Hermalle Sous Argenteau, the 25<sup>th</sup> of September 2024

To whom it may concern

**Subject :** ISO certificate

WE, **Balteau-NDT S.A.** herewith declare and confirm the following:

Our Company does not hold an ISO 9001 certificate anymore but we have internal procedures in place to ensure a high quality production, service and supply. They are compatible with ISO standards and include for instance non-conformity cards, test reports and calibrations certificates.

Related to the Quality Certification of our products, we hold NFC74-100 certificates that are given by Bureau Veritas, the worldwide leader of Quality Control companies, with offices in 140 countries 74.000 employees and revenue of 4.689 billion Euros.

A certificate issued by such a company counts a lot when it comes to certify that our Industrial Radiography Systems are manufactured and satisfying very strict Quality Requirements according to NFC74-100 standards which include the most stringent conditions: not only the quality system management and technical documentation is approved but very strict tests are performed on the high voltage characteristics, the focal spot, the electromagnetic field influence, the beam homogeneity, the electrical safety and the operator's safety.

Our product quality directives are surely as effective as ISO 9001, for both the quality of our products and the satisfaction of thousands of customers in very demanding industries such as aeronautic, power plants, automotive and O&G companies worldwide.

Best regards

Pierre CORMAN  
Sales Director
