Dear Yulian,

Good day! We are moving forward with the third-party clinical report for D-RPR100.

Our R&D team has confirmed that the report will be generated using the TRUST method (with a local registered reagent as control).

For your reference, TRUST is clinically equivalent to RPR – they share the same principle, clinical indications, and diagnostic value; only the coloring indicator differs.

Given that the control reagent used holds a valid Chinese registration certificate, this report will be fully compliant for regulatory submission.

Please let us know if this meets your expectations. We are happy to proceed or adjust based on your preference.

Looking forward to your confirmation.

Best regards,

Zoey

Dear Yulian,

Thanks for your reply.

Currently I am not sure about how long it will take, but we will proceed it asap.

Many thanks.
