HIFLY TIRES

Performance - Value

Shandong Hengfeng Rubber & Plastic Co., Ltd.

Company Profile:

Shandong Hengfeng Rubber & Plastic Co., Ltd., one of the major tire manufacturers in China, was established in 1995 and covers a land of about 2 square kilometers, with the total assets of over RMB 5 billion and more than 10000 employees. The company owns six plants in Dongying city and Linyi city of Shandong province in China. Three TBR plants with annual production capacity of 6 million tires, three PCR plants with annual production capacity of 24 million tires.

Hengfeng specializes in manufacturing radial tires widely used in passenger car, light truck, truck and bus etc. And in all seasons with excellent performance, which are well-reputed all over the world.

Hengfeng takes pride in its experience R&D team and advanced testing facilities, which assure the excellent and stable quality of its products. Many of Hengfeng's manufacturing equipments are imported from Europe, United States and Japan.

Hengfeng has built a strong quality assurance system and its products are accredited with certificates of ISO9001, TS16949, DOT, ECE, GCC, INMETRO, CCC, BIS, SNI, SONCAP, etc.

We export to more than 120 countries in the world

Features

Four wide circumferential grooves, lateral grooves with fine sipes and continuous block patterns on shoulder

Variable pitch tread design

Jointless Nylon Band

Silica tread compound

Rim protector

Benefits

▶ Provide efficient water evacuation, outstanding wet performance and enhanced stability at high speed cornering

▶ Superior comfort and quiet ride

▶ Improve tread stiffness and uniformity and deliver high speed stability

▶ Provide better performance on wet surface and reduce rolling resistance

▶ Protect wheels from curb damage

Stability

Continuous block patterns on shoulder reduce pattern deformation during driving with prompt response and enhanced stability at high speed cornering

Water Evacuation

Four wide circumferential grooves deliver efficient water evacuation and prevent aquaplaning

Lateral grooves with fine sipes provide outstanding wet performance

Jointless Cap-Ply

Jointless bead wire and high density nylon improve high speed stability & maximize steering response

Improve HIGH SPEED STABILITY

Multi-inner radius improves driving control while assuring performance at high speed

Improve CONTROL

Special rim protector protects wheels from curb damage

HIFLY TIRES

PROVIDE A QUITE COMFORTABLE AND SAFE RIDE

HF201

12-17 Inch Speed Rating: T-W
50-80 Series UTQG: 400AA

Features

- Special tread compound
- Four wide circumferential tread grooves
- Continuous solid center ribs
- Improved groove and bead profile design
- Optimized variable pitch tread design

Benefits

- ▶ Excellent grip on wet and dry roads
- ▶ Deliver excellent performance on wet roads
- ▶ Improve directional stability, provide more comfortable experience and prevent irregular wear
- ▶ Better ride stability and handling performance
- ▶ Superior comfort and quiet ride

Features

Asymmetric Tread Pattern

Wide Circumferential Grooves

A Straight Rib Block

Silica Enriched Compound

Benefits

- Utilizes two distinct tread patterns that enable optimal dry traction combined with all-season capability
- Effectively evacuate water and significantly enhance slipping resistance for outstanding wet handling
- Applied to the outside of the tire's contact patch helps to prevent decrease road noise and increase cornering grip
- Provide superior traction and grip in wet and dry condition, Reduce rolling resistance

- High-density sipes with silica compound
- Variable pitch pattern and optimized footprint design
- Solid center ribs
- Jointless Nylon Band

Benefits

- Prevent aquaplaning with enhanced wet grip performance
- Deliver a smooth ride, lower noise and improve traction on dry and wet roads
- Superior comfort and quiet ride
- Provide steering stability and deliver a comfortable ride
- Improve tread stiffness and uniformity and deliver high speed stability

Features

- Asymmetric Pattern
- High grip silica compound
- Two straight & two semi zigzag longitudinal grooves
- Two types sipes

Benefits

- ▶ Multi-performance harmony for total balanced all season driving.
- ▶ Improved snow / wet traction and lowered rolling resistance.
- ▶ Reduced ground resistance enables a smoother flow over water and snow, ensure the best wet and snow traction performance.
- ▶ The application of summer and winter sipes allows the tire to possess high summer capabilities and winter capabilities.

65-75 Series

Features

- Balanced pattern design
- High grip silica compound
- Three zigzag grooves
- Optimised sipe sequence on all four ribs

Features

- Maximised for winter performance, boasts dry and wet performance on par with most summer tires.
- It provides excellent driving performance under all weather conditions. Improved snow / wet traction and lowered rolling resistance.
- To secure safety on wet roads, to satisfy both hydroplaning and snow performance
- For all surfaces from normal roads to rain and snow

HIFLY TIRES

EXCELLENT GRIP AND HANDLING
IN ALL WINTER CONDITIONS

WIN-TURI 212

13-18 Inch Speed Rating: T-H
40-80 Series

Features

- Outer longitudinal rib block design and inner lateral slots
- Silica tread compound
- Three longitudinal grooves
- Non-through block sipes

Benefits

- Enhance braking, cornering grip and the removal of water and slush
- Deliver superb traction and lower rolling resistance
- Improve water evacuation and stability in deep snow conditions
- Provide excellent grip, minimise the friction and reduce rolling resistance

Features

- Directional Winter Tread Pattern
- Optimized Tread Sipe
- Solid Center Rib
- Optimum Allocation Multi Random Stud Lines

Winter Traction Compound

Benefits

- Enhanced road contact and performance for snow and wet road conditions
- Enhanced acceleration and braking under winter conditions
- Improve handling when changing lane and cornering
- Improve traction performance on snow and ice and minimize stud noise
- Silica-rich compound give improved ice, snow and wet grip while maintaining performance in cold temperature

13-17 Inch Speed Rating: T-H

15-18 Inch Speed Rating: R-S

65-75 Series

Features

- V-Shape Tread Pattern
- Multi-Angle Sipe Positioning
- Sawtooth Center Rib
- Optimum Allocation Multi Random Stud Lines
- Winter Traction Compound

Benefits

- Enhanced snow traction performance through rigidity of the blocks
- Enhanced grip for braking on icy and snowy roads
- Increase stability, maintain even treadwear, and aid in acceleration and braking
- Improve traction performance on snow and ice and minimize stud noise
- Silica-rich compound give improved ice, snow and wet grip while maintaining performance in cold temperature

15-16 Inch Speed Rating: R
65-75 Series

Features

- Silica tread compound
- Large block tread design
- Zigzag grooves and high-density sipes arrangement
- Reinforced construction

Benefits

- Provide better performance on wet surface and reduce rolling resistance
- Enhance traction and handling in snow conditions
- Improve grip performance from wet and frigid surfaces to snow and ice
- Deliver robust load bearing capacity and rugged durability

HIFLY TIRES

STUDDABLE WINTER TIRE
FOR COMMERCIAL VAN

ICE-TRANSIT

12-16 Inch Speed Rating: Q-R

Series	Size	Ply Rating	Load Index	Speed Rating
LT	155R12	8PR	88/86	Q
	185/75R16C	8PR	104/102	R

Features

- High Void Directional Tread Pattern
- Multiple Sipe
- Three Sawtooth Main Grooves
- Winter Traction Compound

Benefits

- Help to maintain contact with the road in winter condition providing confidence in winter driving
- Improve grip power on snowy and icy road
- Deliver exceptional traction and control for winter driving condition
- Silica-rich compound give improved ice, snow and wet grip while maintaining performance in cold temperature

Tire Usage Tips:

1. Tire Tread Depth:

Change tyres before the tread depth is worn to 1.6mm. Make sure to regularly check the tread depth of tyres and replace them when they are worn. This will guarantee maximum traction and grip, helping avoid risk of aquaplaning and it will also affect the braking distance etc..

2. Tire Balancing:

Tires should be balanced when they are mounted on wheels for the first time or when they are remounted after repair. Tire balance should be checked at the first sign of a vibration or shimmy. Unbalanced tires cause vibration, which can lead to driver fatigue, irregular and premature wear, as well as unnecessary wear to the vehicle's suspension.

3. Tire Pressure:

Check the pressure of tyres, including the spare, monthly and before any long journey, preferably when tyres are cold. If they are hot, it is advisable to add 4-5 psi to the pressure recommended by the vehicle manufacturer. Correct tyre pressure reduces the risk of losing control of your vehicle. It also protects your tyres from premature wear and irreversible damage to the internal construction. Tyre pressure can drop due to small perforations, the natural escape of air through the tyre's components or even from a decrease in ambient temperatures. So it is important to check it once a month.

4. Wheel Alignment:

ENSURE SAFETY WITH CORRECTLY ALIGNED WHEELS AND AXLES

A vehicle is properly aligned when all suspension and steering components are sound and when the tire and wheel assemblies are running straight and true. If you notice uneven tread wear, this could be due to a misalignment and must be serviced by a professional. It's important to ensure correct alignment to get the best road handling, protect your tyres from irregular and / or rapid wear and save fuel.

5. Rear Tyres:

For optimum efficiency, regularly check the pressure and condition of your tyres, especially during tyre rotation as many vehicles specify different pressure on the front and rear axle.

FOR COMPLETE CONTROL, FIT YOUR NEW TYRES TO THE REAR AXLE.

Rear wheels are not connected to your steering wheel, which makes it extremely difficult to judge their grip while driving. So for your safety, always fit new, or the least worn tyres to the rear wheel positions to ensure:

Better control in emergency braking or tight corners.

Less risk of losing control of your vehicle, especially on wet surfaces.

Better road holding, particularly in difficult situations, whether your car is front or rear wheel drive.

6. Tire Repair:

Tire repairs should be carried out by a trained tire professional. Proper repair procedure will include dismounting the tire from the wheel for a thorough inspection to check for damage, and the use of a patch and plug to repair any punctures that fall within the limits and guidelines for repair.

7. Tire Rotation:

While many people are capable of rotating their own tires, it is quick, easy and secure to let a professional do it for you. Your vehicle's owner's manual will specify the proper rotation pattern and schedule for your vehicle. If a specific schedule is not indicated, it is a good rule of thumb to rotate your tires every 8,000 to 10,000 kilometers.

DECLARAȚIE DE ELIGIBILITATE

Către Cadastrul Bunurilor Imobile
(denumirea autorității/entității contractante și adresa completă)

Stimați domni,

Subsemnatul, reprezentant împuternicit al Eximotor SA,
(denumirea operatorului economic)

în calitate de ofertant, declar pe propria răspundere, sub sancțiunea excluderii din procedură și sub sancțiunile aplicate faptei de fals în acte publice, că nu mă aflu în una dintre situațiile prevăzute la art. 19 din Legea nr. 131/2015 privind achizițiile publice.

Mă oblig, la solicitarea autorității/entității contractante, în scopul verificării și confirmării declarației, să prezint orice document doveditor de care dispun.
