

## SteriFeed Milk Safe

The SteriFeed Milk Safe is a practical, secure solution for **storing expressed breastmilk and special feeds in shared ward fridges**, especially in neonatal or maternity settings.

### Key Benefits of the SteriFeed Milk Safe:

#### Tamper Prevention & Security

Lockable storage reduces the risk of milk being tampered with or wrongly administered, crucial in busy hospital settings with multiple infants.

#### Parental Empowerment

Parents can safely participate in feed preparation and tracking, promoting bonding and involvement without compromising safety.

#### Controlled Access

Combination locks offer unique codes for each family, while a master key ensures staff can still access the milk if necessary, balancing access and oversight.

#### Hygienic & Compact

Designed for clinical settings, the units are easy to clean, fit neatly into fridges, and help with organised milk management.

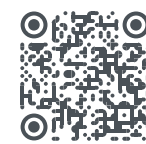

Milk Safe Dimensions: L 215.9 mm x W 155.2 mm x H 120 mm (Length including lock knob - 279.4 mm) & holds up to 12 x 50ml or 8 x 130ml SteriFeed bottles per Milk Safe.

### SteriFeed Milk Safe

500ml Re-usable Enteral Feeding Bottle in Tamper Evident Bag	50	14093/W	

\*Before implementing reusable bottles we strongly recommend discussing with your Infection Control Team to ensure any change in process or policy is aligned to: 2019 Guidelines for the Preparation and Handling of Expressed and Donor Breast Milk and Specialist Feeds for Infants and Children in Neonatal and Paediatric Health Care Settings. BDA-guideline-for-storage-and-handling-of-EBM-and-DBM section 6.6.21.

### SteriFeed Glass Breast Milk Storage Bottles

SteriFeed glass bottles are designed for safe, hygienic infant feeding in clinical and milk bank settings. Made from high-quality, medical-grade borosilicate glass, they offer excellent thermal resistance and durability. These reusable bottles are ideal for pasteurisation, storage, and feeding of expressed breast milk.

SIZES (MM)	UNITS	MEDICARE COLGATE CODE (MPC)	NHS PRODUCT CODE (NPC)
120ml Glass Bottles	54	15000/STERIFEED	
240ml Glass Bottles	54	15001/STERIFEED	

## ICS800 Induction Sealer

The latest innovation in breast milk and special feeds storage solutions.

This advanced induction sealer allows users to apply a secure foil seal to bottles of donor breast milk or special feeds prior to processing. By using this sealing system, bottles and caps can be fully submerged in the pasteuriser, ensuring that both the container and its contents are effectively treated during both the heating and cooling phases of the pasteurisation cycle. Importantly, this process aligns with World Health Organization (WHO) guidelines, which recommends the use of tamper-proof lids or seals for all prepared feeds in healthcare settings. The ICS800 provides added safety, hygiene, and confidence for milk banks and neonatal units, ensuring the highest standards in feed preparation and handling.

## S5 Sterile Bottles with Foil Seal – For use with ICS800 Heat Sealer

SIZES (MM)	UNITS	MEDICARE COLGATE CODE (MPC)	NHS PRODUCT CODE (NPC)
50ml Disposable Foil Seal Bottle in Bulk	200	14094
