SHANDONG HAIDIKE MEDICAL PRODUCTS CO.,LTD.

山东海迪科医用制品有限公司

Shandong Haidike Medical Products Co., Ltd. is a leading and world famous medical devices manufacturer with ISO13485, ISO14001, ANVISA GMP, CE, FDA, TGA, FSC and NMPA certificates. "RTMED" and "Haidike" are registered trademark and protected under the Madrid Agreement. Our medical devices have been registered in more than 20 countries and exported to more than 150 countries and owning good reputation all over the world!

- ◆ Absorbable and nonabsorbable Surgical sutures
- ◆ Lifting threads for plastic surgery
- ◆ Hernia repair meshes
- ◆ Orthopedic casting tapes & splints
- ◆ Electric Wheelchair & Manual Wheelchair
- ◆ Veterinary surgical supplies
- ◆ Medical protection products etc.

RTMED MADRID TRADEMARK

PGA POLYGLYCOLIC ACID

Properties:

Structure: Multifilament, Braided
 Colour: Violet, Undyed
 Chemical composition: Polyglycolic acid
 Coating: Polycaprolactone + Calcium Stearate
 Sizes: USP 8/0 - USP 4
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 60 - 90 days

Advantages:

- High initial tensile strength
- Excellent knotting ability
- Reliable absorbability
- Easy to handle
- Outstanding holding power through the critical wound periode
- Smooth surface, slides smoothly through the tissue

PGLA POLYGLACTIN 910

Properties:

Structure: Multifilament, Braided
 Colour: Violet, Undyed
 Chemical composition: Poly(glycolide-co-l-lactide 90/10)
 Coating: Poly(glycolide-co-l-lactide 30/70) + Calcium Stearate
 Sizes: USP 8/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 56 - 70 days

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

PDO POLYDIOXANONE

Properties:

Structure: Monofilament
 Colour: Violet, Undyed
 Chemical composition: Poly (p-dioxanone)
 Sizes: USP 7/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 180 - 210 days

Advantages:

- High initial tensile strength
- Prolonged wound support
- Minimal tissue reaction
- Lower incidence of infection and trauma due to smooth surface

PGCL POLIGLECAPRONE 25

Properties:

Structure: Monofilament
 Colour: Violet, Undyed
 Chemical composition: Poly (glycolide-co-caprolactone)
 Sizes: USP 6/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 90 - 120 days

Advantages:

- High initial tensile strength
- Easy handling
- Smooth passage through tissue
- Excellent knotting ability

CHROMIC CATGUT

Properties:

Colour: Brown
 Composition: Purified connective tissue
 Sizes: USP 7/0 - USP 4
 Type of absorption: Proteolysis
 Sterilization: Gamma radiation
 Absorption: 90 - 100 days

Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Uniform absorption

PLAIN CATGUT

Properties:

Colour: Beige
 Composition: Purified connective tissue
 Sizes: USP 7/0 - USP 4
 Type of absorption: Proteolysis
 Sterilization: Gamma radiation
 Absorption: 60 - 70 days

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

SILK

Properties:

Structure: Braided
 Colour: Black, White
 Composition: Natural silk filaments
 Coating: Silicon / wax
 Sizes: USP 8/0 - USP 4
 Sterilization: Ethylene Oxide

Advantages:

- Excellent handling properties
- High tensile strength
- Highly smooth and flexible
- Good knot security

POLYPROPYLENE

Properties:

Structure: Monofilament
 Colour: Blue
 Chemical composition: Polypropylene
 Sizes: USP 7/0 - USP 3
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Minimal acute inflammatory reaction in tissues
- Excellent and permanent tissue support

NYLON

Properties:

Structure: Monofilament
 Colour: Blue, Black
 Chemical composition: polyamide 6 - 6.6
 Sizes: USP 12/0 - USP 4
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Excellent and permanent tissue support

POLYESTER

Properties:

Structure: Braided
 Colour: Green, White
 Chemical composition: Polyethylene terephthalate
 Coating: Silicon
 Sizes: USP 6/0 - USP 4
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Good knot security

Ultra High Molecular Weight Polyethylene (UHMWPE)

Properties:

Structure: Braided
 Colour: White, white+blue, white+black, white+green
 Chemical composition: Polyethylene
 Sizes: USP 7/0 - USP 5
 Sterilization: Ethylene Oxide

Advantages:

- Extremely strong, flexible and smooth
- Outstanding tensile strength
- Minimal inflammatory reaction

PTFE

Properties:

Structure: Monofilament
 Colour: White
 Chemical composition: polytetrafluoroethylene
 Sizes: USP 2/0 - 6/0
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength; does not weaken when moistened.
- Decreased inflammation and faster wound repair.
- Soft, comfortable for patients.
- Great handling properties and knot security.

Disposable Skin Stapler and Remover

Application:

Used for wound closure and tissue suture

Features and Advantages:

- Single use, avoid cross-infection
- Biologically compatible
- Significantly decrease wound closure time and reduce procedure & anaesthesia time
- Suture easily and efficiency as well as easily removed
- With better cosmetic results.

Disposable Trocars

Application:

It is used for laparoscopy surgery, the puncture of the abdominal wall of the human body is used to establish a working channel for abdominal surgery.

Features and Advantages:

- Unique air-tight design to prevent gas leakage.
- Anti-slip grain design, increasing the friction between cannular and abdominal wall, to avoid cannular fall off.
- Universal positioning of puncture cone without directional insertion.

Disposable Endo Cutter Stapler and The Cartridge

Application:

Suitable for endoscopic or open surgical tissue removal in abdominal surgery, gynecology, pediatrics, thoracic surgery.

Features and Advantages:

- One-handed control ensures complete tissue cutting and reduces tissue damage.
- Better tissue thickness adaptability.
- Larger rotation angle for easier operation.

SPECIALTY SUTURES PORTFOLIO

Dental sutures

Optimal performance in DENTAL SURGERY

Dental sutures

Non Absorbable soft Nylon

| USP Size | Needle shape | Colour | Structure |
|----------|----------------------------|-------------|--------------|
| 4/0, 5/0 | 3/8 circle reverse cutting | Blue, Black | Monofilament |

Non Absorbable Silk Braided

| USP Size | Needle shape | Colour | Structure |
|----------|----------------------------|--------------|-----------------------|
| 3/0, 4/0 | 3/8 circle reverse cutting | Black, White | Braided multifilament |

Synthetic Absorbable Polyglactine 910

| USP Size | Needle shape | Colour | Structure |
|----------|----------------------------|--------|-----------------------|
| 4/0, 5/0 | 3/8 circle reverse cutting | Violet | Braided multifilament |

| 3/0, 4/0, 5/0 | 3/8 circle reverse cutting | White | Monofilament |

DENTAL AND MAXILLOFACIAL SURGERY

Haidike surgical dental sutures allow dental and maxillofacial surgeons to obtain the best results for their patients. Our wide portfolio consists of absorbable and non-absorbable sutures.

Surgical procedures:

- Dental implants
- Dental prostheses
- Maxillary sinus lift
- Bone grafts
- Removal of pathological processes
- Apicoectomies
- Periodontal surgery
- Gingival aesthetics
- Gingival graft
- Third molar surgery
- Frenectomies
- Pediatric dentistry

Ophthalmic sutures

NON-ABSORBABLE SUTURE
(11-0, 10-0, 9-0, 8-0, 7-0)

Suture needles designed to stay sharp

Excellent needle size to match the thread

Hernia Repair Mesh

Large mesh aperture

Promotes liquid circulation and smoothes tissue growth.

Less micropores

Greatly reduces the possibility of bacteria hiding and is not easy to infect.

Light weight

Reduce postoperative pain and foreign body sensation.

| Products Description | Size |

Lifting Threads Needle

SHARP Basic type, generally used for linear filling and simple lifting, Beginners can also operate effortlessly.

W TYPE Circular head, reducing the damage to the skin tissue. After the injection, the needle can be taken out then correct the position and depth of the needle, which improves the lack of a stitch of the other types.

L TYPE L type blunt needle, reduce the damage of blood vessels, bruising and hematoma. The pain was significantly reduced.

U-COG Double needle is used for eyebrow lifting and other parts requiring strong lifting. U-COG is a special structure line with strong lifting ability. The local lifting effect is almost as good as the little facelift.

PDO/PCL Lifting Thread

Mono
Needle Sharp Needle
Parts Face, Body
Effects Tightening, Filling, Wrinkles Removing, Whitening

Orthopedic Casting Tape

USE INSTRUCTION

- Apply 1~2 layers stockinet over the affected body part;
- Wear surgical gloves;
- Choose proper size orthopedic casting tape, then open the package;
- Immerse the casting tape in normal temperature(20°C~30°C) water for 5~6 seconds and squeeze 2~3 times. Then remove from the water and squeeze out the excess water. The curing time of orthopedic casting tape is directly related to the temperature of water. The curing time is shorter in high temperature water than in low temperature water. If the water temperature is over 27°C, the curing time is too short to increase the difficulty of the operation.
- Wrap the casting tape spirally around the affected body part, overlapping the previous layer by one-half or two-thirds the width of the tape. The tension is moderate. If it is too loose, it will weaken the adhesion of the orthopedic casting tape. If it is too tight, it will affect the blood circulation.
- The intensity of the casting tape is related to the number of overlapped layers. Overlap 3~4 layers for the non-weight bearing parts, while overlap 5~6 layers for the weight bearing parts. If more layers are needed, please ensure the adhesivity between the layers.
- To increase the adhesion between layers, the casting tape will be shaped after wrapped. The operating time should be in 3~5 minutes. The adhesion and shaping effect cannot reach the best if the operating time is longer or the immersed time is too long. The patients do not allow to move freely in 10 minutes before the orthopedic casting tape are completely hardened.
- The electric plaster saw is needed if the affected parts need to open a window or remove the orthopedic casting tape.

Seniors Shopping Cart

A good helper for parents in life

Tie-rod brake design

Comfortable seat

Wear-resistant reinforced brake rear wheel

New Generation Multi-claw Crutches

Material upgrade

Smooth all the way

- Anti-stumbling design Steady walk without hindrance
- The inside and outside width design is balanced and stable.

Feel comfortable

- High wear-resistant handrail
- Surface cracked anti-skid treatment, anti-skid and wear-resistant, Ergonomic design, Fits to the hand without getting tired from holding for a long time.

Firmer and stronger

- 1.2mm wall thickness Thicken reinforcement
- Lightweight and load-bearing

Firm and convenient

- Annular clavicle clamp
- Fixed main pole Three simple steps

Medical Grade Crutches

Stable and non-slip height adjustable

PE environmentally friendly foam material arm rest

Thick PE foam material, high resilience, non-slip, soft and comfortable, strong abrasion resistance, not tired after long-term use.

Grip three-position adjustment

The grip has three gears adjustment, the adjustment part is locked firmly and stably, and it is convenient to use and feel comfortable and soft

Leg height adjustment in 9 positions

The height of 9 levels is adjustable to meet the needs of people of different heights. Strengthen the aluminum alloy to provide super good support.

Non-slip durable rubber pad

The rubber pad is made of rubber, which is thicker, stable and non-slip, and the built-in metal gasket is wear-resistant and durable

Medical Disposable Protective Clothing

Executive Standard
GB 19082-2009

Specifications: One-piece Sizes:
□ 160 □ 165 □ 170 □ 175 □ 180 □ 185

Intended use: It is used to provide barrier and protection for the potentially infectious patients' blood, body fluids, secretions, etc. that clinical medical personnel come into contact with at work. It cannot be used to isolate places with strict microbiological index control requirements such as intensive care unit (room).

Expiration date:
2 years after production

Surgical Gowns

CE BS EN 13795-1:2019

Model: □S □M □L □XL □XXL □XXXL □XXXXL

Specifications:
□High performance type □Standard type

Intended use: For the surgical staff to wear, reduce the source of infection to the patient's surgical wound to prevent postoperative wound infection.

Storage:
Store in an environment with relative humidity not exceeding 80%, no corrosive gas, cool, dry, well ventilated and clean.

Expiration date:
3 years after production

Isolation Gown

Isolation Gown
TYPE A/TYPE B

Isolation gowns - type A/type B
Specifications:
120cm×120cm/One-size-fits-all

Material:100% Non-woven fabric

Product description:
Non-woven fabrics are usually used as the main raw materials, which are made by cutting and sewing. Non-sterile, single-use

Expiration date:
3 years after production

- Good air permeability
- Strong barrier performance
- Non-sterile
- Do not reuse

Medical Scrubs Uniforms

Model:type A: split type;
type B: gown type.

Specifications:
□S □M □L □XL □XXL

Product Description: Usually made of cotton fiber or non-woven fabric. The medical scrubs uniforms is short-sleeve or long-sleeve style that have the function of blocking dandruff, and do not have liquid barrier properties. It is non-sterile supply and can be reused. It should be sterilized before using.

Expiration date:
3 years after production

Medical Goggle

- Model specifications** White Black Transparent
Large Medium Small
- Product description** It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.
- Expiration date** 3 years after production
- Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Isolation Shoe Cover

- size:** Long Short
- style:** Non-woven fabric PVC PP+PE

Medical Cap

- Model specifications** Round cap. φ25.5cm FZ/T64005-2011
- Product description** Non-woven fabric is usually used as the main raw material, which is made by cutting and sewing. Non-sterile, single-use.
- Material** Non-woven fabric PP+PE
- Colour** Blue
- Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Isolation Mask

- Model: Ear hook type / Headband type** EN166:2001 EN167:2002
- Product description** It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.
- Expiration date** 3 years after production
- Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Bed Sheet

- Materials: 70% Polypropylene, 30% Polyethylene non-woven fabric**
- Product description** It is made by compounding or sewing non-woven fabric and plastic film. Non-sterile, single use.
- Expiration date** 3 years after production
- Storage** This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Disposable Virus Specimen Collection Tube

Disposable sampler

- Model: Inactivated and non-inactivated**
- Product description** Disposable virus specimen collection tube is composed of swabs and/or collection cups and tubes containing storage solution. Non-sterile.
- Expiration date** 12 months
- Storage** The product should be stored in a non-corrosive gas and well-ventilated warehouse at room temperature.

Medical examination gloves

- Model/Specification:** According to the different materials used, it is divided into: polyvinyl chloride, butyronitrile; according to the size, it is divided into: XS, S, M, L, XL.
- Product Description:** Usually made of materials such as polyvinyl chloride. Have sufficient strength and barrier properties. Non-sterile supply, single use.
- Intended use:** It will be wore by doctor to do checking for the patients or lab testing.

Medical rubber gloves

- Model/Specification:** XS, S, M, L, XL.
- Product Description:** Usually made of materials such as polyvinyl chloride and rubber. Have sufficient strength and barrier properties. Non-sterile supply, single use.
- Intended use:** It will be wore by doctor to do checking for the patients or lab testing.

Disposable Surgical Face Mask

| 3 Ply Flat type Ear Loop EN 14683:2019 Type IIR | |
|---|---|
| Size | 17.5 cm x 9.5 cm |
| Material | Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops |
| Product performance: | The bacterial filtration efficiency of the mask should be not less than 98%. |
| Application | It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc. |
| Expiration date | 2 years after production |
| Storage | Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources. |

| 3 Ply Flat type Ear Loop EN 14683:2019 Type IIR | |
|---|---|
| Size | 14.5 cm x 9.5 cm |
| Material | Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops |

| Storage | Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources. |

Disposable Medical Face Mask

| 3 Ply Flat type Ear Loop EN 14683:2019 Type I | |
|---|---|
| Size | 17.5 cm x 9.5 cm |
| Material | Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops |
| Product performance: | The bacterial filtration efficiency of the mask should be not less than 95%. |
| Application | It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc. |
| Expiration date | 2 years after production |
| Storage | Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources. |
