- Entity Framework,
- NHibernate,
- DataObjects.net;
- Sql Server,
- MSSQL,
- MySQL,
- PostgreSQL,
- MS Access;
- mongoDB.

Job-related skills:

Programming Languages:

- C#;
- SQL;
- T-SQL;
- LINQ;
- JavaScript;
- XML;
- HTML;
- CSS;
- PHP.

Web Services:

- WCF;
- WCF Data Services.

WORK EXPERIENCE

11.2017 – Present .Net back-end developer

Indrivo SRL

Mihail Kogilniceanu 51/1, Chisinau (Moldova)

www.indrivo.com

Main activities and responsibilities as .Net back-end developer:

- Software application design, database analysis, requirements analysis without final product, functional analysis;
- Coherent development of solutions using agile approach;
- Experience with unit testing, continuous integration, DevOps;
- Web UI design and development using responsive frameworks, progressive web apps;
- Business analysis for the software system, implementation of specification based on specification, budgeting, collaboration with stakeholders and end-users, communication of technical data about the product to the non-technical public segment;
- Analyzing the performance of the software system from the design to the final product, analyzing the performance of the critical components, setting and tracking the implementation of the requirements.

Project: Application for administration of Information Security Management processes, Document Management system (BPM, DMS) & E-commerce

Position under the project: .NET Developer

Implementation period: February 2019 – May 2019

Project description:

The project aims to develop a Customer Information Management System (SMSI) documentation and process management application, according to the ISO 27001 standard. The application allows the beneficiary to customize its parameters in line with subsequent updates of the standard without the subsequent involvement of the developer.

Main technologies: .Net Core 2.2, PostgreSQL, Bootstrap, JQuery, JQuery.DataTable, GrapeJs.

Project: Development and implementation of State Automated Information System "Vignette"

Position under the project: .NET Developer

Implementation period: November 2018 - April 2019

Project description:

The main goal of SAIS Vignette is to ensure the Ministry of Economy and Infrastructure of the Republic of Moldova with an IT solution for collecting, storing and data processing regarding collection of fee for using roads in Moldova by non-registered vehicles in Moldova. The system also provide various reports and information for responsible authorities witch allow exercising the verification and control attributions regarding fee payments.

Main technologies: ASP.NET MVC 5, nHibernate, MSSQL 2017, jqGrid, Bootstrap, ASP.NET Core 2 API.

Project: Adjustment of the State Automated Information System "Elections"

Position under the project: .NET Developer

Implementation period: March 2018 – August 2018

Project description:

As a result of the amendments to the electoral legislation of the Republic of Moldova regarding the parliamentary elections, the electoral system is changed from party lists to elections on a mixed basis (both on the basis of party lists and on the basis of uninominal constituencies). Under these conditions appeared the necessity to adjust the State Automated Information System "Elections" (SAISE).

Main technologies: ASP .NET, MVC, C#, JQuery, Razor View Engine, SQL Server

Project: Maintenance Services of the Case Management System (CMS), version 4.1.4

Position under the project: .NET Developer

Implementation period: July 2017 – October 2018

Project description:

The information system aims to automate the internal work procedures within the courts on case flows management, data on court performance, budget and human resources planning, providing to the citizens an easy access to various electronic services of the court.

Main technologies: Drupal, Mysql, Php, Ajax, XML, HTML, JavaScript, jQuery, CSS, ASP.NET, MVC, C#, AJAX, RAZOR View Engine, SQL Server.
