

Cannula Fixation Dressing, non-woven material

Breathable sterile fixation plaster for secure fixation of I.V. cannulas in veins. The absorbing pillows (2 x 2,2 cm) guarantee effective absorption along the cannula. The I.V. point of puncture is optimally protected against infections. A plaster pillow enclosed decreases pressure from the cannula. The plaster is air- and watertight.

Waterproof:	No
Kind of adhesive:	Acrylate adhesive
Sterile:	Yes

Art.no.	Length	Width
