

Aluminium modular shelving unit with polymer solid shelves

Our aluminium modular shelving units with polymer solid shelves are easy to clean and are designed for enhancing air circulation.

Description

Our aluminium modular shelving units with removeable polymer solid shelves are easy to clean and are designed for enhancing air circulation. All shelves are designed so you can just remove an individual shelf for cleaning.

Each unit bay is supplied with 4 shelves as standard but each unit can hold up to 10 shelves, ensuring that you will find a unit suitable for your storage needs. Additional shelves sold separately. Support points every 150mm make the shelving positions very flexible. You can even build a corner unit using hooks (2 per shelf), without any uprights needed. Units over 1500mm feature 3 uprights (1 in the centre).

Further, the poly shelves are dishwasher proof and suitable for cold stores, with its ability to withstand temperatures from -30 to +90 degrees.

The maximum payload per unit is 600kg (225kg mobile). With individual shelf loading for under 1000mm width: 150kg and over 1000mm width: 100kg .

It comes with floor levelling adjustable feet to help compensate for any unevenness in the work area. Stainless steel castors are available but they are designed to facilitate the movement of the shelving units for cleaning purposes, rather than for transportation.

Mobile only available up to 1500mm width.

Dimensions:

- Width: 600/1000/1200/1500/1975mm
- Depth: 400/500/600mm
