Clot Retrieval Thrombectomy for Acute Ischemic Stroke

Solitaire™ X is a new generation revascularisation device with a unique parametric design, featuring an overlapping technology, providing physicians with improved delivery performance, effective clot retention and faster flow restoration timelines, designed to be deployed with a lower microcatheter profile, to provide expanded ease of delivery.

SEE ALL ACUTE ISCHEMIC STROKE DEVICES ([HTTPS://EUROPE.MEDTRONIC.COM/XD-EN/HEALTHCARE-PROFESSIONALS/PRODUCTS/NEUROLOGICAL/REVASCULARIZATION-STROKE.HTML](https://europe.medtronic.com/xd-en/healthcare-professionals/products/neurological/revascularization-stroke.html))

▲ [Indications, Safety and Warnings \(https://europe.medtronic.com/xd-en/healthcare-professionals/products/neurological/revascularization-stroke/solitaire-x/indications-safety-warnings.html\)](https://europe.medtronic.com/xd-en/healthcare-professionals/products/neurological/revascularization-stroke/solitaire-x/indications-safety-warnings.html)

A DIFFERENCE YOU CAN FEEL¹ WITH PRECISION YOU CAN SEE²

The Solitaire™ X portfolio is designed to give you greater confidence during interventional stroke procedures with:

dynamic clot integration^{3,4}
force^{4,5}
average from M2 to ICA^{4,6}

duces lower delivery force^{1,7} for procedural efficiency and smooth navigation

0:00 /
2:48

UNIQUE PARAMETRIC DESIGN FOR DYNAMIC CLOT INTEGRATION

The overlapping stent design allows the device to expand in larger vessels and compress in smaller vessels during deployment and retrieval³ as well as:

- Maintaining consistent stent cell size and structure⁸
- Differentiated radial outward force^{4,5}
- Providing multiple planes of clot integration contact³

DIFFERENTIATED RADIAL OUTWARD FORCE^{4,5}

OPTIMISED DELIVERY FOR IMPROVED EFFICIENCY^{1,7}

Our Solitaire™ X revascularisation device - designed with an optimised delivery system - produces lower delivery force⁷ for improved procedural efficiency and smooth navigation through even the most complicated anatomy.

LOWER DELIVERY FORCE^{1,7}

COMPLETE VISUALISATION WITH COVERAGE FROM M2 TO ICA^{4,6}

The distinctive, evenly-spaced platinum markers let you visualise the optimal working length and stent behavior for real-time procedural feedback, ensuring accurate alignment, optimal revascularisation, and clot capture success.²

The 6x40 length device simplifies placement with proximal ophthalmic alignment, providing complete visualisation and coverage from M2 to ICA.^{4,6}

ROBUST DATA FOR SAFETY AND EFFICACY

Our Solitaire™ portfolio is backed by published data with 11+ trials and case studies worldwide, proving it reduces stroke-related disability in patients suffering a large vessel acute ischemic stroke following IV t-PA.⁹⁻¹⁹

MORE OPTIONS BETTER CONTROL

Our AIS portfolio offers comprehensive, compatible solutions that give your patients a better chance to walk away from AIS.

ECONOMIC VALUE

DATA SUPPORTED

See how stroke treatment with the Solitaire™ device provides economic value in UK.

INDICATIONS

The Solitaire™ X revascularisation device is designed for use in the flow restoration of patients with ischemic stroke due to large intracranial vessel occlusion. Patients who are ineligible for intravenous tissue plasminogen activator (IV t-PA) or who fail IV t-PA therapy are candidates for treatment.
