To Whom It May Concern:

RE: Baboglo Oleksandr & "Tochka Rosta" SRL

Baboglo Oleksandr and his team at "Tochka Rosta" have utilized mobile traffic routing, analytical and reporting software solution to custom build a flexible and easy to use processing module for us that fits our model of business.

The new module integrates seamlessly with Affise, Affilistest and FraudScore and has streamlined our sales process and allowed us to better manage our traffic and workflow, increase income and work more efficiently. Oleksandr and his team worked with us to thoroughly understand our requirements and have produced an elegant and innovative solution. They were flexible in their approach and delivered on time and on budget. Subsequent to finishing the development process there support and resolution of any bugs we uncovered has been quick and reliable. I would have no hesitation in recommending them to anyone considering of developing and implementing software solutions.

Yours sincerely  
Orkhan Osmanov
