

Cemad

Vertebral Radiopaque
Bone Cement

Cemad Vertebral Radiopaque Bone Cement

Cemad is a radiopaque, low viscosity and acrylic based (polymethylmethacrylate) bone cement. It contains a pouch with radiopaque powder sterilized by ethylene oxide and an ampoule with liquid sterilized by filtration.

Key Features

Reduced mixing time

Unique dynamic mechanical properties

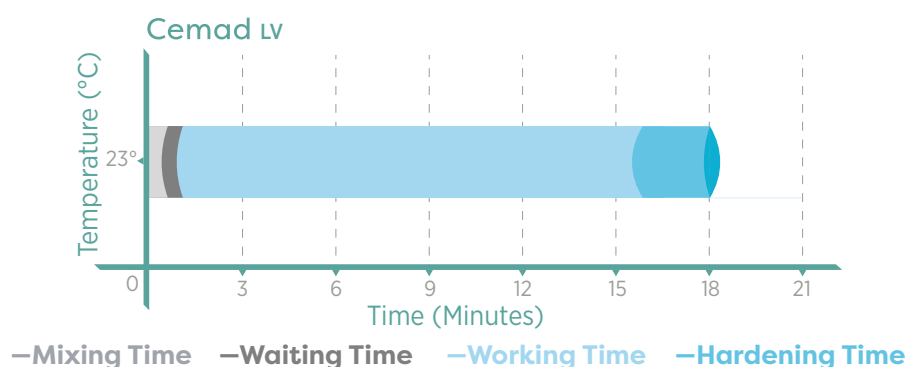

Excellent handling characteristics

Low viscosity

Ideal for minimally invasive surgery

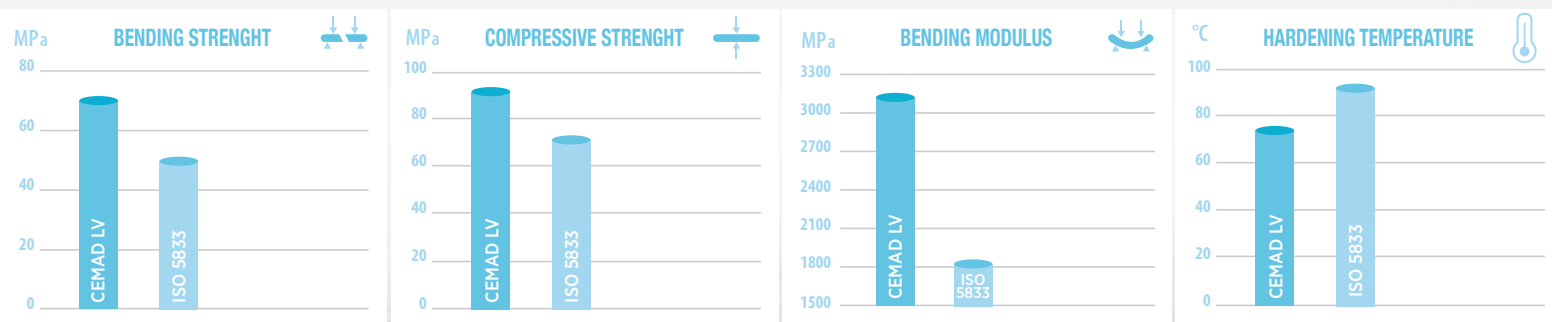

ISO 5833 standard

Working Time According to ISO 5833

Cemad Bone Cements are CE marked and complying ISO 5833 specifications.

Mechanical Properties According to ISO 5833
