2021 HEALTHCARE CATALOGUE

CA-MI

Italian
Medical
Touch

COMPANY PROFILE

Located nearby Parma, in the North of Italy, CA-MI is an Italian family-run factory founded in 1984 and committed to the production of electromedical equipments and medical devices in different fields, such as RESPIRATORY CARE, DIAGNOSTICS, REHABILITATION, WELLNESS, BABY CARE, and SUCTION.

The expertise and know-how achieved in over 30 years led CA-MI in the position to export into more than 100 countries and to provide comprehensive answers to the home-care market and medical operators.

Visitors are welcome to meet the members of the CA-MI Export Team at the major international exhibitions: Medica in Dusseldorf (D), Arab Health in Dubai (UAE), FIME in Miami (USA), Medica Asia in Singapore, where CA-MI is costantly present with the entire range of medical devices.

ITALIAN QUALITY

INDEX

ITALIAN QUALITY CERTIFIED WORLDWIDE

Relying on in-house R&D and design departments, all CA-MI suction devices and compressor nebulizers are either manufactured or designed in Italy using state-of-the-art and wear resistant materials, in compliance with all the directives in force.

UNI EN ISO 9001:2015
Quality Management System

EN ISO 13485:2016
Medical devices - Quality management systems - Requirements for regulatory purposes.

DEVICES CLASSIFICATION
CLASS IIA MEDICAL DEVICES
suction units, aerosol delivery systems, jet nebulizers, inhalators, nasal irrigator, blood pressure monitors, thermometers, finger pulse oximeters.

CLASS IM WITH FUNCTION OF MEASURE
aneroid and palm-type sphygmomanometers, suction containers, disposable liners and mercury-free clinical thermometers.

CLASS I NON-STERILE
incentive spirometers, antidecubitus mattress, medical stockings, wheelchairs and walkers, stethoscopes.

Technical data, equipment and options shown are based on the latest information available at the time of printing and are subject to change without notice.

ABOUT AEROSOLTHERAPY

Aerosoltherapy is the **administration of a treatment in the form of aerosol into the respiratory tract** for therapeutic purposes. When medications are not available in aerosol form such as an MDI, but only in solutions, nebulizers can turn the liquid into suspended particles that carry the active principle to the patient by inhalation.

CA-MI manufactures nebulizers with different technologies indicated for the treatment of any respiratory disorder, from **administering physiological/hypertonic solutions** as mucus thinners (mucolytics), to **treating seasonal pathologies** such as cold and cough, and **acute and chronic pathologies** of the upper and lower airways.

PARAMETERS & TREATMENTS

Different types of treatments can be generated, according to a few parameters, namely:

MMD OR MMAD
The mean particle size, expressed in micron (µm)

NEB-RATE
The speed of nebulization, expressed in ml/min

RESPIRABLE FRACTION
The amount of particles with diameter <5µm

RESIDUAL VOLUME
The amount of medication that cannot be nebulized

WASTED VOLUME
The amount of medication wasted during exhalation phase.

10-15 µm
Upper airways

5-10 µm
Upper / medium airways

1-5 µm
Medium / lower airways
The **mean particle size (MMAD)** is particularly important, because depending on diameter of the particles, **different areas of the respiratory tract are reached and thus different pathologies or disorders can be treated**.

RESPIRATORY

AEROSOL DELIVERY SYSTEMS

made in Italy

TINY & NOISELESS

CA-MI **vibrating mesh nebulizers** are small hand-held nebulizers that generate the aerosol by a mesh vibrating at high frequency, micronizing the medicine without producing any sound.

A new system which finds more and more applications, not only for children, enjoying the **soundless operation**, but also towards adults, appreciating the **small size, the versatility and the light weight** of this revolutionary aerosol system.

LONG LASTING BATTERIES
Can administer up to 20 treatment cycles with one charge.

REDUCED RESIDUAL VOLUME
The amount of drug left in the nebulizer after the treatment is <0,1ml.

AUTO CLEANING FUNCTION
Reduces the risk of annoying clogging of the mesh caused by improper cleaning at the end of each use.

Small size
HIGH PERFORMANCE

▲ *Kiwi+, p. 5*

▲ *Evolution, p. 6*

A PLACE FOR EACH ACCESSORY

CA-MI always designs its devices with its customers' needs in mind: the aerosol delivery system line includes **handy and compact models** provided **with a carrying bag** for storage of the unit, accessories and medicines, or **table-top models with a built-in compartment** designed for accessories and medicines storage.

DURABLE & EFFICIENT

CA-MI **compressor nebulizers** are characterized by a main unit, the piston-type compressor, and the jet nebulizer, which is a chamber turning the liquid medicine into aerosol.

CA-MI compressors are approved for **Non-Stop Operation** and do not require any oil lubrication or maintenance, making them suitable for both **prolonged homecare use and intensive professional use in the hospitals.**

Additionally, a specific attention is dedicated to emergency and ambulances: micropiston compressors are placed in miniaturized housings to create devices powered by rechargeable batteries and 12V car adapter.

SAFE & STABLE

All CA-MI jet nebulizers are made with **safe biocompatible material** which passed stability test with the most prescribed active principles, **guaranteeing that no alteration of the drugs** takes place.

Tested medicines are: *Ambroxol, Salbutamol, Beclometasone Dipropionate, Acetylcysteine and Budesonide.*

FARMASOL
HOMECARE COMPRESSOR NEBULIZER

24h Non-stop operation
The device can work without interruption, in order to guarantee the best performance.

Compact Design
Ideal for easy handling, equipped with carrying bag for storing accessories and medicines.

Fast & efficient
Fast HI-FLO Nebulizer, 7ml capacity, takes only 4 minutes with 2,5 ml of drug (0,5ml/min).

Quiet
Noise level comparable to the volume of a conversation (~60dB(A)).

Excellent nebulization
MMAD: 3,25 μm, respirable fraction >70%

INCLUDED ACCESSORIES

HI-FLO
jet nebulizer (see page 10)

ADULT MASK + CHILD MASK
with elastic strings

MOUTHPIECE + NOSEPIECE

MINIMAX

HOMECARE COMPRESSOR NEBULIZER

Small size, high performance
Tiny and handy, yet powerful. Bring it anywhere thanks to its handy carrying bag.

Fast & efficient
Fast HI-FLO Nebulizer, takes less than 5 minutes with 2,5 ml of drug (0,35 ml/min).

Quiet
Noise level comparable to the volume of a conversation (~60dB(A)).

Excellent nebulization
MMAD: 2,44 µm, respirable fraction >80%, residual volume: 0,40 - 0,50 ml

KIWI+
MOBILE MESH NEBULIZER

Fast & efficient
Second generation mesh nebulizer, 8ml capacity, takes only 6 minutes with 2,5 ml of drug (0,30ml/min).

Long lasting batteries
The lithium batteries last up to 1100 hours of operation or 300 charging cycles, making it the ideal device for travelling.

Always with you
Tiny and easily transportable thanks to its small size. It can be operated by lithium battery and easily stored.

Baby friendly
Easy to hold thanks to its small size and pleasant to hear thanks to its low noise level (38,2dB(A)),

High-quality accessories
Equipped with a wide range of accessories with comfortable soft touch finishings.

Autocleaning function
Reduces the risk of annoying clogging of the mesh caused by improper cleaning at the end of each use.

Excellent nebulization
Fine particle size of 1,51 micron, 93% of which is <5 micron and <0,1ml residual volume.

INCLUDED ACCESSORIES

VIBRATING MESH CHAMBER
2nd generation

ADULT MASK + CHILD MASK
with soft touch finishing

MOUTHPIECE + NOSEPIECE

MOBILE
MOBILE MICROCOMPRESSOR NEBULIZER

Designed for emergency
Can be powered by batteries or with car adapter.

Always with you
Reduced size and weight thanks to miniaturized micropiston compressor system.

Quiet
Vibration Reduction System (VRS), with reduced noise and vibration levels (Noise level =50 dB(A)).

Suitable for all ages
Can be used by adult and children thanks to the many included accessories.

Excellent nebulization
MMAD: 3μm, respirable fraction   >75%, residual volume: 0,40 - 0,50 ml.

HI-4
FOUR SPEED JET NEBULIZER

Professional Performance
Designed with two valves for a greater therapeutical effect of the nebulization.

4 speeds

Multiple speed
A speed selector can be set in 4 different positions to increase nebulization speed while maintaining an optimal MMAD.

Highly compatible
Passed stability test with the most prescribed active principles (Ambroxol, Salbutamol, Beclometasone Dipropionate, Acetylcysteine, Budesonide)

Excellent nebulization
8 ml capacity, MMAD ranging from 3,32 to 4,28 µm and neb-rate from 0,40 to 0,80 ml/min, depending on selected speed

TECHNICAL SPECS
EXHALATION VALVE
Opens only during exhalation phase to let the medication out.

INHALATION VALVE
Opens only during inhalation, entraining additional ambient air into the chamber increasing dramatically the speed and quantity of delivered medication.

SPEED SELECTOR
Four different nebulization speeds.

POS	NEB RATE	MMAD
I	0,40 ml/min	3,32 µm
II	0,60 ml/min	4,07 µm
III	0,70 ml/min	4,23 µm
IV	0,80 ml/min	4,18 µm

AVAILABLE SETS

RE.300350 | COMPLETE SET IN DISPLAY BOX
HI-4 Jet Nebulizer, Adult and Child Masks with Elastic Strings and Connector, Mouthpiece, Nosepiece, Air Tube

RE.300350/01 | MOUTHPIECE SET

ABOUT FEVER?

A fever is **a temporary increase in the body temperature**, often due to an illness. A normal temperature can vary from person to person, but it is usually around 37°C. Normal body temperature may also fluctuate depending on the time of day. It tends to be lower in the morning and higher in the late afternoon and evening. Other factors, such as menstrual cycle or intense exercise, can also affect body temperature.

Having a fever is a sign that **something out of the ordinary is going on in the body.** Fever seems to play a key role in **helpingthe body fight off a number of infections.**

For an adult, a fever may be uncomfortable, but usually is not a cause for concern unless it reaches 38°C or higher. For infants and toddlers, a slightly elevated temperature may indicate a serious infection.

ECOLOGICAL, DIGITAL OR INFRARED?

An accurate reading of a person's temperature is a vital tool in managing illnesses. CA-MI provides different models of thermometers to satisfy any requirement in monitoring body temperature.

Mercury-free types are eco-friendly, digital types have rigid or flexible tip, and infrared scanners are quick and contactless, yet they all guarantee accurate and safe results.

▲ *Digit-10P, p.17*

DIAGNOSTICS

THERMOMETERS

▲ *T-Flap, p.18*

QUALITY & ACCURACY

With the objective of combining **accuracy, easiness and quickness** in reading temperature, CA-MI pays special attention to the selection of **premium components**, such as sensors, probes and plastics. In fact, CA-MI thermometers are largely requested by users worldwide.

TEMPERATURE

Stepped V-shape design improves measurements focusing infrareds.

RANGE

Avoids the errors caused by wrong positioning: it guides user to reach the correct distance.

TEMPERATURE BALANCE

Reduces the systematic errors caused by environmental temperature transition.

SUPERIOR ACCURACY

◀ *T-Plus, p.16*

NON-CONTACT ADVANTAGES

There are several distinct advantages that have made non-contact thermometers very popular. First of all the possibility of **passing contagious infections** from one person to other **is ruled out** altogether. No matter how carefully you rinse or clean the bulb of the conventional mercury thermometer, the risk of infection transmission cannot be eliminated.

There are times when the **temperature** of the diseased person **has to be recorded periodically**, sometimes even when the patient is taking rest or sleeping: with those thermometers, any nurse can record the body temperature of the patient without disturbing. This same feature is also very helpful in taking the temperature of infants, kids or even aged persons with limited motor controls.

They also come with a **recording function** to check the latest readings, helpful in making accurate temperature charts for the physicians who need to diagnose and decide the line of treatment.

The large digital display allows for **easy reading** even for people with vision problems. More over these thermometers, can have **multiple uses** like measuring the temperature of warm water for baby bath or of infant feed, milk, etc.

▲ *Counter display box for digiT-40 and digiT-40F thermometers, p.17*

T-PLUS
INFRARED THERMOMETER

Non-contact technology
Measurements are taken between 0-3cm from the forehead guaranteeing the best hygienic conditions.

Instant measurements
Extremely quick: takes 1 second to measure temperature.

Superior accuracy
Provided with 3 special sensors detecting temperature, correct distance, and temperature balance. Operated by the extremely precise Japanese state-of-the-art firmware.

Position aid
A dedicated distance sensor guides user to reach the correct measuring distance.

Auto cooldown
Prevents systematic errors caused by too frequent tests.

Fever alarm
Triple color backlight and 3 different buzzers to indicate different temperatures.

Wide memory
Stores up to 30 measurements for easy monitoring.

Energy save
Automatically shuts off after 30 seconds.

Dual mode
Detects both body and surfaces temperatures.

INCLUDED ACCESSORIES

RIGID PLASTIC CASE
for safe storage and transport.

1.5 VOLT BATTERIES
2 x Alkaline AAA size.

PRODUCT CODE TR 100500

T-EASY
INFRARED THERMOMETER

Non-contact technology
Measurements are taken up to 5 cm from the forehead guaranteeing the best hygienic conditions.

Instant measurements
Extremely quick: takes 1 second to measure temperature.

Auto cooldown
Prevents systematic errors caused by too frequent tests.

Fever alarm
Triple color backlight and 3 different buzzers to indicate different temperatures.

Dual mode
Detects both body and surfaces temperatures.

Wide memory
Stores up to 30 measurements for easy monitoring.

Energy save
Automatically shuts off after 30 seconds.

INCLUDED ACCESSORIES

CARRYING BAG
for safe storage and transport.

1.5 VOLT BATTERIES
2 x Alkaline AAA size.

PRODUCT CODE   TR 100500/01

DIGIT-10P
DIGITAL THERMOMETER

PREDICTIVE
Advanced algorithm predicting the correct temperature with superior accuracy, no matter where you measure it.

SUPER QUICK
Takes only 10 seconds to measure body temperature.

EASY-READ
Thanks to a wide LCD screen of 2,35 x 1,55 cm with 3 backlight colours.

FEVER ALARM
Triple color backlight to indicate different temperatures.

SHOCK & WATERPROOF
Certified IP55 rating.

EASY TO CLEAN
With any alcohol-based solution.

ENERGY SAVE
Automatically shuts off after 5 minutes.

LONG LASTING
Up to 600 measurements and three years of life thanks to the replaceable battery.

DISPLAY BOX
4-colour counter display box of 12's can be folded and used as display box from retail counters.

INCLUDED ACCESSORIES

PLASTIC CASE
for safe storage.

3V BUTTON BATTERY
type CR1632.

PRODUCT CODE   TR 200300

DIGIT-40
DIGITAL THERMOMETER

RIGID TIP
For easy rectal, axillary or oral measurement

EASY TO CLEAN
With any alcohol-based solution.

SHOCK & WATERPROOF
Certified IP54 rating.

QUICK
Takes from 40 to 90 seconds to measure body temperature

ENERGY SAVE
Automatically shuts off after 8 minutes.

LONG LASTING
Up to 1200 measurements and three years of life thanks to the replaceable battery.

DISPLAY BOX
4-colour counter display box of 24's can be folded and used as display box from retail counters.

INCLUDED ACCESSORIES

PLASTIC CASE
for safe storage.

1.5V BUTTON BATTERY
type LR41 or AG3.

PRODUCT CODE   TR 200030

DIGIT-40F
DIGITAL THERMOMETER

FLEXIBLE TIP
For easy rectal, axillary or oral measurement

EASY TO CLEAN
With any alcohol-based solution.

SHOCK & WATERPROOF
Certified IP54 rating.

QUICK
Takes from 40 to 90 seconds to measure body temperature

ENERGY SAVE
Automatically shuts off after 8 minutes.

LONG LASTING
Up to 1200 measurements and three years of life thanks to the replaceable battery.

DISPLAY BOX
4-colour counter display box of 24's can be folded and used as display box from retail counters.

INCLUDED ACCESSORIES

PLASTIC CASE
for safe storage.

1.5V BUTTON BATTERY
type LR41 or AG3.

BLOOD PRESSURE MONITORING

Blood pressure is the term used to describe **the strength with which blood pushes on the sides of the arteries** as it is pumped around the body.

High blood pressure (hypertension) can put a strain on the arteries and organs, which **can increase the risk of developing** serious problems such as **heart attacks and strokes**. Low blood pressure (hypotension) is not usually as serious, although it can cause dizziness and fainting in some people.

Monitoring blood pressure is the only way to find out if the blood pressure is too high or too low, because most people will not have any obvious hypertension symptoms.

DIFFERENT SOLUTIONS FOR EVERY NEED

A variety of blood pressure monitors is available so so blood pressure can be measured while at home or out and about. Whether one's preference goes to wrist or upper arm type, CA-MI has the perfect product to suit every need.

UPPER ARM

Classic design meets state of the art technology. Thanks to the implemented inflation technology measurements are quick, gentle and reliable.

WRIST TYPE

Small in size, yet accurate. Quick and easy to wear and very convenient for everyday use, wherever you are.

DIAGNOSTICS

BLOOD PRESSURE MONITORS

COMFORTABLE & EASY TO USE

CA-MI selected a wide range of products that grants reliability, comfort and ease of use. Anyone can check their own blood pressure every day, and assist the clinician with accurate information.

COMFORTABLE
Soft-finishing cuff, wrapping gently around the arm.

EASY TO READ
Blood pressure values are classified according to the World Health Organization guidelines.

RELIABLE
Guarantees reliable results thanks to body movements and interferences detection system.

QUICK AND GENTLE
Thanks to the inflation technology blood pressure is monitored in a gentler and quicker way during the gradual inflation of the cuff.

Italian Design
JAPANESE TECHNOLOGY

▲ *Nissei Comfort, p. 22*

STATE-OF-THE-ART TECHNOLOGY

Nissei Motion is the first wrist type blood pressure monitor combining the gentleness of inflation technology with the superior accuracy of the High Resolution System and M-Shaped Cuff.

High Resolution System

▲ *Nissei Motion, p. 24*

CA-MI IS EXCLUSIVE EU DISTRIBUTOR OF NISSEI

PRECISE AND VALIDATED

Most of CA-MI devices passed the ESH (European Society of Hypertension) clinical accuracy test, known as the most stringent test of clinical accuracy in the world.

Moreover, to display measurements in a more comprehensible and worldwide recognized way, these devices comply with the WHO Classification Guidelines.

World Health Organization

European Society of Hypertension (ESH)

NISSEI COMFORT
UPPER ARM BLOOD PRESSURE MONITOR

Clear Read
Wide LCD monitor: all info at one glance.

Innovative inflation technology
Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Body sensor
Detects body movements or interferences that may cause measurement errors.

Wide range comfortable cuff
The cuff can fit a wide range of arm sizes: 22 - 42 cm. Thanks to its soft finishing, it wraps gently around the arm.

Personal Mode
Cuff's inflation is adjusted according to the latest 3 readings, shortening the measurement time and improving comfort.

Average value
Displays the average of the latest three readings.

Circulatory risk indicator
Displays Pulse Pressure, a parameter related to artery stiffness and circulatory risk factors.

ESH clinical validation
Technology in compliance with the European Society of Hypertension IP2010 protocol.

Extended warranty
The product is guaranteed 5 years.

WHO Classification
Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

CARRYING BAG
for safe storage and transport.

1.5V BATTERIES
4 x Alkaline AA size, replaceable.

COMFORT CUFF
Size: 22 - 42 cm, with soft finishing.

PRODUCT CODE   Comfort (DS-B33-04)

NISSEI DELICARE
UPPER ARM BLOOD PRESSURE MONITOR

Innovative inflation technology
Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Body sensor
Detects body movements or interferences that may cause measurement errors.

Wide range comfortable cuff
The cuff can fit a wide range of arm sizes: 22 - 42 cm. Thanks to its soft finishing, it wraps gently around the arm.

Switchable power supply
Can be used with AC adapter (not included) or AA alkaline batteries.

ESH clinical validation
Technology in compliance with the European Society of Hypertension IP2010 protocol.

Extended warranty
The product is guaranteed 5 years.

INCLUDED ACCESSORIES

CARRYING POUCH
for safe storage and transport.

1.5V BATTERIES
4 x Alkaline AA size, replaceable.

COMFORT CUFF
Size: 22 - 42 cm, with soft finishing.

PRODUCT CODE   Delicare (DS-B23-04)

NISSEI DSK-1011
UPPER ARM BLOOD PRESSURE MONITOR

Innovative inflation technology
Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Body sensor
Detects body movements or interferences that may cause measurement errors.

Double memory, double user
Stores up to 60 results in each memory bank.

Comfortable cuff
Size: 22 - 32 cm. Soft finishing, wrapping gently around the arm.

Switchable power supply
Can be used with AC adapter (not included) or AA alkaline batteries.

Personal Mode
Cuff's inflation is adjusted according to the latest 3 readings, to shorten the measurement time and to improve comfort.

Circulatory risk indicator
Displays Pulse Pressure, a parameter related to artery stiffness and circulatory risk factors.

ESH clinical validated
In compliance with the European Society of Hypertension IP2010 protocol.

WHO Classification
Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

1.5V BATTERIES
4 x Alkaline AA size, replaceable.

COMFORT CUFF
Size: 22 - 32 cm, with soft finishing.

PRODUCT CODE DSK-1011

NISSEI DSK-1031
UPPER ARM BLOOD PRESSURE MONITOR

Clear Read
Wide LCD monitor: all info at one glance.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Body sensor
Detects body movements or interferences that may cause measurement errors.

Double memory, double user
Stores up to 60 results in each memory bank.

Smart rigid cuff
The device checks and warns if the cuff is not being worn correctly. Size: 22 - 42 cm. Soft finishing.

Switchable power supply
Can be used with AC adapter (not included) or AA alkaline batteries.

Circulatory risk indicator
Displays Pulse Pressure, a parameter related to artery stiffness and circulatory risk factors.

ESH clinical validated
In compliance with the European Society of Hypertension IP2010 protocol.

WHO Classification
Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

1.5V BATTERIES
4 x Alkaline AA size, replaceable.

PREFORMED CUFF
Size: 22 - 42 cm, with soft finishing.

PRODUCT CODE DSK-1031

NISSEI MOTION
WRIST BLOOD PRESSURE MONITOR

Hi-Resolution System
Scans pulse wave 6 times more frequently than conventional monitors, allowing the detection of irregular pulse rhythms which may be an indicator of cardiac arrhythmias, such as atrial fibrillation.

Innovative inflation technology
Measurements are quicker and gentler: blood pressure is monitored during the gradual inflation of the cuff.

Body sensor
Detects body movements or interferences that may cause measurement errors.

M-Shaped cuff
Improves measurement's precision binding the two wrist's bones securely so that arterial blood vessels are firmly tightened during inflation.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Cuff Status Function
Checks the correct positioning of the cuff before measurement.

Double memory, double user
Stores up to 60 results in each memory bank.

Always with you
Compact and easily transportable thanks to its rigid protective case.

WHO Classification
Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

RIGID CASE
for safe storage and transport.

1.5V BATTERIES
2x Alkaline AAA size, replaceable.

PRODUCT CODE Motion (WS-C2-04)

NISSEI WSK-1011

PRODUCT CODE   DS-11

DM-3000
PROFESSIONAL UPPER ARM BLOOD PRESSURE MONITOR

Automatic or manual mode
Oscillometric (AUTO) or auscultation (MANUAL) mode can be set by user.

Professional accuracy, easy operation
Inflation and deflation speed can be easily adjusted and the maximum constriction of the cuff sets according to the patient's parameters.

Fits every patient
Two cuffs are included (size: 22 - 32 cm (M) / 32 - 42 cm (L)) to fit patients with different arms circumferences, both washable and with soft finishing wrapping gently around the arm.

Seven memories
Records the 7 latest measurements results and the average values.

Switchable power supply
Can be operated with AC adapter or internal Ni-MH rechargeable batteries, both included.

Double display
Two clearly readable displays representing the mercury column and digital results.

Remote use
The long inflation tube and the 5 castors' trolley kit make it suitable for displacement.

ESH clinical validation
In compliance with the European Society of Hypertension IP2002 protocol.

INCLUDED ACCESSORIES

NI-MH 4,8VDC
Rechargeable battery

UNIVERSAL POWER ADAPTER
100-240V 50/60 Hz

PROFESSIONAL UPPER ARM BLOOD PRESSURE MONITOR

Mercury-free
Traditional mercury column has been replaced by the LCD column display.

Rapid exhaust
During or after measurement in just one move.

Manual Measurement
Manual systolic and diastolic measurements.

Intuitive LCD display
Clearly readible display representing the mercury column.

Low consumptions
Operated by two AA alkaline (LR6) batteries.

INCLUDED ACCESSORIES

1.5V BATTERIES
2 x Alkaline AA size, replaceable.

COMFORT CUFF
Size: 23 - 32 cm, with soft finishing

PRODUCT CODE   DM-500

HL858DK
UPPER ARM BLOOD PRESSURE MONITOR

Fingertip Afib Detector
Atrial fibrillation can be measured by simply placing the index finger on the detector.

Double LCD
Two LCD displays, one completely dedicated to the waveform graphic.

Irregular heartbeat detection
Detects irregular pulse rhythms, index of cardiac arrhythmias.

Triple memory, triple user
Stores up to 120 results in each of the 3 memory banks.

Switchable power supply
Can be used with AC adapter (not included) or AA alkaline batteries.

Comfortable cuff
Size: 23 - 33 cm. Soft finishing wrapping gently around the arm.

Average value
Displays the average of the latest three readings.

BIHS clinical validation
In compliance with the British and Irish Hypertension Society protocol.

WHO Classification
Blood pressure values are classified according to the World Health Organization guidelines.

INCLUDED ACCESSORIES

CARRYING BAG
for safe storage and transport.

1.5V BATTERIES
4 x Alkaline AAA size, replaceable.

COMFORT CUFF

DESIGNED FOR PROFESSIONALS

CA-MI matches its home-care diagnostic line with a range of product suitable for clinicians of all levels. A selection of devices adequate for practitioners as well as cardiologists who require more accurate and reliable instruments to validate their diagnosis.

▲ *S-100 Cardio, p. 33*

ALLERGY-FREE AND DURABLE MATERIALS

Latex allergic reactions can range from mild skin rashes to severe and life-threatening anaphylactic shock. Since no known cure for latex allergy exists, avoidance of latex exposure is the only protection. Healthcare facilities have taken a variety of approaches to reduce both worker and patient exposure to latex. These include replacing products made of natural rubber latex with those made of alternative materials.

CA-MI selected its products in order to provide the safest and most durable materials.

SUCTION

MONITORING BLOOD-OXYGEN SATURATION

Pulse oximeters are devices designed to be **positioned on a finger to get in few seconds the blood-oxygen saturation** (SpO_2) level, expressed as a percentage.

Values above 95% are to be considered natural, and therefore generally good, while the lower they get under that threshold the critical they are (a poorly oxygenated blood does not properly nourish body tissues and organs).

SpO_2 is an important parameter for the **prevention of critical conditions** affecting internal tissues and organic functioning, providing important information to the physician on the possible **presence of serious pathologies** such as: heart failure, arterial stenosis, ARDS (acute respiratory distress syndrome), COPD (chronic obstructive pulmonary disease), pulmonary emphysema, congenital heart defects, cystic fibrosis, critical conditions caused by drugs (allergy or overdose).

More over, the use of a pulse oximeter may be crucial to monitor extreme activities, such as mountaineering at high altitudes or scuba diving, in order to avoid dangerous situations.

CERTIFIED QUALITY

CA-MI has been successfully distributing many models of pulse oximeters suitable for different users and applications.

We are certified medical device manufacturers and always strive to provide the best product and service.

DIAGNOSTICS

PULSE OXIMETERS

O₂-EASY

Accurate
High-quality sensor providing precise measurements.

Always with you
Small & lightweight design.

Smart Display
Digital LEDs display with two directions for reading. Displays SpO2, PR and pulse bar.

Energy save
Low power consumption (batteries last up to 30 hours), automatically shuts off.

Suitable for all ages
Accommodates a wide range of finger sizes from pediatric to adults.

A CONCRETE AID FOR EVERYDAY LIFE

As people age, everyday activities previously taken for granted can become difficult or, at times, impossible to perform. In their usual design, common tasks may require the help of other people, creating stress or frustration.

CA-MI rehabilitation range is designed to help people retain independence, providing products aiming to help in the accomplishment everyday task in the easier way.

SAFETY & RELIABILITY AT HAND

CA-MI has selected only high-quality products, made with durable and safe materials.

Convenient to handle, easy to transport and at the same time trustworthy and realiable, thanks to the included safety devices, the whole rehabilitation range aims to provide solutions which guarantee only the best performance.

REHABILITATION

WHEELCHAIRS & WALKERS

BME4617
SELF-PROPELLING WHEELCHAIR

Self-propelling
Hand rims on rear wheels allow users to push themselves forward.

Foldable
The chair is designed to fold compactly in size (only 26 cm when closed).

Easy to handle
Lightweight, thanks to its aluminum structure, and easy to store and transport.

Comfortable & customizable
Padded seat and backseat in black nylon with document pocket on the back. Foldable padded armrests covered in black leatherette.
Optional padded legrests available.

Made to last
Reduced maintenance and longer life thanks to the high-quality materials: single crossbar powder coated steel frame, rear wheels in rocket aluminum with tubeless PU tires and black painted steel handrails.

BME4615
TRANSIT WHEELCHAIR

Transit
Small wheels make it easier to manoeuvre in environments where space is limited. Ideal for elderly and disabled users.

Foldable
The chair is designed to fold compactly in size (only 26 cm when closed).

Easy to handle
Lightweight, thanks to its aluminum structure, and easy to store and transport. Operator brake makes the manoeuvre easier.

Comfortable & customizable
Padded seat and backseat in black nylon with document pocket on the back. Foldable padded armrests covered in black leatherette.
Optional padded legrests available.

Made to last
Reduced maintenance and longer life thanks to the high-quality materials: single crossbar powder coated steel frame, rear wheels in rocket aluminum with tubeless PU tires and black painted steel handrails.

BME861
ROLLATOR WALKER

Foldable
Designed to easily fold compactly in size (only 30 cm when closed).

Easy to handle
Lightweight, thanks to the aluminum structure, and easy to maneuvre thanks to the two front swiveling wheels.

Safety brakes
The loop brakes are easy to tighten and release, it can be pressed down as the parking brakes to lock the wheels.

Comfortable & convenient
Padded seat and backseat with PVC upholstery. Equipped with a large and convenient shopping bag to carry personal items

Customizable
Adjustable height to fit different users.

Made to last
Reduced maintenance and longer life thanks to the high-quality materials: Aluminum liquid coated frame, 4 PU wheels, foam handle grip.

BME813/01
ROLLATOR WALKER

Easy to handle
Lightweight, thanks to its aluminum structure, and easy to store and transport.

Safe & reliable
Thanks to the two rotating front wheels and the ergonomic SBR rubber handles, the user can walk safely and easily.

Foldable
Designed to easily fold compactly in size, thanks to the single-button system.

Customizable
Adjustable height to fit different users.

Made to last
Reduced maintenance and longer life thanks to the high-quality materials: 1-inch anodized aluminum frame, powder-coated steel crossbar, satin finish surfaces.

BME666
3 IN 1 STANDARD COMMODE CHAIR

3 in 1
Multipurpose
Can be used wheter as shower chair or commode chair with bucket or positioning it on the WC.

Safe & reliable
Ergonomic armrest design, comfortable and non-slip armrests to provide the best assistance to get out.

Customizable
Adjustable height to fit different users (44-57cm).

Made to last
Reduced maintenance and longer life thanks to the high-quality materials: powder coating steel frame and resistant plastic, waterproof, durable and easy to clean.

MAT-130
ANTI DECUBITUS MATTRESS

Adjustable bubbles type
Made of 130 air bubbles and equipped with end flaps for correct positioning in the bed. Pressure can be adjusted to best fit with patient weight.

Delicate
Massages skin delicately at alternating points of contact for improved blood flow and tissue oxygenation preventing bedsore ulcers formation.

Safe & non-toxic
Made of highly elastic non-toxic PVC, resistant and easy to clean.

Self inflating
Easily inflates with its own compressor.

INCLUDED PARTS

INFLATABLE MATTRESS
cm 300 x 90 x 6,5, made of PVC

THE EASY WAY TO EXPAND LUNGS

An incentive spirometer helps the patient to take slow, deep breaths to expand and fill the lungs with air.

This helps preventing lung problems, such as pneumonia. The incentive spirometer is made up of a breathing tube, an air chamber, and an indicator. The breathing tube is connected to the air chamber and has a mouthpiece at the end.

PULMONARY REHABILITATION

The main subjects of pulmonary rehabilitation are patients affected by Chronicle Obstructive Pulmonary Disease (COPD), severe respiratory troubles or with post-operation long stay in bed.

A pulmonary rehabilitation program helps minimizing the associated symptoms and reducing of dyspnoea and its related consequences.

This leads to an improvement of patients' quality of life, helping them recovering the ability to perform daily activities, and reducing the anxiety or depression associated with the disease.

Since respiratory rehabilitation at home is one of the best practice in post-operation, devices are easy to use and cost-effective and -most important- they provide indications of daily improvements.

MODULAR AND EASILY DISMOUNTABLE

The whole range of CA-MI incentive spirometers can be disassembled and disinfected to guarantee the best hygienic conditions between uses or patients. In fact, unlike other devices they have consumables that can be washed or replaced.

Moreover, to best suit every patient's condition, they are modular and combinable.
Thanks to a wide set of replaceable spare parts they are the ideal devices to use for more than a patient.

REHABILITATION

INCENTIVE SPIROMETERS

made in Italy

PULMOVOL 25/50
INCENTIVE SPIROMETER

SOFT INHALATION
Volumetric respiratory exerciser used to encourage SMI (Sustained Maximal Inspiration).

IMPROVES RESPIRATORY CONDITIONS
Strengthen respiratory muscles leading progresses in the respiratory functional parameters.

TARGET INDICATOR
Incorporates visual indicators of performance in order to aid the therapist in coaching the patient to optimal performance.

MODULAR
Can be connected with Pulmolift for a full inhalation/exhalation cycle.

HYGIENIC
Can be disassembled for cleaning and washing purposes to guarantee the best hygienic conditions between uses or patients.

MULTI-USER
Replaceable spare parts make it the ideal device to use for more than a patient at home or in hospitals.

THE BEST TREATMENT FOR VENOUS STASIS

Since their introduction, medical compression stockings constituted the treatment with **the largest impact on venous stasis**, becoming soon the most preferred conservative approach.

The **external counterpressure** provided by those stockings **improves blood's circulation** resolving in this way venous statis and avoiding at the same time the emergence of possible thrombosis.

Not only: the superficial and deep venous systems are affected so that also **overall blood volume improves**, enhancing the microcirculatory and tissue's condition.

Kàmila

Kàmila is the result of over 40 years of experience in the use of double-covered Lycra yarn.

All of the products exerts an effective decreasing compression from the ankle to the thigh, to promote proper venous outflow.

Kàmila range features **two main categories** of stockings (preventive and medical), both available in different **lengths, colors and sizes, all of them 100% made in Italy.**

Wide range of compression levels
Suitable for people who seek a simple distressing effect for their legs or to provide more effective treatment or in presence of minor circulatory pathologies.

Elegance and fashion
More than 30 elegant and renewed models in a great variety of colors for ladies and men.

High-quality yarns
Made with double-covering Lycra®, combined with the most innovative breathable yarns.

The right product for everyone
Each item reports both the weight of the yarn in denier (den) and the compression (mmHg) at the ankle level.

Designed for vascular pathologies
A range of products that meets specific needs such as therapies post-operative, cases of ulcers, post plaster cast and varicosity prophylaxis.

Durable
Pressure generated by the compression socks is guaranteed to remain constant for 6 months from the first day of use.

High-quality yarns
Safest non-toxic cotton or microfiber yarns.

3 classes of compression
In compliance with German classification to suit different therapeuthic indications, including varicose veins, deep venous thrombosis, chronic venous insufficiency, lymphoedema.

WEIGHT OF YARN	COMPRESSION	ACTION
40 den	9-11 mmHg	Light Massage
70 den	12-16 mmHg	Medium Massage
140 den	18-20 mmHg	Strong Massage

CLASS	COMPRESSION	MATERIAL
KKL I	18-21 mmHg	Microfiber / Cotton
KKL II	23-32 mmHg	Microfiber / Cotton
CL 2 (american)	30-40mmHg	Polyamide/Elastam/ Cotton
KKL III	34-46 mmHg	Cotton

BEAUTIFUL LEGS
PRESSOTHERAPY

Legs health & wellness
Reactivates circulation effectively, reducing water retention and minimazing cellulite imperfection.

Beauty or medical mode
Two treatment modes available: by alternating between compression and decompression it provides medical or beauty treatments improving lymphatic drainage and restoring circulation and venous activities.

Adjustable treatment duration
Patients can choose 10, 20 or 30 minutes according to their own conditions and/or medical prescription.

Completely customizable
Pressure range from 20 to 250 mmHg.
Each garment has 4 inflation chambers: during therapy they can be partially disabled.

Whole body treatment
9 different kind of cuffs to cover the entire body.

MEDICAL SUCTION

Surgical suction units are medical devices used to remove surgical fluids, tissue, gases and bodily fluids by sucking the material through a cannula into a collection jar.

Thanks to it's thirty-years experience, CA-MI designed a complete line of high-quality vacuum solutions combining reliable suction power, ease of use and handling.

CA-MI suction units can be devided in three main categories to suit different needs and settings such as wards, theaters, ambulances, home-care etc.

CATEGORIES

Desk-type
Portable suction units with reduced size and weight that can be easily displaced. Trolley on castors available as an option.

Battery-operated
Suction units that besides standard operation by mains have autonomy by internal rechargeable battery.

On-castors
Professional suction units on antistatic castors, offering a great choice of accessories for various applications.

SUCTION

SURGICAL SUCTION UNITS

made in Italy

DESK-TYPE /
BATTERY OPERATED MODELS

ANTIBACTERIAL/HYDROPHOBIC FILTER
Single-patient filters to avoid cross contaminations and liquid passage to the pump.

LIQUID COLLECTION JAR
Single or multiple containers in different sizes and materials, reusable or disposable. Provided with cover and overflow valve system.

VACUUM REGULATOR
Manual knob/digital keys for accurate adjustment of vacuum levels.

VACUUM GAUGE
Analogic display in different diameters with graduated scale in mmHg and kPa (interval by 5).

ON/OFF SWITCH
Mechanical or digital switch.

CONICAL CONNECTOR
Different diameters to connect any type of cannula.

ON-CASTORS MODELS

MPR SYSTEM (MULTI-PURPOSE RAIL)
Easy interchange of CA-MI accessories, such as rings of various diameters to accommodate jars, safety trap bottles, cannula holders or a standard medical rail where to hook any accessory by means of standard clamps.

SAFETY TRAP BOTTLE
An additional protection of the pump besides the overflow valve system inside every jar.

HANDLE
for easy displacement

REAR COMPARTMENT
for accessory storage.

4 X TWIN ANTISTATIC CASTORS
Ø 75 mm with brakes with 360° swivel.

FOOT-SWITCH PEDAL
for intermittent or continuous use.
