Concerto™ 3D
Detachable
Coil System

Shaped around your patients.

You treat a variety of patients. They inspired our coils.

Treat more patients

- Treat multiple anatomies with the combination of complex and helical coils.
- Smoothly reach distal and challenging vessels thanks to the coil softness.¹

Treat them safely

The detachment system has a 99.7% success rate.¹

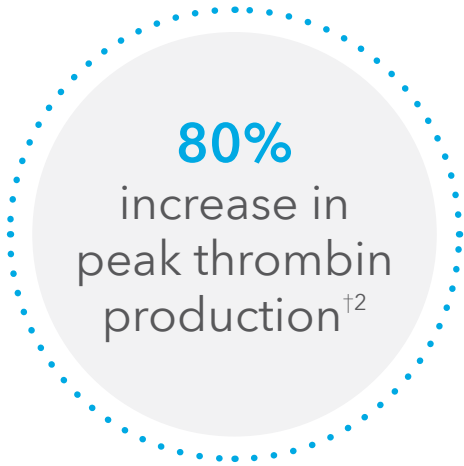

The microcatheter kickback is minimal with a soft distal pusher and 360° rotation of ball-and-socket design.¹

Concerto Helix Detachable Coil System

Soft coil with helical shape, allows dense packing.¹

Treat them faster

Fibers reduce the occlusion time, enhancing the mechanical action of bare coils.²

Concerto 3D Detachable Coil System

Conformable and
stable coil with
complex shape
for framing.

[†]Compared to bare coils. Percentages are calculated from the average of PGLA and nylon fibered coils.
