

EASTERN MEDTECH

Veterinary Use Products

Manufacturer · Innovation · OEM Partner · Social Responsibility

Company Profile

Shanghai Eastern Medtech Co., Ltd, an new dynamic medical device trading company. We are professional on Disposable Injection Devices development and trade with own plant located in Wenzhou city, has more than 25years history. Plant with construction area of 26000 m², class 8(100,000) clean room area 8000 m².

Product Quality Control and Certificates

ISO 13485 CE certificated CFDA

Based on years of technology accumulation and complete quality management system, has the ability of cooperative development and large-scale production. Sharing our know-how on disposable medical device, to continually provide innovative, high quality standard products.

	Lancet Type	✓

SIDE HOLE Type

LANCET TYPE

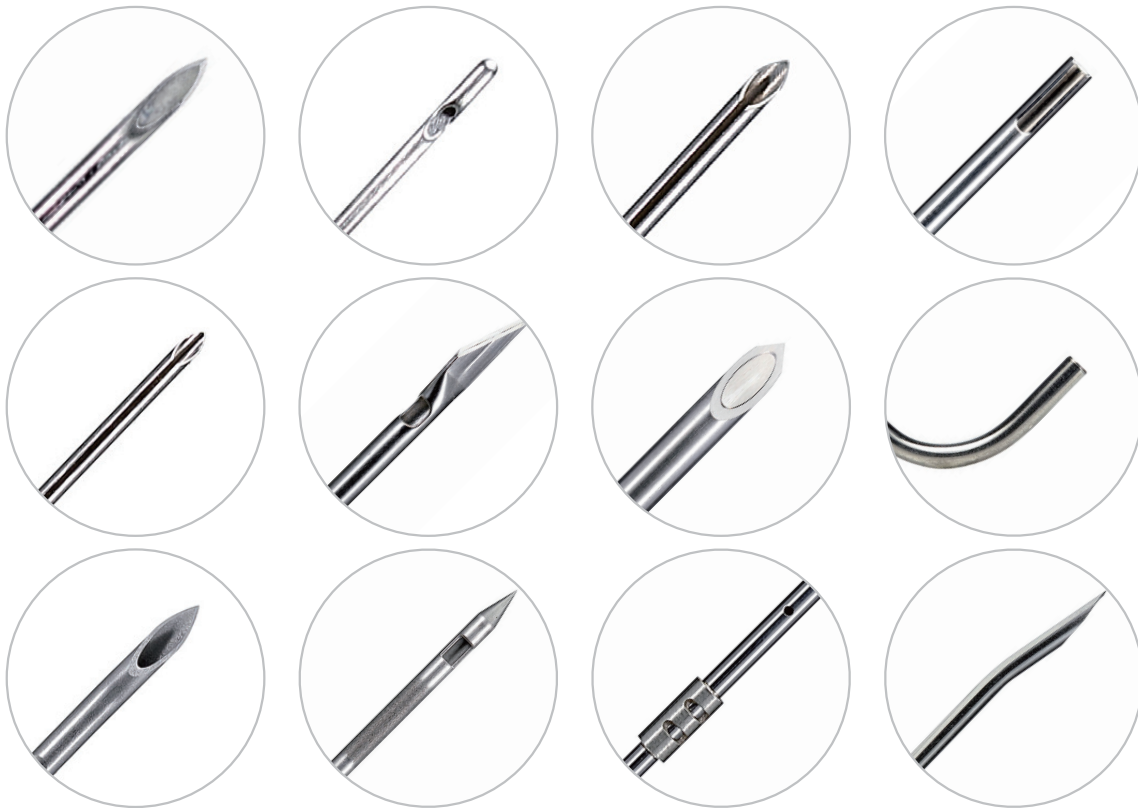

Remark: Besides the normal sizes in above table, special sizes (according to client's requirements) are available.

Product Features

- _ The cannula is made of high quality austenite stainless steel.
- _ The lancet tip is ground by high precise grinding technology, with high sharpness and small resistance.
- _ EO sterilization, Sterile, no-pyrogenic.
- _ Needle with smooth surface and side hole design to reduce the coring effect and particle generated when penetrate into the bottle stopper.

Package: Individual blister package or in bulk.

Special Needles

Tip Type Sample

Tube Type Sample

Product Features

- _ Besides the mature technology of needle tip grinding, our company own various production machines and rich experiences on producing special tubes and needles. With the spirit of putting full attention into products, we produce small batch quantity high and special technology needles.
- _ Products are used in the medical field of clinical injection, drainage, sampling, cleaning, conducting and industry, aviation etc.
- _ According to customer requirements and the production technology requirements, some available production methods to process small outer diameter tubes are : Forging, Electric-Chemical grinding, Electric-Chemical polishing, Mechanical polishing, Electric wire cutting, Electric Pulse, laser cutting & welding etc.

Product Features

- _ The barrel is made from high transparent polypropylene(PP), which have a bright and transparent appearance. The process of component mould injection and assembling processes are all implemented by full automatic machine to avoid the personnel contamination. The production processes are under controlled strictly and the quality is guaranteed.
- _ Piston type : synthetic rubber and nature rubber. Suitable tolerance of the fitting between barrel and piston, and the medical grade silicon is used as lubricating oil, which make the syringe have great sealing and sliding function.

Package: Individual blister package or PE bag.

Product Features

- _ The design and production comply with ISO8537. The plastic parts are moulded by hot runner molds; ultra-thin needles is fixed permanently. Ultra thin tube, sharp tip to reduce the puncture pain utmostly.
- _ Without residual, the waste of insulin is avoided.
- _ I.U. and CC calibration, graduation lines is printed in bold for reading easily.
- _ EO sterilization, Sterile, no-pyrogenic.
- _ The customized needle is available according to client special requirement.

Package: Individual Blister or PE bag.
