey, customizable

Sound insulation: 20~35 dB

Panel numbers: 11

Table: 1530 x 500 (mm), 740mm height

Window: acrylic

Front window:W680 x H860 (mm); Rear window (door) : W229 x H480 (mm)

Fan: interchangeable position, Size: W360 x D180 x H120 (mm); Power supply: 100-240V

Soundproofing

Table 1: Difference in Sound Pressure Levels (D) Between the Interpretation Booth and the Room

frequency(Hz)	250	500	1000	2000	4000
D(dB)	14	18	24	26	26

Table 2: Difference in Sound Pressure Levels (D) Between Interpretation Booths

frequency(Hz)	250	500	1000	2000	4000
D(dB)	20	26	32	34	30
