

Street LED light Spectra 30W

Spectra LED street light is designed for lighting streets, parking lots, courtyards and other outdoor spaces. The design is similar to a leaf, the luminaires in this series have taken the same name - Spectra.

Unlike conventional lamps (halogen, mercury, gas discharge, etc.), Spectra LEDs have low energy consumption and high luminous flux, ensuring uniform light distribution over large areas.

The light emitted allows true colours to be perceived, even at night. All mounting and fixing mechanisms are standard, allowing quick replacement of conventional street lamps.

Spectra LED luminaires are made of environmentally friendly materials, without lead, mercury or other substances harmful to our health.

Specification

Description	
Length	330 mm
Width	150 mm
Diameter	40 mm
Lighting Power	30 W
Number Of Lumens	3967 Lm
Warranty	36 month
Voltage	230 V
Protection	IP 65
Work Resource	50 000 H
Color	Gray
Compositions	Aluminium / Glass
LED Type	SMD 3030

Application

Landscape

Square

Parking

Architecture

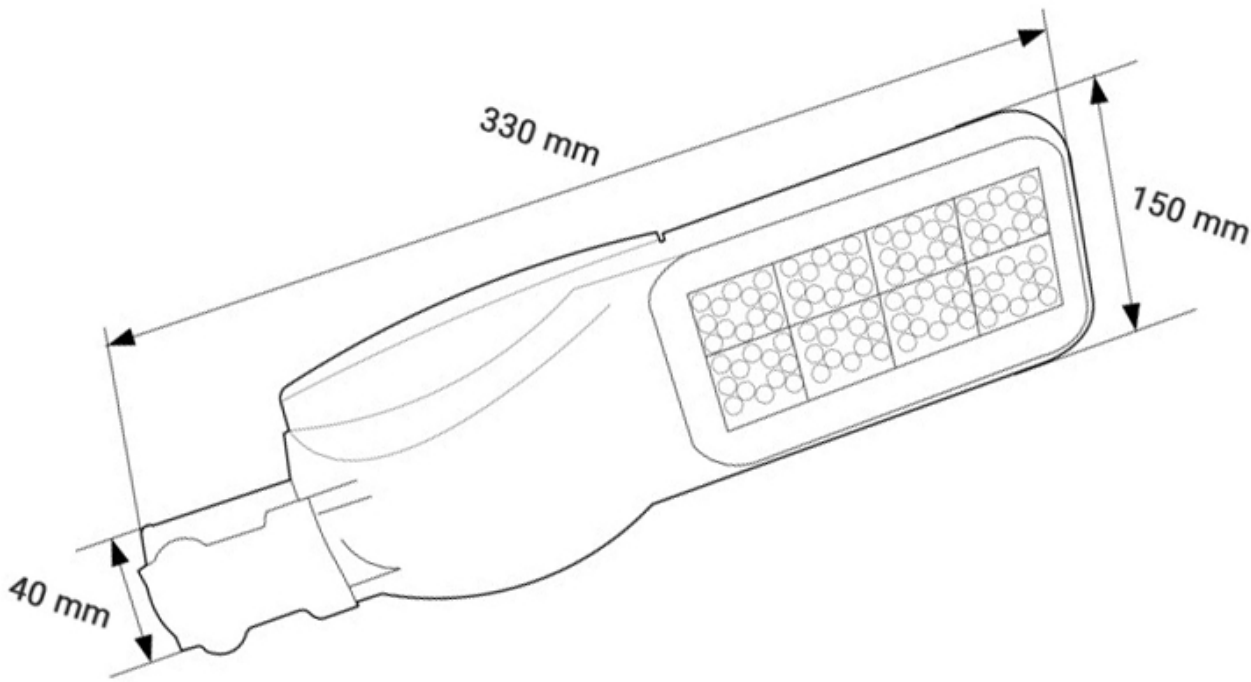

Road

Stadium

Dimension

Photometric Data
