### PHAGO'LUX®

Educational and easy-to-use materials to control the application of standardised hand rubbing techniques with water-alcohol solutions or gels.

- The visual assessment of rubbing application techniques is a practical and effective way to increase the compliance rate.
- Proven technology, usable in all environments.
- The addition of the developer bottle allows for quick and easy implementation of the test.
- Two UV tubes produce optimal illumination conditions.

Available as: Phago'lux - Ref. 60477  
10 ml Visirub Twist off - Ref. 03221

*All of the holders are sold without the bottle.*

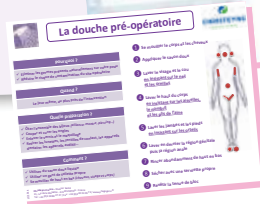

# HAND HYGIENE
