

PRODUCT CARD

Special gloves Top Rescue model art. 61207 are designed for firefighting operations and similar operations, such as rescue operations. The gloves protect the hands against mechanical factors and against chemical agents, atmospheric factors, heat and flame. The gloves also protect the hands against moisture.

The palm part of the gloves is made of silicone-coated Kevlar fabric, which has very high resistance to cuts, punctures, tearing, abrasion and gives the gloves a very good grip.

The wrist part is made of aramid fabric. The Top Rescue model art. 61207 is finished with a cuff which is also made of aramid fabric. On the back part of the gloves there is a 3M reflective tape sewn on.

Inner layer: lining is made of material (felt and 100% Kevlar knitwear providing additional protection against mechanical and thermal hazards. Breathable and waterproof Eutotex membrane protecting the hand from moisture.

The gloves are manufactured in sizes (7;8;9;10;11;12;13)

Top Rescue firefighter gloves art. 61207 are made in accordance with EN 659+A1:2008. They have an EU type assessment certificate and a CNBOP approval certificate.
