

RECOMMENDATION LETTER

ProTV Chisinau is the most visible and reliable news source in the Republic of Moldova. Since 1999, we have been informing society about latest news with transparency and equidistance.

In recent years, we have decided to focus on the online environment, so in 2017 we began searching for a local trusted web agency to become a long-term partner in creating online platforms for our communication channels and digital content/video management solutions.

After a detailed analysis and a lot of meetings we found Mediapark UAB, which at the end of the project have proven to be exactly what we needed and never disappointed us in the expectations we had.

We have been working with this agency for 2 years now, creating 6 platforms, media content management platform, online streaming tools, secure data storage & management, and maintaining all online products.

The Mediapark team has shown professionalism, respected the terms, and has always made the most effort to accomplish tasks, which has led to the creation of a healthy parity between us and Mediapark.

For who needs a trustworthy partner in creating online digital products and graphics, we recommend Mediapark UAB.
