

X-Ray Tube supports

Ceiling Suspended tube support

Ergonomic design and virtually unlimited positioning capability

Fully counterweighted spring balance for easy and smooth operation

PMB locking system for safety

Floor to Ceiling tube stand

Sturdy support by ceiling rail suspension

Column rotation* function for wider coverages

Floor Mounted tube stand

Floor Mounted rail system for lateral stand movement

Column rotation* function for wider coverages

*Optional Feature

High Frequency Radiography System

KAIGEN-R Series

Compact and efficient

High frequency

Superior image

Easy & Convenient Digital Upgrade

Tilting Bucky Stand & Mobile Table

Standing Mode

Table Mode

Tilting Bucky Stand with Tilting Table

Standing Mode

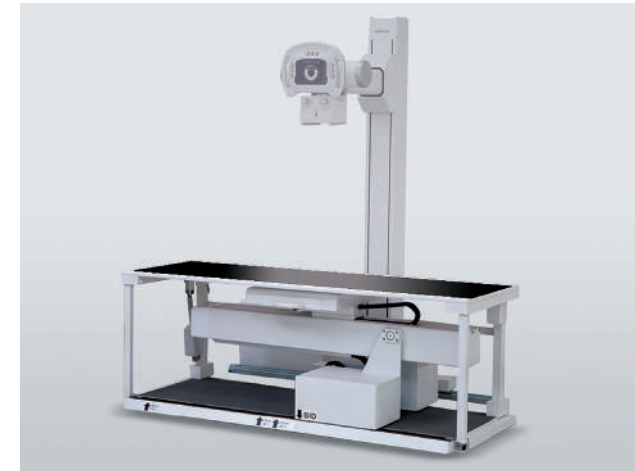

Table Mode

Exceptional image quality with user friendly interface

- Small Footprint
- Easy Installation
- Table/Chest imaging with a single detector

X-Ray Tables

Elevating Bucky Table with four way floating top
• High patient load capacity

Bucky Table with four way floating top
• Foot switch type / Sensor type*

X-Ray Generator

High Frequency Inverter Type

- 500mA / 125kVp, 40KW
- 800mA / 150kVp, 65KW

Capacitor Bank*

- Only need power from wall outlet
- Stable image density
- Capacitors ensure long lifespan

Vertical Bucky Wall Stand*

Tilting bucky wall stand*
