3 Megapixel 21.3" Monochrome Monitor

MS-S300

Improved Diagnostic Visibility

MS-S300 comes with 1,000 cd/m² calibration to make it the best solution for diagnostic imaging of DR, CT, MRI etc. The brighter screen dramatically increases the number of perceptual grayscale steps to improve visibility of structures. PACS diagnostic reading will be much more efficient.

Independent Sub-pixel Drive Technology

This unique technology enables MS-S300 to render 9 mega sub-pixel images, exceeding the current standards for primary breast image diagnosis. MS-S300 is cleared for FDA 510(k) for the use of digital mammography and breast tomosynthesis.

*Customized viewer is required

*Independent Sub pixel Drive technology is built in MS series only
