Silver Line

Pure Silver - pure performance in X-ray protection

The outside cover series Silver Line for X-ray protection clothes offers various functional advantages compared to the customary cover materials in the market.

The covering material REGO Silver Line consists of a material interwoven by fibres encased with pure silver.

The silver threads in the covering material have an antimicrobial effect which prevents the growth of odour-causing bacteria, thus pleasant, fresh smell is granted. Further this fibre has an anti-static and thermoregulating feature.

Fibre surface: no nanotechnology or complex chemical formula, just natural silver!

Available in three colours:
Navy-blue, green and bordeaux
