

Wireless headset system

Clear and discrete team communication in cathlab and OR

The ultra-lightweight (36 g) headsets provide the easiest and most convenient solution for clear, calm and articulate team communication. Up to 30 users can be easily included

in the communication. The headset system provides a secure and hospital-approved communication path, free from any interference.

For a calm, focused working environment – greater efficiency and safety across the entire team.

Benefits

- Crystal clear communication between cathlab and control room
- Discrete audio communication between physicians and clinical staff, creating a better working environment, resulting in safer, more effective work flows and treatments
- Enables teams to talk hands free in the cathlab, OR and adjacent rooms, no raised voices, just clear calm communication

Features

- Perfect, digital voice quality
- Up to 30 users
- Ultra-compact and lightweight headsets (36 g)
- Wireless
- 2 headset user modes, hands-free or push to talk
- Battery powered, up to 13 hours talk time
- Simple system installation via plug-and-play
- Secure and hospital-approved communication way
- Audio input and output for e.g. livecase systems, integration platforms, remote EP communication, or remote proctoring
