To Whom It May Concern:

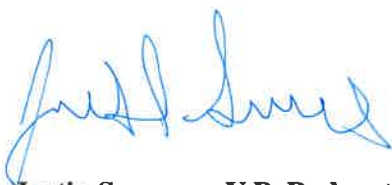

Radparts.com, Inc., a division of Acceletronics, Inc., a reputable supplier of parts for various Varian Medical Systems Linear Accelerators (LINAC) and other radiation oncology equipment, inform you about full compatibility of offered spare parts to HumanLab Srl, Moldova for your Varian LINAC system. Our mission is to provide high quality, user friendly, low cost parts support for linear accelerators and radiation equipment.

We confirm that offered and later supplied products will be NEW, unless otherwise specified, and are covered by manufacturer warranty of these spare parts and/or the Radparts warranty. The warranty depends on the part. Example: We do not provide a warranty for glassware, however, we do extend the E2V warranty to you (see Radparts Terms of Sale).

All offered products are engineered to meet and or exceed manufacturer specifications in fit, finish, performance, and longevity. Radparts, in conjunction with Acceletronics, is dedicated to delivering the best equipment performance and service reliability for Linear Accelerators and CT Scanners across all major brands and models. We provide a premium customer experience across the USA in timely field maintenance, with our team of highly qualified oncology equipment service specialists. Our company is the largest independent multi-brand distributor of Linac Parts.

Around the clock and around the world, RadParts is there when you need us! RadParts warehouses contain over 65,000 parts, with over 3,200 individual line items for linear accelerators such as Solid State & tube RF Drivers, Klystrons, Magnetrons, Thyratrons, Waveguides, Circulators, RF loads, MLC motors, new & rebuilt power supplies, solenoids, switches, water & RF rotary joints, crowbars, console keyboards, SF6 gas, mirrors, crosshairs, mylar rolls & sheets, carbon fiber and stringed table panels, pendants, cables, motors, pumps, Vacuum and PMI kits and much more.

These benefits come with one major competitive advantage no other service provider can match. Value that resonates with YOUR business plans and priorities! Medical Linear Accelerators, Digital Imaging and CT Simulators, Human and Veterinary Radiation Oncology - all from an organization continuously improving and developing processes which are independently audited to internationally recognized ISO9001:2008 quality standards.
