

Contract SR-DW-02 Rehabilitation of Potable Water Network in Soroca Moldova

Letter of Recommendation

The company SRL Fedion-Com were awarded a contract for the Rehabilitation of Potable Water Network in Soroca on the 21st June 2013 and commenced work in the city within a few weeks following mobilisation.

The Contract proved extremely difficult to deliver due to difficult working conditions including a constant change of priority from the municipality and continued working when payment for services not included in the contract were under dispute. Despite these issues the contract has been finalised to the quality acceptable to the Engineer and to local regulations and providing the necessary improvements to the potable water network in the City of Soroca Moldova.

As Engineer to the Contract I would without hesitation recommend Fedion-Com for any urban or rural infrastructure works.

William Payne Project Team Leader

Yours Faithfully
