To whom it may concern

Dear Ladis and Gentlemen,

First of all, we would like to express our respect and would like to thank you for our long and on-going cooperation.

Herewith we would like to inform you that the expected lifetime of the i10c series endoscopes' LED lamp is as long as the endoscope (~6 years) depending on workload and care. LED lamps have a brightness level of 70% after 42.000 hours.

We would be grateful to provide any additional information, if it is needed.

Sincerely yours

Andrey Cherkasskiy
Marketing and Business Development Manager Russia & CIS
