# CLEAR IDENTIFICATION OF CLEAN VERSUS CONTAMINATED ENDOSCOPES

**Know it's Clean at a Glance.** The CLEANSCOPE™ ADVANTAGE Transport and Short-term Storage System helps to protect your endoscopes by minimizing direct handling and reducing contact with airborne contaminants.

The long established design creates a protective environment for each disinfected endoscope. Green (clean) and red (contaminated) color-coded liners immediately identify clean versus contaminated scopes.

## OPTIMIZED ENDOSCOPE WORKFLOW

"Transport the soiled endoscope to the reprocessing area in a closed, puncture-resistant container that prevents exposing staff, patients, or the environment to potentially infectious organisms..."
