Our company participate in major medical fairs. As NOVAMED, our products are exported more than 30 countries.

The Exclusive Advantages Of The Novamed Products

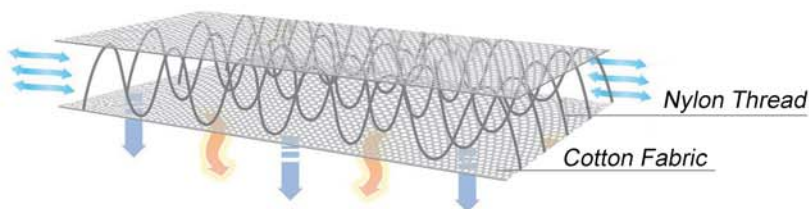

Neoprene; It is laminated with jersey and elastic terry cloth. Neoprene material has high durability and also provides ease of movement, and comfort heat by its elastic structure. Increased body temperature accelerates recovery process by improving the blood circulation.

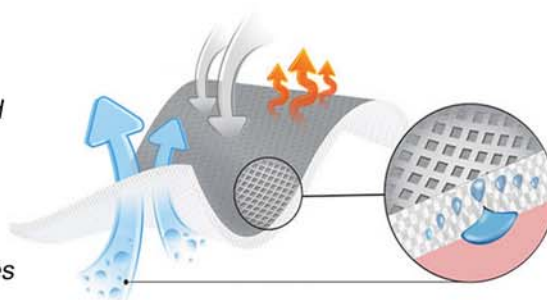

Between velcro sticky fabric and sweat absorbent cotton surface is sponge. Sponge fabric with high density provides the require stabilization by wrapping the body

It's flexible, and high air permeable cotton fabric. Flexible design wrap body to provide required support and comfort.

It's flexible, high air permable, moisture proof, and anatomically shaped special knitted fabric. With special knitting design it provives support for requirement parts of the body and does not the generate the pressure and tightnes feeling over joints zone. Fits perfectly to body and provides maximum comfort by its massage effects.
