采玉牙材
CAIYU DENTAL

- 纳米塑钢牙引进世界专业高端制造设备和高科技成型工艺
Nano tech tooth introduced the world professional high-end manufacturing equipment and high-tech molding process
- 使用自主研发的纳米级互穿网络聚合物和超微填料
Use of independent research and development of nanoscale interpenetrating polymer networks and superfine packing
- 独特设计的前牙切端和后牙的颌面加厚釉质层，具有高冲击性和高耐磨性
Unique design of the front teeth cut terminal and the maxillofacial thickening of the back teeth enamel layer, high impact and high wear resistance
- 基底层选用优质丙烯酸树脂材料组成，能够与基托树脂牢固结合
Acrylic resin base layer selection of quality materials, with the base resin solid combination
- 模仿天然牙的多层色结构、使层次达到完美逼真的效果
Imitation of natural teeth multilayer structure, make the levels reach perfect vivid effect

纳米塑钢牙
NANO-TECH TEETH
