ABOUT ECOVADIS

EcoVadis provides the leading solution for monitoring sustainability in global supply chains. Using innovative technology and sustainability expertise, we strive to engage companies and help them adopt sustainable practices.

Our Mission

To reliably assess companies' sustainability performance, providing them with comprehensive feedback, benchmarking and tools allowing them to embark upon a journey of continuous improvement.

Our Expertise

- Sustainability: our team of international sustainability experts analyze and cross-check companies' data (supporting documents, 360° Watch Findings, etc.) in order to create reliable ratings, taking into account each company's industry, size and geographic location.
- Innovative technology: we offer access to web-based solutions, where companies can access their EcoVadis Scorecard and share information. These are highly secure online solutions which guarantee the safety of our users' data.

Our Methodology

The EcoVadis methodology is based on international sustainability standards (Global Reporting Initiative, United Nations Global Compact, ISO 26000), and supervised by a scientific committee of sustainability and supply chain experts to ensure robust and fair sustainability assessments.

Our Users

- Thousands of companies use the EcoVadis Ratings platform every month to respond to sustainability issues raised by their customers, set and maintain corrective action plans and centralize sustainability-related documents.
- Over 700 multinational companies use EcoVadis to monitor the sustainability performance of their suppliers and subcontractors.

CDP SCORE REPORT - CLIMATE CHANGE 2022

CATEGORY SCORES

If a company scored C or below, they will not have been scored for Management or Leadership points (the dark purple line represents this).

Please download the [CDP Scoring Introduction](#) for more information.

CATEGORY SCORES BENCHMARKING

Each category score in the bar chart represents the progression within each scoring level. Some categories have not been included for category score breakdown as either not enough questions feed into these categories to give a representative score or they are not scored at Management and Leadership levels.

Some categories are groupings of questions by topic. They are sub-groups of the 2022 questionnaire modules and are consistent across all sectors. Weighting applied to each category varies across sectors to highlight the areas most important to environmental stewardship in specific sectors.

Find out more about category weightings.
