## INNOVATION

IN THE HOSPITAL MEDICAL SECTOR

## THE COMPANY

Our company was founded in **Abruzzo**, a region with a well-established tradition in the production of medical products.

The project was initiated in 2013 in response to the demand in the Italian market for a product capable of **reducing the risk of infections** in hospital settings and **facilitating liquid disposal operations** for healthcare professionals. Thus, we introduced a **cutting-edge product line** based on highly innovative **gelling powder**.

Our current **objective** is expansion: we aim to introduce our innovation not only in Italy but also on an **international scale**. We are prepared to collaborate with international partners to contribute to creating a **safer and more efficient hospital environment worldwide**.

## INNOVATION IN THE HOSPITAL-MEDICAL SECTOR

A revolutionary hospital product line with **absorbent and gelling powder**. By **simplifying the management of critical fluids**, we guarantee the **utmost safety** for operators and set a new standard in **hospital hygiene** and **infection prevention**.

### Operator comfort

The use of Angimed devices improves care operations, with no more emptying of pans or parrots and provision for washing. Operators will simply have to seal the disposable bags and dispose of them as unsorted waste.

### Infection prevention

The utilization of Angimed disposable devices aids in preventing contact infections by facilitating easy liquid handling and eliminating the risks associated with using devices that require washing under running water.

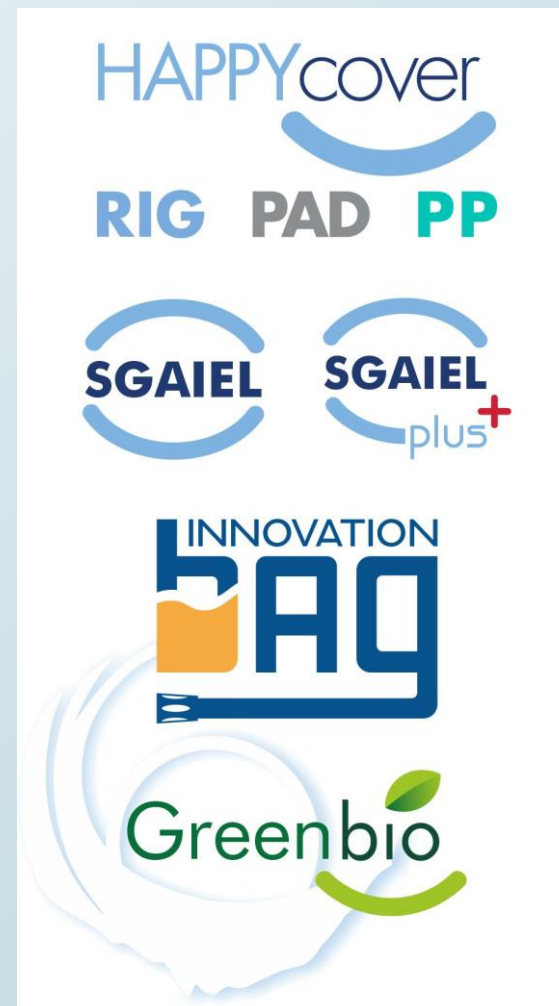

### Financial savings

Expenses related to disinfecting instruments such as bedpans and bedpan washers (including water, electricity, specialized detergents, and equipment maintenance) are entirely reduced.

## OUR BRANDS

- **HAPPY COVER-BAGS:** Vomit bags, urine bags, and bedpan cover bags designed for the convenient and safe management of waste. (**RIG-PAD-PP**)
- **SGAIEL LINE-** Powder containing the gelling SGAIEL molecule, available in 200g, 400g, and 1000g cans, as well as 1100g bags or sachets in sizes of 5g, 10g, 15g, 20g, 25g, and 50g.
- **INNOVATION BAG** - A secondary urine collection bag equipped with a universal connection for emptying primary catheter bags containing the gelling molecule.
- **GREEN BIO** - Our eco-friendly bags are made from biodegradable materials.

## OUR PRODUCTS

## INNOVATION bag

Urine bag - drainage system

**ANGIMED** is the exclusive manufacturing partner of the **INNOVATIONbag**. The innovative bag is covered by European Patent no. 3285703 and allows the urine bag and the different drainage systems to be emptied more easily and safely for healthcare professionals and patients.

## OUR MARKETS

### HOSPITALS

We have ideal products for different departments:

- Urology departments, infectious diseases, geriatrics, pediatrics, emergency rooms: bedpan covers, urine bags, vomit bags
- Operating rooms: powders with gelling technology for sprinkling on the floor
- Oncology department: vomit bag.

### NURSING HOMES

All our products are ideal for use in nursing homes, especially vomit bags, bedpan covers, urine bags.

### PHARMACIES

Our products are suitable for sale in pharmacies and are ideal for various situations, including caring for bedridden patients at home, for travel, managing incontinence, and promoting patient well-being.

## OUR PRESENCE IN EUROPE

Improving the quality of healthcare services by promoting safety and efficiency: this is the goal that Angimed aims to achieve in **national** and **international** markets, thanks to our ongoing work and dedication to research and collaboration with partners.
