AEGEAN REGION CHAMBER OF INDUSTRY		<b>TURKISH UNION OF CHAMBERS AND EXCHANGE COMMODITIES</b>		Report Date :06.03.2020	
		<b>CAPACITY REPORT</b>		Report No :2020/355	
		Date of Expiration			
		<b>09.03.2022</b>			
Company Title : BMC OTOMOTIV SAN.VE TIC.A.S.-IZMIR PINARBASI BRANCH		Industry Registration No : 625608		Chamber Registration No : 22646	
Registered Brands : BMC		Tax Office /ID : Atışalanı T.O. / 3770439888		Trade Registration No : 177309	
Workplace SSI No/ : 229100101152451303588-05				Activity Code (NACE) : 29.10.01	
MERSIS No : Place of Production : Address : Kemalpaşa Caddesi No:288 Pınarbaşı BORNOVA / IZMIR Workplace Tel (Code): 232-4771800 e-mail : e-mail: mehmet.ugurlu@bmc.com.tr		Fax : 232-4771877 Web: www.bmc.com.tr			
Corporate Office : Address *Sanayi Mah. Teknopark Bulvarı No:1/4C İç Kapı No: 301 PENDİK / İSTANBUL		Office Tel (Code): 0212-4380435		Fax : 0212-4380435	
Production Subjects : Heavy Commercial and Military Vehicles, Tanks and Derivatives (tracked armored combat vehicles with military equipment), Tracked Armored Combat Vehicles and Personnel Carriers.					
<b>Status of the Production Facility</b>		<b>Status of Capital Assets (TRY)</b>		<b>Personnel Status</b>	
Owner : Land (m2) : 148.012 Total Covered : 127.366 Field (m2) : Building Construction Type: REINFORCED CONCRETE-STEEL CONSTRUCTION		Machinery and Equipment Value : 498.623.786 Registered Capital : 2.206.352.023		Engineer : 420 Technician : 72 Foreman : 38 Worker : 1165 Adm. Staff : 271 Total : 1966	
Start Date of Production Activity : 14.10.2010					
<b>Foreign Capital</b>		<b>Intangible Rights</b>			
Country Ratio (%)		Patent Know How License Country Absent Absent Present United States of America			
Certificates : Device Laboratory, Treatment Plant, R&D Unit, ISO 14000 Certificate, Discharge Permit, CE, Other Documents: ISO 9001					
This capacity report, covering the theoretically calculated maximum production capacity and consumption capacity of the existing machinery and equipment in the workplace of the company with the title written above was prepared by us on 05.03.2020.					
REPORTED BY Başak KARAÖZ Officer Signature		1 <sup>st</sup> EXPERT ŞÜKRÜ ŞENTÜRK Mechanical Engineer Signature		2 <sup>nd</sup> EXPERT

**TABLE : III CAPACITY ACCOUNT (Purpose of the report : Renewal)**

The company manufactures Assorted Heavy Commercial and Military Vehicles, (Trucks, Light Trucks, Tow Trucks, Fire Trucks, Wheeled Tactical Vehicles, Wheeled Armored Vehicles, Aircraft Fuel Oil Supply Vehicles, Rescue Vehicles, Vehicles with Various On-Vehicle Equipment etc.) Tank and Derivatives (tracked armored combat vehicles with military equipment) and tracked armored combat vehicles and personnel carriers.

**MAIN PRODUCTS MANUFACTURING CAPACITY:**

**1. Heavy Commercial Vehicle Assembly Line : (21,74 pcs/day capacity)**

Total number of main assembly stations : 25  
Critical main montage station: Mounting the cabin to the frame  
Total workload of the critical station : 39,99 min/pcs  
Cycle time of the critical station at complete capacity : 22,079 min/pcs

**Line capacity:**

$480 \text{ (min/day)} / 22,079 \text{ (min/pcs)} = 21,74 \text{ (pcs/day)}$   
 $21,74 \text{ (pcs/day)} \times 300 \text{ (day/year)} = \mathbf{6.522 \text{ (pcs/year)}}$

**Necessities:** Presented in Table IV.

**2. Defense Industry Assembly Line : (10 pcs/day capacity)**

Total number of main assembly stations : 12  
Critical main montage station : Installation of weapon tower electrical works in the vehicle  
Total workload of the critical station : 995 min/pcs  
Cycle time of the critical station at complete capacity : 48 min/pcs

**Line Capacity:**

$480 \text{ (min/day)} / 48 \text{ (min/pcs)} = 10 \text{ (pcs/day)}$   
 $10 \text{ (pcs/day)} \times 300 \text{ (day/year)} = \mathbf{3.000 \text{ (pcs/year)}}$

**Necessities:** Presented in Table IV

**3. Motor Assembly Line: (73,3 pcs/day capacity)**

Total number of main assembly stations : 15 pcs (Truck)  
Critical main montage station: Rocker mounting valve setting  
Total workload of the critical station : 20,69 min/pcs  
Cycle time of the critical station at complete capacity : 6,55 min/pcs

**Line capacity:**

$480 \text{ (min/day)} / 6,55 \text{ (min/pcs)} = 73,3 \text{ (pcs/day)}$   
 $73,3 \text{ (pcs/day)} \times 300 \text{ (day/year)} = 22.000 \text{ (pcs/year)}$

**Necessities:**

Necessities are presented in Table IV being proportioned to the unit product.

Critical material need calculation for the main and by products with abovementioned capacities:

**DKP Black and cold rolled sheet:**

=> Truck driver's cab and other sheet parts  
 $6.522 \text{ pcs/year} \times 241 \text{ kg/pcs} = 1.572 \text{ ton/year}$   
=> Truck frame

Approved by TOBB on 09.03.2020 with the number 8837. Valid until 09.03.2022.  
Page 14/40

Industry Unit Assistant Specialist

  
OTOMOTIV SAN. ve TIC. A.Ş.

  
**Mehmet BALÇILAR**  
Yeminli Tercüman - Translator Under Oath  
Türkmençe Tasdikçisi - Translator Juror

6.522 pcs/year X 440 kg/pcs = 2.870 ton/year  
Total= 4.442 ton/year

**LPG Liquid Petrol Gas:**

1. Burners used in production (according to the average capacity of the burners)  
37,5 kg/hour X 8 hour X 300 day/year = 90.000 kg/year

2. For heating need (according to the average capacity of the burners)  
75,83 kg / hour X 8 hour X 300 day/year = 182.000 kg/year

1.+2. = 272.000 kg/year

LNG Liquid Natural Gaz :

1. Burners used in production (according to the average capacity of the burners)  
216,6 kg / hour X 8 hour X 300 day/year = **520.000 kg/year**

**Diesel fuel:**

1. Motor Test Workshop Consumption

A. 2.25 hour x (50 BG x 0.180 kg/BG) / (0.73 kg/liter) = 27.7 liter/motor

27.7 liter/motor x 10.000 pcs/motor/year = 277.000 liter/year

B. 2.25 hour x (15 BG X 0.180 kg/BG) / (0.73 kg/liter) = 8.3 liter/motor

8.3 liter/motor x 12.000 pcs/motor/year = 99.750 liter/year

A+ B = 376.750 liter/year

2. Need for diesel fuel to be put to produced vehicles

9.849 vehicle/year x 25 liter/vehicle = 246.225 liter/year

3. Need for service vehicles

108 vehicle x 7,33 liter/day x 300 day/year = 237.492 liter/year

4. Diesel fuel burners used in production: (according to the average capacity of the burners)

27,6 liter/hour X 8 hour/day X 300 day/year = 66.240 liter/year

5. For heating need: (according to the average capacity of the burners)

44,6 liter/hour X 8 hour/day X 150 day/year = 53.520 liter/year

Total (1+2+3+4+5) = **980.227 liter/year**

Other necessary materials specified in Table IV have been calculated based on actual consumptions up to now and applying the 8 hour/day, 300 day/year capacity utilization.

**TANK AND DERIVATIVES PRODUCTION CAPACITY**

Total number of assembly stations : 45 pcs

Critical main montage station: Laser cutting

Total workload of the critical station (mean) : 24.480 min/pcs

Cycle time of the critical station at complete capacity: 1.920 min/pcs

Line capacity:

(60 min x 8 h) 480 (min/day) / 1920(min/pcs) = 0,25 (pcs/day)

Approved by TOBB on 09.03.2020 with the number 8837. Valid until 09.03.2022.

Mehmet BALÇILAR  
Yeminli Tercüman - Translator Under Oath  
Traducteur Assermenté - Traductor Jurado

Total Capacity: 0,25 pcs/day x 300 day/year = 75 pcs/year

75 pcs/year x 30.000 kg/pcs = 2.250.000 kg/year

**Necessities:** Presented in Table IV.

**TRACKED ARMORED COMBAT VEHICLES AND STAFF CARRIERS:**

Total number of main assembly stations : 36 pcs

Critical main montage station: Laser cutting

Total workload of the critical station (mean) : 7.290 min/pcs

Cycle time of the critical station at complete capacity: 572 min/pcs

**Line capacity:**

(60 min x 8 h) 480 (min/day) / 571(min/pcs) = 0,840 (pcs/day)

Capacity: 0,840 pcs/day x 300 day/year =252 pcs/year

Product distribution: Tracked armored combat vehicles with military equipment and/or tracked armored staff and ammunition carriers and/or automatic/semi-loader, tower and firing control systems of these weapons and/or tracked armored mine detection and sweeping vehicles and/or unmanned land vehicles for military purposes.

Total capacity: 252 pcs/year

252 pcs/year x 15.000 kg/pcs = 3.780.000 kg/year

**Necessities:** Presented in Table IV.

Approved by TOBB on 09.03.2020 with the number 8837. Valid until 09.03.2022.

This capacity report contains the information determined by the chamber as of the date of appraisal and consists of 40 pages. It supersedes the company's capacity report, approved by TOBB (The Union of Chambers and Commodity Exchanges of Turkey) on 07.05.2019 with the number 15089.

Reviewed by:  
TOBB Directorate of Industry Efe AYDEN  
Mechanical Engineer

1. Capacity reports are prepared within the scope of the Procedures and Principles and criteria determined by TOBB.
2. These are the documents showing the theoretically calculated maximum production capacity of companies and the type and amount of raw materials and semi-products determined on average if this capacity is reached.
3. Unless otherwise stated, calculations are made by assuming that it is worked 8 hours a day and 300 working days per year and that all products in the report are being produced at the same time and continuously. Therefore, actual production/consumption types and quantities of companies may differ from the types and quantities in capacity reports. Shift working is not taken into consideration.
4. Records of capacity reports kept in the electronic environment in the Union are essential.
5. The expert committee is responsible for the accuracy of the information in this capacity report.

CHAMBER APPROVAL  Utku KILIÇER Industry Chief	APPROVAL OF THE UNION OF CHAMBERS AND COMMODITY EXCHANGES OF TURKEY  Müjdat BAYRAMOĞLU Metallurgy Engineer	APPROVAL OF THE UNION OF CHAMBERS AND COMMODITY EXCHANGES OF TURKEY DATE AND NUMBER  09.03.2020 * 008837  This capacity report shall be in force until the "Expiry date" determined by the Union on page 1.
