Lifetime surgical aspirator is designed to evacuate the fluid accumulated in the operated areas of the patients during the surgical operations and to be used in general surgery operations, gynecology, liposuction applications.

[📄 Product Catalogue](#)[📄 User Manual](#)

LED Electronic User Panel

It allows all settings to be made electronically on a single panel.

Electronic Jar Replacement

Unlike the manual jar changing system in other products, it is now much easier to replace the jar electronically with its special design.

Automatic Shutoff Valve

When the jar is full, the device automatically shuts itself off and prevents liquid overflows.

Electronic Foot Switch

Thanks to the electronic switch, it provides a more comfortable use to the user without touching the device during the operation.

Autoclavable Jar

Thanks to its autoclavable polycarbonate jars at 121 degrees, it provides hygienic use for many times.

Low Noise Level

With a sound level of 42 dB, it is one of the lowest among competitors. This feature provides a quiet use in operating rooms.
