- Before operating this system, you should first thoroughly review the Instruction Manual.

Proactive Support to maximize your clinical outcomes

for Shimadzu Cardiovascular/Angiography systems

Like your patients' care,
we care for your systems.

Performance

Periodical inspection can ensure full system performance to meet your clinical needs.

Safety

Proactive service support by our professional service experts helps you to maintain your systems in exam-ready condition, and to keep your system up to date.

For radiation safety, optimum calibration in accordance with manufacturer's standards is essential.

Patient safety is always our number one priority.

Preventive

Our proactive approach to preventive maintenance is planned to maximize your systems uptime and to ensure optimal performance at all times.

A proactive approach helps your administration management or biomedical department to budget system maintenance life-time costs.

Proactive Service Support Program

Periodic Maintenance

- Our professional service experts visit periodically and inspect the system.
- Mechanical, electrical and safety checks are performed. Calibration is carried out whenever necessary to ensure optimal system performance.

Emergency Service Support

- Shimadzu local service centers provide rapid response times.
- On-call support is available for your emergency needs.

Parts Warranty Program

- A selection of parts warranty programs is available for you selection to manage your service needs and plan your running costs.

Remote Maintenance Service

The Shimadzu "Site-ViewBB" provides you with remote maintenance service.

- In the event of possible system errors, the Site-ViewBB automatically generates an alert message for proactive service support by our field service engineers.
- Some software updates can be performed by the Shimadzu Remote Maintenance Center through Site-ViewBB, further improving system uptime.
- Our system experts periodically analyse system log files through Site-ViewBB.

To meet today's clinical needs, Shimadzu Digital Cardiovascular/Angiography systems are equipped with a variety of state-of-the-art technologies like Flat Panel Detectors, High-speed digital imaging systems and multi-axis C-arm gantries etc.

Maximum system performance is ensured through a streamlined service network from the factory to our professionally trained field service engineers.
