Project: Development of landing pages and online shops for local MSMEs

Position under the project: Web developer

Implementation period: July 2020 – July 2021

Project description:

The project supports the development and enhancement of the competitiveness of micro-, small and medium-sized enterprises (MSMEs) and contributes to the creation of new companies, which, implicitly, will lead to improvement of the living conditions on both banks of the Nistru river.

Here was developed 11 websites using Drupal (3 e-commerce platforms and 8 landing pages). Developed products are multilingual and operational on laptops, tablets, PCs, any mobile devices, other means used by users to navigate the Internet, while also considering the needs of users with disabilities.

Main technologies: PHP 7.3, Composer, Bash script, JavaScript, CSS, Drush, jQuery, Apache, Twig, Apache2, Git, Sass/Js Compiler, Ajax, DDEV, API Bank.

Project: Development a new version of the official website of General Inspectorate of the Border Police based on the standard model

Position under the project: Web developer

Implementation period: August 2020 – December 2020

Project description:

The aim of the project is to create a new version of the official website of the General Inspectorate of Border Police, as a contemporary one, retained at the same time and can provide easy navigation, in order to increase public information and institutional transparency.

The major wished features:
- new dashboard page;
- elaboration of the web page design in accordance with the provisions of Government Decision no. 188 of 03.04.2012 on the official pages of public administration authorities in the Internet;
- selection of the language version: RO, EN, RU;

- the search button;
- banner slideshow block and other.
