OPTIPLEX 3090 TOWER, SMALL FORM FACTOR AND MICRO

Business desktops with streamlined performance and essential manageability options to drive maximum value.

Discover professional class desktops at www.dell.com/OptiPlex

1. Offering may vary by region. Some items may be available after product introduction. For complete details, refer to the Technical Guidebook published on www.dell.com.
2. System Memory and Graphics: Significant system memory may be used to support graphics, depending on system memory size and other factors.
3. 4GB or Greater System Memory Capability: A 64-bit operating system is required to support 4GB or more of system memory.
4. Particular versions of Microsoft Windows may not support the full Bluetooth 4.2 functionality
5. Storage: GB means 1 billion bytes and TB equals 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less.
6. PSU: This form factor utilizes a more efficient Active Power Factor Correction (APFC) power supply. Dell recommends only Universal Power Supplies (UPS) based on Sine Wave output for APFC PSUs, not an approximation of a Sine Wave, Square Wave, or quasi-Square Wave (see UPS technical specifications). If you have questions please contact the manufacturer to confirm the output type.
7. TPM is not available in all regions.
8. Absolute™ Data & Device Security: An Absolute™ offer. Some conditions apply. Terms and Conditions at www.absolute.com/legal
9. For complete listing of declarations and certifications, refer to the Dell Regulatory and Environmental Datasheet found in the Manuals section of Product Support information at www.dell.com/support/home/us/en/19
10. Please refer to www.epeat.net for specific country registration rating and participation.
11. Limited Hardware Warranty: For copy of Ltd Hardware Warranty, write Dell USA LP, Attn: Warranties, One Dell Way, Round Rock, TX 78682 or see www.dell.com/warranty
12. Onsite Service after Remote Diagnosis: Remote Diagnosis is determination by online/phone technician of cause of issue; may involve customer access to inside of system and multiple or extended sessions. If issue is covered by Limited Hardware Warranty (www.dell.com/warranty) and not resolved remotely, technician and/or part will be dispatched, usually within 1 business day following completion of Remote Diagnosis. Availability varies. Other conditions apply.
13. Dell Services: Availability and terms of Dell Services vary by region. For more information, visit www.dell.com/servicedescriptions

USB/Bluetooth® smart speakerphones

What is the Poly Sync Family?	The Poly Sync Family is a new range of USB/Bluetooth® smart speakerphones designed for personal, huddle and small conference use. The family includes the Poly Sync 10, Poly Sync 20, Poly Sync 20+, Poly Sync 40, Poly Sync 40+ and Poly Sync 60 models.
What makes them smart speakerphones?	The Poly Sync Family provide more than just remarkable audio—they include numerous smart features making them easy to use. Features include private/shared Bluetooth modes (Poly Sync 40, Poly Sync 40+ and Poly Sync 60), a programmable button, the ability to charge smartphones, and a talker tracking meter (Poly Sync 60 only).
Do the Poly Sync 10, Poly Sync 20, Poly Sync 20+, Poly Sync 40, Poly Sync 40+ and Poly Sync 60 replace any existing products?	The Poly Sync 10, ideal for the home office, will replace the Calisto 3200. The Poly Sync 20 and Poly Sync 20+ are portable personal speakerphones that will replace the Calisto 5200. The Poly Sync 40 and Poly Sync 40+ are huddle room speakerphones and will replace the Calisto 7200. The Poly Sync 60 is a new addition to the portfolio and is designed for the small conference room.
What makes the Poly Sync Family stand out?	The Poly Sync Family has been designed with remarkable audio for both ends of the call ensuring nothing is missed and meetings stay productive. They are easy to use, have a consistent user interface, and users bring their own devices so meetings start quicker without IT help.
What is the difference between a 360-degree microphone and a microphone steerable array?	Compared to traditional USB speakerphones with a single 360-degree microphone that picks up sound from all directions—the Poly Sync Family uses a two-microphone array (Poly Sync 10), three-microphone array (Poly Sync 20, Poly Sync 20+, Poly Sync 40 and Poly Sync 40+) and six-microphone array (Poly Sync 60) that can be steered (directed) towards the talker as they move around the room — and hence focuses on the talker and not the noise that may be in the room.
What is a bass reflex system with dual passive radiators?	The bass reflex systems use a hole in the Poly Sync speakerphone enclosure to enable sound from the rear of the speaker diaphragms to increase the low frequency response compared to a sealed enclosure. The passive radiators further enhance the low frequency response by adding passive diaphragms, making voice and multimedia sound more natural.

How does the Poly Sync Family connect to computer and smartphone?

The Poly Sync 10 has an integrated USB-A cable and included USB-C adapter. The Poly Sync 20 and Poly Sync 20+ have an integrated USB-A cable with a USB-C adapter included. The Poly Sync 20+ can also wirelessly connect to the computer via the included BT700 USB adapter. Connection to the smartphone is via Bluetooth®. The Poly Sync 40, Poly Sync 40+ and Poly Sync 60 have a single USB cable with both USB-A and USB-C connectors. For wireless connection to the computer a BT700 Bluetooth adapter can be ordered separately. Connection to the smartphone is via Bluetooth.

How is the Poly Sync Family different to the Poly Trio Series of conference phones?

The Poly Sync Family of USB USB/Bluetooth speakerphones are for users that bring their own conferencing device into the meeting room to use with conference/UC applications such as Microsoft Teams and Zoom. The Poly Trio Series are always-on open SIP conference phones.

What function can be chosen for the programmable button on the Poly Sync Family?

The Poly Sync 20, Poly Sync 20+, Poly Sync 40+, Poly Sync 40 and Poly Sync 60 include a programmable button that can be configured for one of several different functions, including: last smartphone number redial, play/pause media streaming from smartphone, system status check, etc.

Are the Poly Sync 10, Poly Sync 20, Poly Sync 20+, Poly Sync 40 and Poly Sync 40+ portable devices?	The Poly Sync 10 is lightweight and small, so it can be taken with you, but always needs a USB connection to a laptop to work. The Poly Sync 20 and Poly Sync 20+ have been designed as portable devices that are battery operated and include a carry case and lanyard. The Poly Sync 40 and Poly Sync 40+, which is larger, are also battery-operated devices that can be moved around the room to the optimum location but do not include a carry case.
Can a smartphone be charged from the Poly Sync Family of speakerphones?	The Poly Sync 20, Poly Sync 20+, Poly Sync 40 and Poly Sync 40+ include an internal battery and USB socket that can be used to charge a smartphone. The Poly Sync 60 is AC powered only by a power socket and includes two USB ports for charging up to two smartphones during meetings.
Which UC applications and platforms are the Poly Sync Family compatible with?	The Poly Sync Family connect to user devices via either USB or Bluetooth and are compatible with the applications running on these devices. Microsoft Teams versions are also available and feature a dedicated Teams button for instant access of the Microsoft Teams desktop application.
Does the Poly Sync Family include the BT700 Bluetooth adapter to allow wireless connection to the computer?	The Poly Sync 20+ and Poly Sync 40+ include the BT700 USB adapter. For the Poly Sync 20, Poly Sync 40 and Poly Sync 60 the BT700 USB adapter can be purchased separately as an accessory. All models in the Poly Sync Family can connect to the computer via the included USB cable. Only the Poly Sync 20, Poly Sync 20+, Poly Sync 40, Poly Sync 40+ and Poly Sync 60 can also connect to a smartphone via Bluetooth.
