VIRO CLEAN SYSTEM

Hydrogen Peroxide Diffuser Series:

VIRO2 CLEAN EASY/ VIRO CLEAN EASY

Product description :

Automatic hydrogen peroxide diffuser with single or double vaporizer for medical devices placed in contexts up to 2000 - 4000 m3.

Maximum dispensing capacity of 1 or 2 liters of product in 45 minutes (25 ml/min).

Computerized control system of cycles, liquid levels and possibility of traceability of cycles performed via USB port or wifi.

Intended use:

For the atomization of products for sanitizing and sanitizing medical devices in a limited environment.

Declaration of Conformity:

- THERE IS
- CND V07 - MEDICAL DEVICE CLEANING PRODUCTS NOT INCLUDED IN OTHER CLASSES
- Class I medical device: DM 2159868 - DM 2159857
- EN 60601-1: 2006 + A1: 2013
- EN 60601-1-2:2015
- ISO 13485:2016 PER03261A2101
- ISO 9001:2016 PER03261Q2102
- Compliant with the requirements of Regulation 745/2017.

Technical features:

- Double 1000 Watt CE electric turbine
- Rotation speed: 22,000 rpm RPM
- Fog exit speed 80-120 m/sec
- Average flow: 1250/2500ml/h
- Automatic shutdown and Portable device
- Size of the atomized particles smaller than 5 μ .
- Integrated programmer for automatic start of treatment
- Treatment traceability system with USB device and integrated software.
- Single-engine function and Hyper m3.
- Programmable disinfectant concentration: from 0.5 -1-2-5-10-15 to 20 ml/m3

Noise level:

- Min:79 / Max:86dB

Electrical characteristics:

Consumption: 2000W - 1000W

Single phase alternating voltages: 220 V/AC. 50HZ

Dimensions and Weights:

- Packaging: 60x44x42
- Weight: 8.1 - 10.5 kg (empty tank) / 9.1 -12.5 kg (full tanks).
- Machine: 43x32x37cm

Disinfectant product delivered in set:

- SUPRASPOR – Detergent and disinfectant liquid with 5% hydrogen peroxide and 10% ethyl alcohol for medical devices.

Registration number: Class IIb Medical Device n° RDM 2115296.

- Concentration of the disinfectant: from 0.5 –1 - 2 - 5 - 10-15-20 ml/m3

OPTIONS: systems equipped with APLK01 (extender with tube and adapter for biological hoods and sleeves)

- 1- VIRO CLEAN EASY K** - dedicated machine for the disinfection of analysis hoods and AHU hoods - for volumes up to 2,000 m3 and up to 1 liter of product
- 2- VIRO2 CLEAN EASY K2** - dedicated machine for the disinfection of analysis hoods and AHU - for volumes up to 4,000 m3 and up to 2 liters of product
- 3- VIRO2 CLEAN EASY K1** - mixed machine for disinfection of analysis and AHU hoods and for different uses. For volumes up to 2,000 m3 and up to 1 liter of product by type of use.
