

# Medical Electric drill and saw-Canulate drill (ND-2011)

### **Application and Feature:**

Electric surgical drill&saw is one of power tools widely used in orthopedic operation. Gradually replaced traditional industrial drill and saw, it can be autoclaved up to  $135^{\circ}$ C high temperature and 1.6Mpa high pressure. Some of bacteria can be killed by high temperature and pressure, fumigating can not do. Meanwhile, it can shorten sterilization time. Under high temperature and high pressure, just need 20 minutes, win the valuable time for the patient. The device is optional, good looking, small size, light weight, no wires, easy to carry, safe operation.

## **Composition:**

Battery operated surgical drill&saw is made of main hand piece, charger,battery. The whole outer skin of the hand piece is sealed. Charger is not a medical electric device.
