

Victor Botnaru

Date of birth: 23/02/2001 | Place of birth: Straseni, Moldova | Gender: Male | Nationality: Romanian, Moldovan | Phone: (+373) 67108193 (Mobile) | Email address: vbotnaru18@gmail.com | ID: 2013033000343 | Work permit: Moldova | Address: Straseni, Stefan cel mare 20, Apartment 28, 3702, Straseni, Moldova (Home)

About myself

I am a passionate and dedicated Full Stack Web Developer with a strong interest in technology, and continuous learning. Over the past few years, I've worked on a variety of projects ranging from corporate web applications to mobile and university research projects, gaining solid experience across the full development cycle.

My main focus is on building modern, responsive, and high-performance web applications using React, Angular, TypeScript, Vite, PHP (Slim Framework), Twig and database design (SQL, MySQL, SQLite).

Throughout my career, I've contributed to projects in aviation, government, logistics, education, and finance, taking part in architecture design, feature implementation, UI optimization, and full project deployment. I value clean architecture, maintainable code, and efficient teamwork.

I'm eager to keep growing in the IT field, particularly in web development, where I can apply my creativity and problem-solving skills to deliver high-quality digital products.

Education & Training

Software Engineering | TUM | 01/09/2020 - Current | Chisinau, Moldova

Field(s) of study: Software and applications development and analysis | Level in EQF: 6

Mobile Application Developments | Sonacom Grup SRL | 01/09/2022 - 31/12/2022 | Chisinau, Moldova

Field(s) of study: Software and applications development and analysis

Autonomous Driving Vehicle Development | FabLab | 01/01/2023 - 31/05/2023 | Chisinau, Moldova

Field(s) of study: Electronics and automation

Language Skills

Mother tongue(s): **Romanian**

| | Understanding | | Speaking | | Writing |

Work experience

Application developer | Sonacom Grup SRL | 14/03/2022 - 30/06/2024 | Chisinau, Moldova

Worked as a **Full Stack Developer**, building and maintaining web applications using **PHP (Slim Framework)** for backend and **Twig** or **React (JS/TS)** for frontend development.

Responsible for application architecture, feature implementation, and UI optimization across multiple projects.

Business or sector Information and communication | **Department:** Software development | **Website:** <https://sonacom.net>

Solutions developer | Period SRL | 01/07/2024 - Current | Chisinau, Moldova

Worked as a **Full Stack Developer**, building and maintaining web applications using **PHP (Slim Framework)** for backend and

Twigor React (TypeScript, Vite) for frontend development.

Responsible for **application architecture, feature implementation**, and **UI optimization** across several projects.

Business or sector Information and communication | **Department:** Software Development | **Website:** <https://www.period.md>

Web developer | Spacecore SRL | 02/02/2026 - Current | Chisinau, Moldova

Worked as a **Front end web developer**, building and maintaining web applications using **Angular** Framework.

Responsible for **application architecture, feature implementation**, infrastructure update, and **UI optimization** across several projects.

Projects

AirMoldova

Helpdesk Web Application

Developed a full-scale web-based **React Vite TypeScript** project, designed to improve collaboration between employees and manage flights and clients.

Built the entire frontend system from architecture to deployment. Designed and implemented the core system architecture and customer-facing features

Moldova City-Halls

Progress Tracking Platform

I was one of the core developers of this application, from initial concept through to production release. Developed with **PHP, Twig, and JavaScript on front end, and slim on back end**. Redesigned frontend layouts and implemented new features such as **real-time updates** and **notification systems**.

E-Cancelaria

Document Management System

Served as a **Full Stack Developer**, building backend with **PHP (Slim Framework)** and frontend with **Twig**. Responsible for frontend architecture, **role-based access control, secure file transfers**, and **permission**

E-Cancelaria Admin Panel

Managing tool

Built entirely in **React**, enabling administrators to manage users, privileges, and documents across the system.

Sonacom

Website

Developed a responsive corporate website using **HTML, CSS, and JavaScript**, including **custom mailers** and **site architecture**.

<https://sonacom.net>

MGHandling

Website

Designed and developed a **responsive website** with **HTML, CSS, and JavaScript**, including architecture and mailing functionality.

<https://www.mghandling.com>

ShippingFreight

Website

Improved and redesigned a **WordPress** website by fixing layouts and adding new components.

<https://shippingfreight.eu>

Period

Website

Designed and developed a **responsive website** with **Google sites** including architecture and mailing functionality.

<https://www.period.md>

Impact Solutions Advisors

Website

Created a **React TypeScript (Vite)** landing page from scratch, including full layout design and implementation.

<https://www.impactolutionsadvisors.com>

Hydrofusion

Website

Built a complete **React TypeScript (Vite)** landing page, focusing on performance and responsive design.

<https://hydrofusres.com>

DFM (duty free Moldova)

Website

Redesigned the entire layout to provide a modern and fully responsive **desktop, tablet, and mobile experience**.

Kidengarden

Website

Rebuilt the client's old website (without access to code) using **React TypeScript (Vite)**. Restored and improved key features such as the **messaging** and **contact system**.

Tech Ultimate Distribution | 19/01/2026 - Current

WebApplication

Developed a full-scale web-based **e-commerce** application from initial concept through to production release. Led the migration and upgrade of the application from **Angular 9** to the latest **Angular 21** version, including modernization of the entire supporting infrastructure. Designed and implemented the core system architecture, covering **payment integration**, product and user management modules, as well as key customer-facing features such as shopping cart, product comparison, and wishlist functionality.
