

CONVEY™

Guide Catheter

Transradial Intervention

- Robust shape portfolio to address anatomy variations
- Designed for excellent shape retention during prolonged procedure time
- Highly radiopaque distal tip for visibility in even the most tortuous anatomy

Large Lumen Design

- Precise torque response enhances maneuverability and engagement
- Large 6F 0.071" (1.80 mm) inner-diameter
- Ultra-thin 1 × 2 flat wire braid pattern for strong back-up support

Unique Hydrophilic Coating

- Higher lubricity designed to reduce vessel spasm and lower friction during catheter advancement
- Uncoated 7 cm distal segment provides meaningful feedback to help prevent unintentional deep intubation
- Uncoated proximal 25 cm segment provides controlled manipulation

Left Femoral Approach Curves

Amplatz Left (AL)
CLS™ (Contralateral Left Support)
Femoral Curve Left (FCL)
Femoral Left (FL)
Judkins Left (JL)

Radial/Brachial Approach Curves

KIMNY™
Left Back-Up (Left BU)
Radial Back-Up (RB)
Radial Back-Up Left (RBL)
Radial Back-Up Right (RBR)
Radial
TIG

Right Femoral Approach Curves

ALLRIGHT™ (ART)
Amplatz Right (AR)
Femoral Right (FR)
Hockey Stick (HS)
Judkins Right (JR)
Multipurpose A (MPA)
Right Coronary Shepherd's Crook (RC SC)

Additional Curves

Internal Mammary (IM)
Left Coronary Bypass (LCB)
Right Coronary Bypass (RCB)
