I.V. Catheter with Injection Valve and Wings

Possesses all features of a standard intravenous catheter.

- Stainless steel, silicone tipped needle for smooth penetration.
- Injection port with one way silicone injection valve.
- Specially designed protection cap with a recessed plug to cover the injection port and minimize contamination.
- Angled and grooved wings for secure fixation.
- Radio-opaque lines for accurate radiographic detection.
- Luer cap for blocking the catheter when not in use.
- 6% luer taper for compatibility with all standard devices.
- Disposable, sterile and non-pyrogenic.

Safety I. V. Catheter with Injection Valve and Wings

I.V. Catheter with injection valve and wings with added safety feature for prevention of needle stick injury.

- Safety feature for complete protection from needle stick injury.
- Passive, irreversible activation of safety mechanism.
- No change in insertion technique required.
- Stainless steel, silicone tipped needle for smooth penetration.
- Injection port with one way silicone injection valve.
- Specially designed protection cap with a recessed plug to cover the injection port and minimize contamination.
- Angled and grooved wings for secure fixation.
- Radio-opaque lines for accurate radiographic detection.
- Luer cap for blocking the catheter when not in use.
- 6% luer taper for compatibility with all standard devices.
- Disposable, sterile and non-pyrogenic.

Glofancie®

I.V. Catheter with Wings for Neonates

Miniature IV catheter with a small, fine and smooth design, especially for use in neonates (children below 1 month of age).

- Small wings and absence of injection port permits easy handling.
- Large internal diameter for increased flow rate and reduced peel back effect.
- Siliconized needle tip for atraumatic tissue penetration.
- Transparent flashback chamber for easy visualization of blood.
- Available in size 26G.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

Gloneo®

I.V. Catheter with Wings for Neonates

Miniature IV catheter with a small, fine and smooth design for use in infants (children below 1 year of age) and neonates (children below 1 month of age).

- Small wings and absence of injection port permits easy handling.
- Large internal diameter for increased flow rate and reduced peel back effect.
- Siliconized needle tip for atraumatic tissue penetration.
- Transparent flashback chamber for easy visualization of blood.
- Available in size 24G.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

## I.V. Catheter with an integrated three-way stopcock

Ports of the stopcock can be utilized for attaching additional stopcocks for multiple infusion therapy.

- Colour coded tap for easy identification.
- Flexible wings with suture holes for secure fixation.
- Luer lock stoppers to prevent contamination.
- 360° rotation of the tap without limitation.
- Rigid and sturdy design for longevity.
- Female luers with 6% taper for compatibility with all standard devices.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

## I.V. Catheter without Injection Valve and with Wings

I.V. Catheter useful in patients carrying highly infective diseases to minimize transmission of infection.

- Projection on main body for two point grip and easy insertion.
- Streamlined design provides minimum area of contact with the body.
- Maximum needle catheter clearance for minimal peel back effect .

Infusion

## Three-way stopcock

Three way stopcock made of polycarbonate

- Multiple channels for multiple infusion therapy.
- Designed to with stand pressure upto 5 bars.
- Smooth, fully rotatable tap.
- Stability tested pneumatically and hydrostatically.
- Tap turns every 360° without limitation.
- Flow shuts off every 90°.
- Minimal dead space in ports to ensure precise drug administration and maximum infusion flow. Continuous flow channels.
- Arrow indication marks on top to indicate direction of flow.
- Low profile for stable and safe positioning.
- Available in lipid resistant/non-lipid resistant varieties.
- Available with blue and red pegs for easier identification.
- Disposable, sterile and non-pyrogenic. Sealed blister packing.

Extension tubing with 3 way Stop cock

Three-way stopcock with an integrated extension tubing for minimizing manipulation during intravenous administration of fluids/drugs through an I.V. Catheter.

- Minimizes chances of mechanical irritation and infection by taking.
- The administration site away from insertion site.
- The integrated three-way stopcock offers multiple infusion lines.
- Smooth internal surface to minimize turbulence.
- Disposable, sterile and non-pyrogenic.

GloManifold™

Intravenous infusion system with multiple Stopcocks in line

For infusing multiple drug therapies to the patient simultaneously.

- Polycarbonate body and polyethylene lever.
- Easy to operate and smooth to turn.
- Large internal lumen.
- Highly resistant to pressure and chemicals over a wide range.
- Easily recognizable flow direction and flow path.
- 4 female luer locks and 1 male luer slip (incase of 3 port type).
- Limited rotation T handle with click function at each flowline.
- Recessed protector for manifold ports.
- ETO sterilised.

Technical Specifications

| Type   | Capacity | Ref. No. | Qty. in carton Inner/ Outer |
|--------|----------|----------|-----------------------------|
| 3 Port | 500PSI   | 4910022G | 15/180                      |

Glopreg™

I.V. Fluid Infusion Set with Flow Regulator

Intravenous fluid infusion set with Flow Regulator to regulate the flow of IV fluid.

- Designed to control flow rates from 5 ml/hr – 300 ml/hr manually.
- Sharp, spike for easy insertion.
- Roller clamp for regulating fluid flow rate.
- Self sealing latex bulb for drug administration.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

I.V. Fluid Flow Regulator Extension Set

I.V. Fluid Flow Regulator Extension Set to regulate the flow of IV fluid from an infusion set into an IV catheter.

- Designed to control flow rate from 5ml/hr – 300 ml/hr manually.
- Built-in Y-connector injection site for extra medication.
- Two hand operation eliminates the danger of accidental tampering.
- Provision of male and female luer lock makes it compatible with other devices.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

Low Pressure Extension Tubing

Extension Tubing for making administration of IV fluids more convenient.

- Made from medical grade PVC.
- Minimizes the movement at the cannulation site by taking the fluid administration site away from the insertion site.
- Smooth internal surface to minimize turbulence.
- Disposable, sterile and non-pyrogenic.

High Pressure Extension Line

High Pressure Extension Lines for arterial blood pressure monitoring.

- Manufactured to withstand pressures upto 40 kg/cm2.
- Fitted with male and female luer locks for secure connection.
- Smooth internal surface to minimize turbulence.
- Disposable, sterile and non-pyrogenic.

# Injection Stopper™

To block IV cannulas when not in use

To block IV cannulas when not in use

- Integrated one way valve within the stopper to allow drug administration into the cannula without unscrewing it.
- Available in latex/latex free varieties.

## Technical Specifications

| Type       | Ref. No. | Qty. in carton<br>Inner/ Outer |
|------------|----------|--------------------------------|
| Latex      | 4720012G | 250/2500                       |
| Latex Free | 4720032G | 250/2500                       |

# Luer Cap™

- Threaded stopper to block IV cannulas when not in use.
- Available in white colour.

## Technical Specifications

| Ref. No. | Qty. in carton<br>Inner/ Outer |

| 4710012G | 250/2500                       |

# Glolinn™

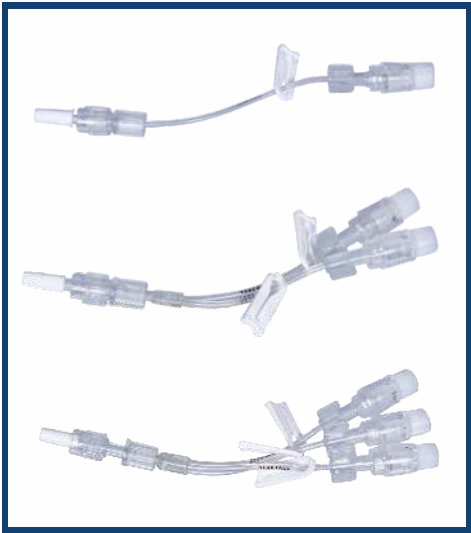

Extension line with needle free valve

### FEATURES & BENEFITS:

- Small bore multiple extension sets.
- Needleless luer access ports provides virtually zero residual volume and high flow rates.
- Glolinn™ is light weight with an easy rotating luer lock which reduces the chances of pulling and kinking.
- Designed for multiple drug delivery.
- Valve features a straight-through, minimal dead space.
- Use of Glolinn™ reduces the chances for catheter/cannula related complications and improves the patient comfort.
- Low priming volume enable small-volume infusions.
- Silicone sealing membrane with slide clamp.
- Available in uno, duo, trio.
- DEHP free.
- Latex free.

### USAGE:

Glolinn™ is designed to meet the needs of general I.V. therapy. The ability of needle free connector is to prevent contamination of fluid path.

### Technical specifications

| Valve        | Total length<br>of Set | Approx. Priming<br>volume (ml) | Ref. No. | Qty. Inner / Outer |
|--------------|------------------------|--------------------------------|----------|--------------------|
| UNO (1 way)  | 15 cm                  | 0.25 ml                        | 4280101G | 50 / 500           |
| DUO (2 way)  | 15 cm                  | 0.45 ml                        | 4280103G | 50 / 500           |
| TRIO (3 way) | 15 cm                  | 0.80 ml                        | 4280105G | 50 / 500           |

Infusion

# Acent<sup>®</sup> 1

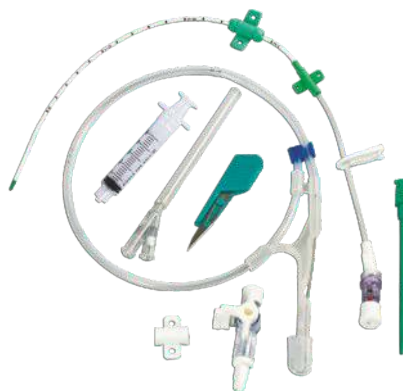

## Single Lumen Central Venous Catheter (Seldinger technique)

### Centrally inserted, single lumen central venous catheter.

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Acent<sup>™</sup> provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.

### Technical Specifications

# Acent<sup>®</sup> 2

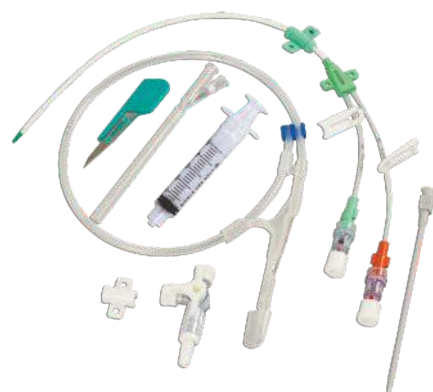

## Double Lumen Central Venous Catheter (Seldinger technique)

### Centrally inserted, double lumen central venous catheter.

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Acent<sup>™</sup> provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.
- Two separate non-communicating vascular access lumens within a single catheter body.
- Proximal lumen for blood sampling, medications and blood administration.
- Distal lumen for CVP monitoring, blood administration and medication.
- Reduces the necessity for multiple venipunctures.
- Exit ports of individual lumens are separated by appropriate distance in proportion to the catheter's French size.
- Coaxial catheter design maximizes inner diameter of central lumen for high flow capacity.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

Critical

# Acent<sup>®</sup> 3

## Triple Lumen Central Venous Catheter (Seldinger Technique)

### Centrally inserted, Triple Lumen Central Venous Catheter

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Acent<sup>™</sup> provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.
- Three separate non-communicating vascular access lumens within a single catheter body.
- Proximal lumen for blood sampling, medications and blood administration.
- Distal lumen for CVP monitoring, blood administration, medications.
- Medial lumen exclusively for total parenteral nutrition.
- Reduces the necessity for multiple venipunctures.
- Exit ports of individual lumens are separated by appropriate distance in proportion to the catheter's French size.
- Coaxial catheter design maximizes inner diameter of central lumen for high flow capacity.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

# Introducer Set™

## Percutaneous Introducer Sheath Set

### Sheath Used For The Placement & Removal Of Vascular Catheter.

- Medikit Introducer Set is used in wide ranging applications from interventional radiology to interventional cardiology.
- Primarily used to introduce balloon, electrode, diagnostic and other catheters into femoral vessels for diagnostic and therapeutic intervention in the coronary arteries.
- Each component has been scientifically designed and developed with utmost engineering precision keeping in mind the myriad requirements of clinicians
- Involved in interventional procedures.

### Technical Specifications

# Glocent®

## Single Lumen Polyurethane Central Venous Catheter (through Catheter technique)

### Peripherally inserted Single Lumen Central Venous Catheter.

- For long term venous access, central venous pressure (CVP) monitoring, infusion of irritant medication, temporary pacing, hemodialysis/plasmapheresis etc.
- Specially coated, flexible polyurethane catheter.
- Removable stylet adds rigidity to the catheter during insertion.
- Extremely bio-compatible, soft and knik resistant catheter.
- Thromboresistant and fat resistant.
- Full length, four radio-opaque lines for accurate radiographic detection.
- Insertion depth marking every 5 cm to determine exact catheter position.
- Smooth tip aids atraumatic insertion.

# Haemodialysis Kit™

### FEATURES:

- Haemodialysis catheter are single/double/multiple lumen catheter that provides temporary vascular access for haemodialysis until a permanent access is available or until another type of dialysis therapy is substituted.
- The multiple lumen catheter contains two large bore lumens that are connected to the dialysis machine to form a complete circuit for the removal and return of the patient's blood during treatment.

### Technical Specifications

Endotracheal Tube (Plain)

Tubular device designed to be inserted into the trachea through the oral/nasal cavity to secure the airway and maintain the gas exchange in the lungs.

- Made from non-toxic, clear, transparent, thermoresistant medical grade PVC (Polyvinyl Chloride).
- Fitted with standard 15 mm connector for attachments to all standard ventilatory circuits in operation theaters or intensive care units.
- Graduated markings to display distance from the tip.
- Well marked to indicate the internal/external diameter.
- Nasoral tip suitable for both nasal and oral intubation.
- Full length radio-opaque lines to assess position of the tube radiographically.
- Murphy's eye near the tip to circumvent any obstruction.
- Disposable, sterile, non-pyrogenic.

Endotracheal Tube (Cuffed)

Tubular device designed to be inserted into the trachea through the mouth or nose to secure the airway and maintain the gas exchange in the lungs.

- Made from non-toxic, clear, transparent, thermoresistant medical grade PVC (Polyvinyl Chloride).
- High volume, low pressure, evenly shaped cuff with a pilot balloon integrated to the tube for secure positioning inside the trachea .
- Fitted with standard 15 mm connector for attachments to all standard ventilatory circuits in operation theaters or intensive care units.
- Graduated markings to display distance from the tip.
- Well marked to indicate the internal/external diameter.
- Nasoral tip suitable for both nasal and oral intubation.
- Full length radio-opaque lines to assess position of tube radiographically.
- Murphy's eye at the tip to circumvent any obstruction.
- Disposable, sterile, non-pyrogenic.

## Suction Catheter

- Suction Catheters are suitable for removal of secretion from mouth, trachea and bronchial tubes.
- Manufactured from non-toxic non-irritant medical grade PVC.
- Distal end is open with one lateral eye.
- Colour coded for instant size identification.
- Provided with universal funnel shape connector for safe connection to standard suction equipment.

# Glospine™

## Spinal Needle

Intended for spinal (sub Arachnoid) anaesthesia.

- Ultra fine quincke tip for better dura puncture appreciation and to prevent post dura puncture headache.
- Color-coded hub-stylet (International standard) for fast detection of the needle size.
- Optimal sized stylet prevents tissue coring and obstruction of the needle size.
- Transparent hub for fast detection of CSF.
- Needle length 3.5".
- Sterile for single use only.
- Made of superfine surgical steel.

# Epidural Mini Pack™

## Epidural Kit

Kit contains Epidural Needle and Epidural Catheter of Corresponding size.

- Specifically designed kink resistant yet structurally strong catheter with flexible tip making catheter placement convenient.
- Risk of inadvertent dura puncture or vessel rupture are markedly reduced with soft and flexible catheter tip.
- The uniquely designed coil reinforced body is the mainstay of its structural strength and makes the catheter non collapsible for long periods. Smooth exterior and ianner helix platform makes maneuverability easy and imparts radio opaque property to the catheter.
- Calibrated catheter depth marking make the placement exact and the colored catheter tip makes intact catheter depth marking make the placement exact and the colored catheter tip makes.
- Each 10 mm, beginning at 10 mm from the tip, up to 250 mm.
- 2, 3, 4, 5 points, 2.5 mm each are located at 100, 150, 200, 250 mm from the tip respectively.
- Non-collapsing holes near the tip makes drug dispersion uniform.
- Also contains specially designed filter disc with screwed connection for easy fit.

## Glociser™

### Respiratory Exerciser

**Helps to develop, improve and maintain respiratory fitness.**

- Useful in restoring and maintaining lung capacity of post operative ambulatory and COPD patients.
- Improves respiratory parameters, maximal exercise capacity and overall cardiopulmonary status.
- Air filter for enhanced protection.
- Transparent, well calibrated chambers for accurate estimation of exercise capacity.
- Soft, aesthetically coloured inspiratory tubing.
- Colour coded triple ball design for proper visual feedback.
- Sleek, stable design.

#### Technical Specifications

## Glomask®

### Oxygen face mask

**Transparent OXYGEN MASK meant to administer oxygen to patients.**

- Made from special non-toxic medical grade PVC.
- Two holes to allow carbon dioxide exhaled by the patient to escape.
- Nasal clip for secure fixation over the patient's nose.
- Elastic band for placement around the head.
- Transparent tubing to connect the mask to the oxygen source.

## Glowin™

### Twin Bore Nasal Oxygen Set

- Suitable for easy and efficient administration of oxygen.
- Star lumen main tube to avoid accidental blockage.
- Soft and kink resistant PVC. Tubing.
- Soft twin prong nasal tips to ensure equal distribution of oxygen through both air passages which provides maximum patient comfort.
- Non-sterile
- Tube length: 210cm

# Respiratory Care

## Mucus Extractor

Used for aspiration of secretion from oropharynx in newly born babies to ensure free respiration.

- Clear transparent container permits immediate visual examination of the aspirate.
- Also suitable for obtaining mucus specimen for microbiological examination.
- Spare plug cap is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container.
- Low friction surface catheter is provided with open end silk smooth round tip, for trauma free insertion.
- Manufactured from transparent medical grade PVC. Sterile ready for use.

# Glofant™

## Infant feeding tube

Provide feedings and medications into the stomach.

- Manufactured from soft, Non Toxic, medical grade PVC.
- Distal end is coned with two lateral eyes.
- Proximal end is provided with female luer mount for easy connection to feeding syringe.
- Tube with radio-opaque line.
- Smooth, low friction surface facilitates easy introduction.
- Disposable, Sterile, single use.

## Thoracic catheter

- Suitable for effective drainage after Cardio-Thoracic & thoracic Surgery.
- Atraumatic & rounded open distal end with smooth eyes.
- With radio-opaque line and marking at every 2 cm from the last eye.
- Sizes: 16,20,24,28,32 & 36 FG
- Soft, frosted and kink resistant PVC Tubing -Matching size connector for easy connection to the drainage system.
- Proximal end is fitted with pull through tapered tongue.

## Medidrain®

### Wound Suction Drainage System

- Suitable to offer surgeons and doctors an effective device for close wound drainage under negative pressure post operatively with the option to use one or two catheters simultaneously.
- Graduated bellow container.
- Redon drain catheters are provided with radio opaque line and satin smooth eyes.
- Connecting tube is kink resistant and is provided with additional strength to withstand the suction.
- Easy to depress chamber to activate the suction of bellow unit by one person.
- Available with different catheter sizes with matching size curved needle to meet moderate to heavy drainage needs.

#### Unit consists of

- Bellow unit.
- Connecting tube with clamp and "Y" connector.
- Curved needle with matching catheter.
- Spare perforated catheter.

#### Type Bellow Capacity

- 800 ml.

#### Supplied As:

- Complete unit packed in a box.
- Sterile, ready for use.

Surgery

Yankauer Handle with Connecting Tube

Suction of oral cavity and surgical field.

- Rigid, angled, one-piece design, made from clear, medical grade PVC.
- Edges are smooth and clean. It has a bulbous tip and ribbed at proximal end to provide perfect grip.
- Clear tips permit visual monitoring of suction fluids.
- Connecting tubing with optimal draping qualities for maintaining a wall thickness to resist the most rugged environments.
- Used to clear copious and thick secretions and vomitus from oro-pharyngeal cavity and suction fluids and blood to provide clear surgical field.
- Disposable, Sterile, single use.

Surgery

Nelaton Catheter

The single-use catheters are exclusively suitable for short term use.

With its 40 cm length, the Nelaton Single-Use Catheter is ideally suitable for males.

- **Atraumatic urine drainage** Sanitised, medical
- PVC and two rounded-off eyes positioned at the side ensure an optimal sliding quality and care for the sensitive tissue.
- **Fast size identification** The colour-coded funnel insert of the single-use catheter provides for a fast and certain identification of the sizes.
- Atraumatic eyes.
- Individually packed in sterile packaging.
- Transparent PVC providing full urine visibility.
- Contains no pyrogens and no latex.

## GLOBAL MEDIKIT IN BRIEF

### GLOBAL MEDIKIT TEAM

The **Global Medikit** team offers operational experience, engineering solutions and materials research in the field of medical devices. The strong Global Medikit team of engineers, scientists, biochemists and operators work 24/7 to bring you the cutting edge medical device technology.

One of the hallmarks of the **Global Medikit** evolution as a major medical equipment manufacturer and exporter is the in-house development of proprietary equipment, manufacturing processes and techniques. This capability housed in our design and development centre, enables us to offer production answers to sometimes seemingly impossible challenges. **Global Medikit** is in other words, not only a resource for stringently controlled manufacturing, but also an innovation institute.

**Global Medikit** operates its manufacturing activities at Dehradun, Uttarakhand, India. Advantageous a pollution free industrial zone have been the key factors for concentrating the activities there. Each clean room has state of the art HVAC system HEPA filtration, positive pressure, controlled temperature and regulated relative humidity systems in place which provide a conducive environment for manufacturing.

### GLOBAL MEDIKIT R & D

Our research and engineering team functions in a number of capacities : design, development and refinement of products and processes. Our engineering staff can provide complete engineering services to support conceptual product assignments. The **Global Medikit** R & D team focuses on critical healthcare problems and finds effective product solutions.

### GLOBAL MEDIKIT PRODUCTION

State of art tools, robotics and statistical process controls are routinely used throughout the product development and manufacturing process. In its quest for quality, **Global Medikit** has successfully implemented a Quality Management System satisfying Quality System Standards ISO 9001 : 2008 ISO 13485 : 2003 and European Council Directive 93/42/EEC (ammended 2007/42/EEC concerning medical devices) as support to our quality assurance activity. We have achieved this certification through an independent audit by DET NORSKE VERITAS (DNV) ; Norway which is a reputed institute for certification.

# EC Declaration of Conformity

In accordance with Directive 98/79/EC

**Legal Manufacturer:** *Zhejiang Orient Gene Biotech Co., Ltd*

**Legal Manufacturer Address:** *3787#, East Yangguang Avenue, Dipu Street,  
Anji 313300, Huzhou, Zhejiang, China*

Declares, that the products  
Product Name and Model(s)

***See attachment***

Classification: *Self-testing*  
Conformity assessment route: *Annex IV (Full Quality Assurance)*

**Notified Body' Name:** TÜV SÜD Product Service GmbH  
**Notified Body Address:** Ridlerstraße 65 80339 München Germany  
**Notified Body ID:** 0123  
**EC Certificate Registration number:** V1 092305 0002 Rev.01  
**Expiry date of EC certificate:** 2025-04-07

We, the Manufacturer, herewith declare with sole responsibility that our product/s mentioned above meet/s the provisions of the Directive 98/79/EC of the European Parliament and of the Council on In-Vitro Diagnostic Medical Devices.

We hereby explicitly appoint

**EC Representative's Name:** QARAD BV

**EC Representative's Address:** Ciplastraat 3, 2440 Geel BELGIUM

to act as our European Authorized Representative as defined in the aforementioned Directive.

I, the undersigned, hereby declare that the medical devices specified above conform with the directive 98/79/EC on in vitro diagnostic medical devices and pertinent essential requirements

Date Signed: May 12, 2022

Name of authorized signatory: Joyce Pang  
Position held in the company: Vice-President

HEADQUAR

Si può parlare ancora di **SOGNI** quando si pensa a un'azienda? Si può credere che le ambizioni di un singolo possano spingere altre persone ad appassionarsi al suo grande progetto e di fare proprio un lavoro con passione e professionalità, per oltre 20 anni e i prossimi a venire? Sì, se si pensa a SYNTESYS e a i "ragazzi" di Ruggero Rinaldo, che dal 2000 creano con intraprendenza e abilità prodotti destinati ad analisi di laboratorio chimico, clinico e articoli sanitari. Il team composto da oltre 30 professionisti è la grande squadra che ha come obiettivo principale quello di far proprie le necessità e le esigenze del cliente per ascoltarlo e soddisfarlo al massimo delle proprie possibilità

Can you still talk about **DREAMS** when you think about a company? Can you believe that the ambitions of a single man can push other people to get enthusiastic about his great project, accomplishing their job with passion and professionalism, for over 20 years and all the years to come? Yes, if you are thinking about SYNTESYS and Ruggero Rinaldo's "boys", who, since 2000 have been developing and producing clinical and chemical laboratory consumables as well as sanitary products, with initiative and skill. Over 30 professionals are part of this great team, whose main goal is listening and understanding the customer's needs, to ensure them complete satisfaction.

# L'ECCELLENZA DEL MADE IN ITALY

## THE EXCELLENCE OF MADE IN ITALY

La **PASSIONE** verso il nostro lavoro ci spinge a chiedere sempre di più dalle nostre competenze e dai prodotti che progettiamo e produciamo ogni giorno: dai materiali ai packaging migliori, dalla progettazione al design, ogni minimo aspetto è fondamentale per fare in modo che Syntesys proponga sempre e solo standard qualitativi di eccellenza.

Our **PASSION** for our job pushes us to always ask for more from our skills and from the products we design and manufacture every day. From top materials to the best packaging, from conception to design, every small detail is critical to enable Syntesys to only ever offer excellent qualitative standards.

# LA NOSTRA STORIA: ESPERIENZA ED INNOVAZIONE

## OUR STORY: EXPERIENCE AND INNOVATION

2000

Ruggero Rinaldo fonda Syntesys.  
Ruggero Rinaldo founds Syntesys.

2001

Introduzione stampi urinali uomo e donna.  
Men's and Women's urinal moulds are created.

2002

Trasferimento a nuova sede e introduzione nuovi stampi padella ammalati e cont. urina 24 h 2500 ml.  
Syntesys moves to a new building.  
Production of moulds for bed pans and 24h 2500 ml urine container.

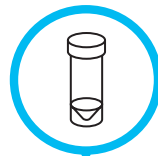

2009

Prima automazione per assemblaggio e nuovo ampliamento magazzini.  
Warehouse and production facility expansion, with first assembly automation.

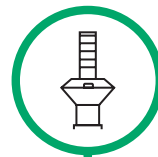

2010

Introduzione prima linea completamente automatica per assemblaggio barattoli per urina 120 ml e introduzione EASY TAINER MAX e SEKUR TAINER.  
First completely automated assembly line for 120 ml containers; first production of EASY TAINER MAX and SEKUR TAINER.

2013

Introduzione cont. urina e feci 30 ml.  
Urine and faeces 30 ml container production begins.

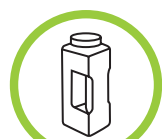

2014

Introduzione seconda linea completamente automatica per assemblaggio barattoli per urina 120 ml.  
Additional completely automated line for 120 ml urine containers assembly is installed.

2017

Introduzione di una nuova linea di assemblaggio completamente automatica ad alta tecnologia per contenitori feci e urina, rifacimento totale dell'ambiente produttivo.  
New high technology highly automated assembly line for faeces and urine containers. Complete renovation of the main production facility.

**2003**

Introduzione nuovo stampo per cont. urina 24 h 2000 ml.  
New mould for 24h 2000 ml urine container.

**2004**

Ulteriore ampliamento magazzini ed introduzione stampo per barattoli urina 120 ml.  
Additional warehouse expansion, 120 ml urine container mould is introduced.

**2005**

Introduzione stampi cont. urina 60 ml microprovetta 1,5 ml e puntali.  
Introduction of mould for 60 ml container, 1,5 ml microtubes and different tips.

**2007**

Introduzione stampi per tazzine per strumentazione.  
Various different moulds for cups and cuvettes are produced.

**2008**

Introduzione stampi per Vacu Re Cap e relativo brevetto industriale nr. PD2008U000087.  
Vacu-Recap is developed and patented – PD2008U000087.

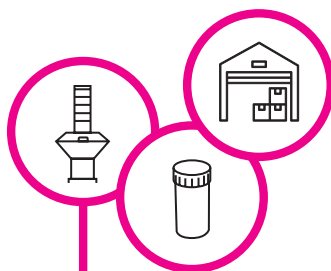

**2019**

Introduzione di una nuova linea di assemblaggio completamente automatica ad alta tecnologia per contenitori urina, ulteriore espansione dei magazzini.  
New high technology highly automated assembly line for urine containers, additional warehouse expansion.

**2020**

Introduzione nuovo stampo alta tecnologia per barattoli urina e tappi con dispositivo e nuova linea completamente automatica per assemblaggio totale di Cont. urina SEKUR TAINER. Inoltre, acquisizione di nuovo spazio per ampliamento magazzini.  
Introduction of high technology mould for urine containers and caps 120 ml and new high technology highly automated assembly line for SEKUR TAINER urine containers. Additional warehouse expansion

**2021**

Introduzione nuova linea alta produttività contenitori urina astucciati. Introduzione nuovo stampo ad alta tecnologia e produttività per Contenitori urina e feci 60 ml con relativi tappi con e senza paletta. Inoltre, acquisizione di nuovo spazio per ampliamento magazzini.  
Introduction new high technology highly automated assembly line for urine container, faeces container in boxe for pharmacy, and high technology mould for faeces and universal 60 ml containers. Additional warehouse expansion

**2022**

Implementazione nuovi stampi ad alta tecnologia e produttività per ampliamento della gamma prodotti. Inoltre, acquisizione di nuovo spazio per ampliamento area logistico/produttiva.  
Implementation of high-tech moulds for expansion of range of internal own products and new space for expansion of logistical/productive area.

**2023**

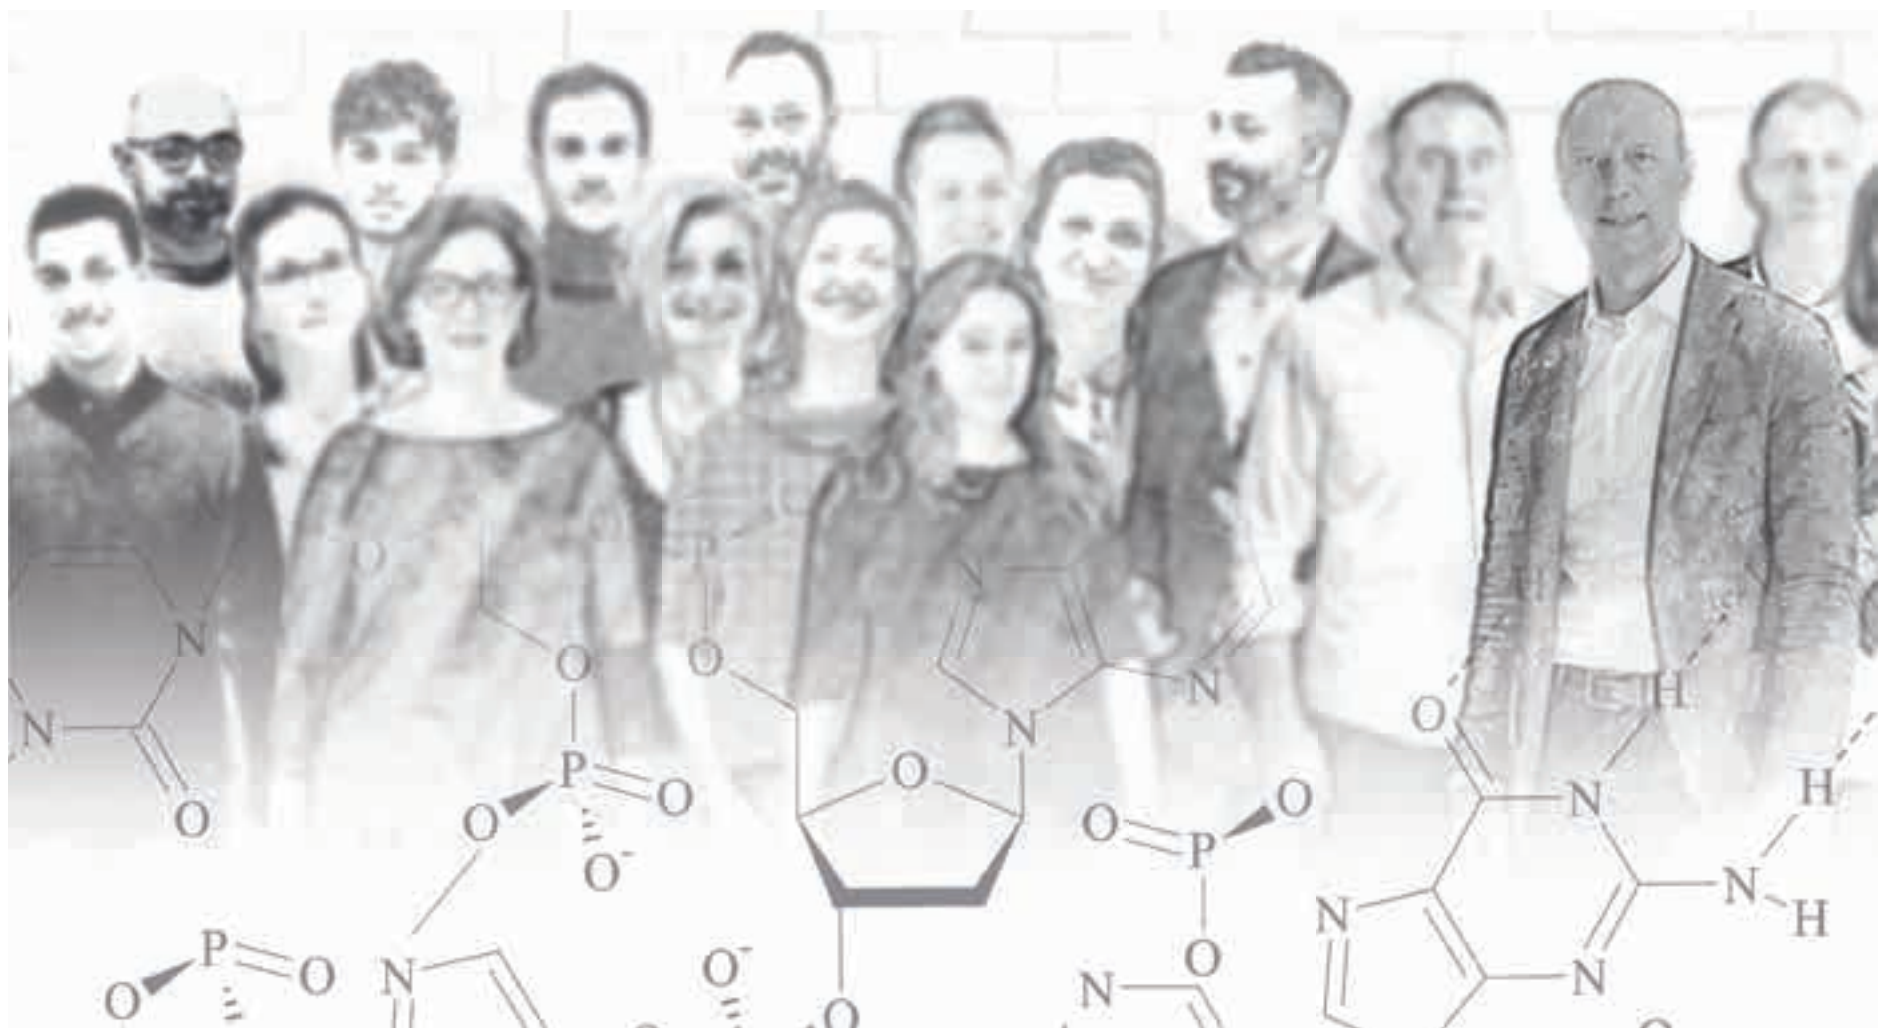

Introduzione nuova linea completamente automatica per assemblaggio totale di cont. urina SEKUR TAINER 120 ml e Cont. urina 120 ml tradizionali. Introduzione nuovi stampi per ampliamento gamma prodotti.  
Introduction new high technology highly automated assembly line for SEKUR TAINER urine container and traditional urine containers 120 ml and new moulds for expansion of range of internal own products

Queste le parole di Ruggero Rinaldo, quando gli viene chiesto che cosa si aspetta dal futuro e dal suo team: "Saremo come sempre: resilienti, infaticabili, arguti ed ironici: questa è la mia famiglia in Syntesys, questa è la mia forza, la vostra forza. Come in tutte le famiglie ci si aiuta, si risolvono difficoltà e problemi, si propongono idee nuove e insieme si cresce: si evolve".

Da una piccola realtà con una grande visione, dal sogno di un singolo uomo e la passione di più di 30 professionisti al suo fianco, Syntesys ora forma una **GRANDE SQUADRA** dedicata all'ideazione e alla produzione di prodotti di eccellenza.

These are Ruggero Rinaldo's words, when asked about what he expects from the future and from his team: "We will be as we have always been: resilient, tireless, clever and ironic: this is my family here at Syntesys, this is my strength, your strength. As in all families, we help each other, we solve difficulties and problems, we propose new ideas and grow together: we evolve".

From a small business with a great vision, from the dream of a single man and the passion of more than 30 professionals at his side, Syntesys is now a **GREAT TEAM** dedicated to designing and manufacturing excellent products.

## QUALITÀ CERTIFICATA

UNI EN ISO 9001 "Sistema di gestione per la qualità"  
UNI CEI EN ISO 13485 "Dispositivi Medici – Sistemi di Gestione per la qualità"

## NORME ARMONIZZATE

Applichiamo le norme armonizzate relative alle direttive e Regolamenti europei:

REGOLAMENTI (UE) 2017/745 - 746  
DIRETTIVE 98/79/CE e 93/42/CE

UNI EN 556-1  
Sterilizzazione dei Dispositivi Medici

UNI CEI EN ISO 14971  
Dispositivi Medici – Applicazione della gestione dei rischi ai Dispositivi Medici

UNI EN ISO 6717  
Dispositivi Medici – Diagnostici in Vitro – Contenitori monouso per la raccolta dei campioni di origine umana, diversi dal sangue

EN 14820  
Contenitori monouso per il prelievo di campioni di sangue venoso umano

UNI CEI EN ISO 18113-1  
Dispositivi Diagnostici in vitro  
Informazioni fornite dal fabbricante (etichettatura).  
Parte 1: Termini, definizione e requisiti generali

UNI CEI EN ISO 15223-1  
Dispositivi Medici – Simboli da utilizzare nelle informazioni che devono essere fornite dal fabbricante.  
Parte 1: Requisiti essenziali

SYNTESYS adotta metodi di sterilizzazione ai propri prodotti a Raggi Beta validati in conformità alle norme ISO 11137 – 1: 2020 e alla ISO 11137 – 2:2015 garantendo un livello di sterilità pari a (SAL)  $10^{-6}$

## QUALITY MANAGEMENT SYSTEM

UNI EN ISO 9001 "Quality management System"  
UNI CEI EN ISO 13485 "Medical Devices – Quality management System"

## HARMONIZED STANDARDS

We apply the harmonized standards in relation to european Directive and Regulation:

REGULATIONS (EU) 2017/745 – 746  
DIRECTIVES 98/79/EEC and 93/42/EEC

UNI EN 556-1  
Sterilization of Medical Devices

UNI CEI EN ISO 14971  
Risk management in Medical Devices

UNI EN ISO 6717  
In Vitro Diagnostic Medical Devices – Single – use containers for the collection of specimens from humans other than blood

EN 14820  
Single – use containers for human venous blood specimens

UNI CEI EN ISO 18113-1  
In Vitro Diagnostic Medical Devices – Information supplied by the manufacturer (labelling) – Part 1: Terms, definitions and general requirements

UNI CEI EN ISO 15223-1  
Medical Devices – Symbols to be used with information to be supplied by the manufacturer – Part 1: General requirements

SYNTESYS adopts validated Beta-Ray sterilisations methods for its products in compliance with ISO 11137 – 1:2020 and ISO 11137 – 2:2015 guaranteeing a sterility level (SAL)  $10^{-6}$

# CERTIFICATIONS

L'esperienza pluridecennale di Syntesys crea forme e prodotti innovativi che mirano al rispetto dell'**AMBIENTE** e alla riduzione dei volumi e dei costi di trasporto per una sempre maggiore sostenibilità e attenzione ambientale. Crediamo fermamente che tutti debbano dare il proprio contributo per migliorare la qualità di vita nel rispetto del nostro pianeta.

Syntesys' decades-long experience creates innovative shapes and products aimed at respecting the **ENVIRONMENT** and reducing volumes and transportation costs for an increasingly greater environmental sustainability and awareness. We firmly believe everybody should contribute to improving the quality of life while respecting our planet.

Procedura operativa per il calcolo della VES  
"SEDI-TEST", utilizzando il metodo Westergren, è un sistema di facile, rapido e sicuro utilizzo per il calcolo della velocità di eritrosedimentazione del sangue.  
La provetta diam. 12x86 mm contiene 0,25ml di Na Citrato al 3,8% ed ha ben chiara la freccia per il livello di riempimento a 1,25 ml per facilitare il lavoro dell'operatore.  
La pipetta in polistirolo trasparente ha una graduazione serigrafata da 0 a 170 mm con uno "stop di riempimento" in fibra a livello 0 per evitare la fuoriuscita del sangue.  
Il riempimento avviene con estrema facilità grazie alla guarnizione esterna che man mano che la pipetta scende all'interno della provetta, riempie automaticamente la stessa.

Operating procedure for the ESR calculation:  
Using the Westergren method, "SEDI TEST" is an easy, quick and safe system for the calculation of the speed of rythrocyte blood.  
The tube, diameter 12x86 mm contains 0.25 ml of Na citrate 3.8% and has a very clear arrow to the filling level to 1.25 ml to facilitate the operator's work.  
The pipette, made in transparent polystyrene has a screen-printed graduation from 0 to 170 mm, with a fiber "fill stop", at level 0 to prevent blood leakage.  
The filling takes place with ease thanks to the outer seal that as the pipette descends within the tube, automatically fills the pipette.

## CAMERE PER CONTA DEL LIQUIDO SEMINALE CHAMBERS FOR SPERM COUNT

| Cod.   | Descrizione / Description                                                                      | Conf. / Case                                                                 |
|--------|------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| 333600 | Vetrini monouso per la lettura del liquido seminale<br>Disposable sperm cell counting chambers | 25 vetrini portaoggetto+50 vetrini coprioggetto<br>25 slides+50 cover slides |

### Preparazione del campione / Sample Preparation

- 1- Dopo aver raccolto il campione, mescolarlo e pipettarne una goccia nel bordo esterno del cerchio azzurro nell'area di campionamento del vetrino portaoggetto.  
Mix the sample sperm and pipette a drop in outer edge of the blue circle of the sampling slide area.
- 2- Posare delicatamente il vetrino portaoggetto munito di griglia di conta in modo che copra la goccia depositata.  
Gently lower the coverslip in order to cover the drop.
- 3- Traslare il vetrino portaoggetto sul portaoggetto in modo da eliminare le bolle d'aria create, quindi procedere con la lettura al microscopio.  
Transfer the coverslip on the stage in order to delete air bubbles, and proceed to read by the microscope.

### Conteggio / Calculation

La griglia è divisa in 100 piccole aree ciascuna di misura 0,1 x 0,1 mm  
The grid is divided in 100 small areas measured 0,1 x 0,1 mm

$$\text{Concentrazione di spermatozi (espresso in milioni/ml)} = \frac{\text{spermatozoi mobili} + \text{spermatozoi non mobili}}{2}$$

mobile sperms + not mobile sperms

$$\% \text{ Mobilità} = \frac{\text{spermatozoi mobili}}{\text{spermatozoi mobili} + \text{spermatozoi non mobili}} \times 100$$

mobile sperms + not mobile sperms

## VETRINI PRECOLORATI PRE-STAINED MICROSCOPE SLIDES

| Cod.   | Descrizione / Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Conf. / Case            |

PRODOTTI PER LE PROCEDURE IN CONFORMITÀ AL PROVVEDIMENTO DEL 18 SETTEMBRE 2008 PROCEDURA PER GLI ACCERTAMENTI SANITARI DI ASSENZA DI TOSSICODIPENDENZA O DI ASSUNZIONE DI SOSTANZE STUPEFACENTI O PSICOTROPE IN LAVORATORI ADDETTI A MANSIONI CHE COMPORTANO PARTICOLARI RISCHI PER LA SICUREZZA, L'INCOLUMITÀ E LA SALUTE DI TERZI APPLICATIVA DEL PROVVEDIMENTO NUMERO 99 / CU 30 OTTOBRE 2007 (GAZZETTA UFFICIALE NUM. 236 DEL 08/10/2008 E SUCCESSIVE MODIFICAZIONI). L'ITER PROCEDURALE SI COMPONE DI DUE MACROFASI IN RELAZIONE ALLA NECESSITÀ DI ISTITUIRE UN PRIMO LIVELLO DI ACCERTAMENTI (TEST TOSSICOLOGICO-ANALITICO O METODI ANALITICI DI SCREENING) DA PARTE DEL MEDICO COMPETENTE ED UN SECONDO LIVELLO DI APPROFONDIMENTO DIAGNOSTICO-ACCERTATIVO A CARICO DELLE STRUTTURE SANITARIE COMPETENTI. CON RIFERIMENTO AGLI ACCERTAMENTI DI PRIMO LIVELLO, TROVERETE NELLE PAGINE SUCCESSIVE I PRODOTTI PIÙ ADATTI ALLE V.S. ESIGENZE.

#### PRINCIPALI FASI OPERATIVE

- PRELEVARE UNA QUANTITÀ MINIMA DI URINA NON INFERIORE A 60 ML (CONTENITORI 331165).
- SUDDIVIDERE IL CAMPIONE IN 3 ALIQUOTE DENOMINATE 'A' 'B' E 'C' DI ALMENO 20 ML CIASCUNA (CONTENITORI 382473).
- SIGILLARE LE 3 ALIQUOTE UTILIZZANDO LE ETICHETTE PRE-NUMERATE, DEBITAMENTE COMPILATE IN OGNI PARTE. IL LAVORATORE E IL MEDICO APPONGONO CONGIUNTAMENTE ANCHE LA PROPRIA FIRMA.
- ESECUZIONE DEL TEST UTILIZZANDO L'ALIQUOTA 'A' SU TEST RAPIDI DI SCREENING APPLICABILI.
- RISULTATO NEGATIVO: L'URINA NON DEVE ESSERE CONSERVATA.
- RISULTATO POSITIVO: INVIO DELLE ALIQUOTE 'B' E 'C' AL LABORATORIO INDIVIDUATO PER TALE FINALITÀ, UTILIZZANDO IL SACCHETTO ANTIMANOMISSIONE DEBA SAFE E GLI APPOSITI CONTENITORI TERMICI PER LA SPEDIZIONE DI CAMPIONI BIOLOGICI (PRODOTTI UN3373 COD. 300015 A PAG 128 DEL CATALOGO)

Il prelievo di cellule con il "Cervex-Brush®" fornisce un campione chiaro e preciso che conduce alla diagnosi precoce del cancro cervicale. L'affidabilità di strisci ottenuti dal Cervex-Brush riduce la necessità di ripetere il test del 30%. Il Cervex-Brush (pennello per esame della cervice) è fatto di polietilene e ha una lunghezza complessiva di 20 centimetri. La parte superiore utilizza un pennello morbido flessibile per ottenere campioni di cellule composto da 57 setole di plastica semi-circolari di varie lunghezze. La forma è tale che il bordo superiore del pennello segue i contorni della cervice. Le setole centrali più lunghe raggiungono in profondità il canale endocervicale. Le setole brevi toccano sia la zona ectocervicale che la zona di trasformazione allo stesso tempo. Il materiale cellulare aderisce al lato piatto della setole e di conseguenza può essere spalmato in una perfetta 'traccia' sul vetrino. La morbidezza del materiale garantisce che non si verifichi lesioni interne eliminando perdite di sangue e strisci insoddisfacenti come risultato.

The collection of cells with "Cervex-Brush®" provides a clear and standard sample to accurate early diagnosis of cervical cancer. The reliability of smears obtained by Cervex-Brush reduces the need to repeat the test by 30%. The Cervex-Brush is made in PE has a total length of 20 cm. The upper part uses a soft flexible brush to obtain cell samples composed by 57 semi-circular plastic bristles of various lengths. The shape is such that upper edge of the brush follows the contours of the cervix. The central bristles longest reach in depth of the endocervical canal. The shorter bristles touch both the ectocervical area that the processing area at the same time. The cellular material adheres to the flat side of the bristles so it can be smear in a perfect 'track' on the slide. The softness of the material ensures that there is no internal damages causing loss of blood and unsatisfactory smears as result.

MATERIE PLASTICHE IMPORTANTI PER IL LAVORO IN LABORATORIO  
IMPORTANT PLASTIC MATERIALS FOR LABORATORY ACTIVITIES

ABS: ACRILONITRILE-BUTADIENE - STIRENE  
ABS: ACRYLONITRILE-BUTADIENE - STYRENE  
LA RESISTENZA CHIMICA E LA STABILITÀ DELLA TEMPERATURA SONO DECISAMENTE MIGLIORI RISPETTO AL PS. LE CARATTERISTICHE DIVERSE DEI VARI TIPI DI ABS SONO DETERMINATE DA PROCEDIMENTI PRODUTTIVI DIFFERENTI.  
THE CHEMICAL RESISTANCE AND THE TEMPERATURE STABILITY ARE MUCH BETTER THAN PS. THE DIFFERENT CHARACTERISTICS OF THE VARIOUS TYPES OF ABS ARE DETERMINED BY DIFFERENT PROCEDURES FOR PRODUCTION

ECTFE: POLICLOROTRIFLUOROETILENE  
ECTFE: POLYCHLOROTRIFLUOROETHYLENE  
ETFE: ETILENE - TETRAFLUOROETILENE  
ETFE: ETHYLENE - TETRAFLUOROETHYLENE  
ECCELLENTE RESISTENZA CHIMICA. STABILITÀ DELLA TEMPERATURA PIÙ RIDOTTA RISPETTO AL PTFE.  
EXCELLENT CHEMICAL RESISTANCE. LOWER TEMPERATURE STABILITY THAN PTFE.  
FEP: TETRAFLUOROETILENE - ESAFLUOROPROPILENE  
FEP: TETRAFLUOROETHYLENE - HEXAFLUOROPROPYLENE  
PFA: TEFLON (PERFLUORO-ALCOSSIALCANO)  
PFA: TEFLON (PERFLUOROALKOXY)  
LA SUPERFICIE DI QUESTO MATERIALE TRANSLUCIDO NON È ADESIVA. LE CARATTERISTICHE MECCANICHE E CHIMICHE SONO PARAGONABILI A QUELLE DEL PTFE.  
UTILIZZABILE DA -100 °C A +200 °C.  
THE SURFACE OF THIS TRANSLUCENT MATERIAL IS NOT ADHESIVE. THE MECHANICAL AND CHEMICAL CHARACTERISTICS ARE SIMILAR TO PTFE ONES. USABLE FROM -100 °C TO +200 °C.

PA: POLIAMMIDE - PA: POLYAMIDE  
DUREZZA E RESISTENZA ELEVATE. BUONA RESISTENZA AI SOLVENTI ORGANICI.  
ACIDI E PRODOTTI CHIMICI OSSIDANTI AGGREDISCONO IL PA.  
HIGH HARDNESS AND RESISTANCE. GOOD RESISTANCE TO ORGANIC SOLVENTS.  
ACIDS AND OXIDIZING CHEMICAL AGENTS ETCH PA.

PC: POLICARBONATO - PC: POLY - CARBONATE  
TRASPARENTE E STABILE DA -130 °C A +130 °C. I POLICARBONATI PERDONO LE PROPRIE CARATTERISTICHE DI STABILITÀ QUANDO VENGONO STERILIZZATI A VAPORE O TRATTATI CON DETERSIVI ALCALINI.  
TRANSPARENT AND STABLE FROM -130 °C TO +130 °C. POLYCARBONATES LOSE THEIR CHARACTERISTICS OF STABILITY WHEN THEY ARE STERILIZED BY STEAM OR TREATED WITH ALKALINE DETERGENTS.

PE-HD: POLIETILENE AD ALTA INTENSITÀ  
PE-HD: HIGH INTENSITY POLYETHYLENE  
POSSIEDE CARATTERISTICHE DI STABILITÀ E RESISTENZA AI PRODOTTI CHIMICI MIGLIORI RISPETTO  
AL PE-LD. UTILIZZABILE FINO A 105 °C.  
IT HAS BETTER STABILITY AND RESISTANCE TO CHEMICAL AGENTS THAN PE-LD. USABLE UP TO 105°C.

PE-LD: POLIETILENE A BASSA INTENSITÀ  
PE-LD: LOW INTENSITY POLYETHYLENE  
IL PE-LD È MOLTO FLESSIBILE ED HA UNA BUONA RESISTENZA AI PRODOTTI CHIMICI. RISPETTO AL PE-HD, HA UNA RESISTENZA INFERIORE AI SOLVENTI ORGANICI ED È UTILIZZABILE  
SOLAMENTE FINO A 80 °C.  
PE-LD IS VERY FLEXIBLE AND HAS GOOD RESISTANCE TO CHEMICAL PRODUCTS.  
IT HAS LOWER RESISTANCE TO CHEMICAL AGENTS THAN PE-HD. USABLE ONLY UP TO 80 °C.

POM: POLIOSSIMETILENE - POM: POLYOXIMETHYLENE

ELEVATA STABILITÀ SOTTO SOLLECITAZIONI MECCANICHE. OTTIMA RESISTENZA AI PRODOTTI CHIMICI.  
BUONA SCORREVOLEZZA E RESISTENZA ALL'ABRASIONE.  
IN MOLTI CASI PUÒ SOSTITUIRE IL METALLO. UTILIZZABILE FINO A 130 °C.  
HIGH STABILITY UNDER MECHANICAL STRESS. EXCELLENT RESISTANCE TO CHEMICAL AGENTS.  
GOOD FLOWABILITY AND ABRASIVE RESISTANCE.  
IT CAN OFTEN SUBSTITUTE METAL. USABLE UP TO 130 °C.  
PP: POLIPROPILENE - PP: POLY-PROPYLENE

PIÙ VOLTE STERILIZZABILE A VAPORE A 121 °C. LA SUA BUONA STABILITÀ CHIMICA E MECCANICA  
È SIMILE A QUELLA DEL PE, TUTTAVIA QUESTO MATERIALE VIENE AGGREDITO PIÙ FACILMENTE DA PRODOTTI CHIMICI FORTEMENTE OSSIDANTI.  
IT CAN BE STERILIZED BY STEAM AT 121 °C A FEW TIMES. IT HAS A GOOD CHEMICAL AND MECHANICAL STABILITY SIMILAR TO PE, BUT THIS MATERIAL IS ETCHED BY HIGHLY OXIDIZING CHEMICAL AGENTS MORE EASILY.

PS: POLISTIROLO - PS: POLYSTYROL  
STRUTTURA AMORFA, TRASPARENTE SIMILVETRO, DURO, FRAGILE E DI FORMA STABILE.  
RESISTENZA BUONA ALLE SOLUZIONI ACQUOSE, SCARSA AI SOLVENTI.  
IL PS TENDE A FORMARE CREPE E HA UNA RIDOTTA RESISTENZA ALLE TEMPERATURE.  
AMORPHOUS STRUCTURE, TRANSPARENT IMITATION GLASS, HARD, FRAGILE WITH STABLE SHAPE.  
GOOD RESISTANCE TO WATER SOLUTIONS, POOR RESISTANCE TO SOLVENTS.  
PS MAY CAUSE CRACKS AND HAS A POOR RESISTANCE TO TEMPERATURES.

PTFE: POLITETRAFLUOROETILENE - PTFE: POLYTETRAFLUORINETHYLENE  
STRUTTURA PARZIALMENTE CRISTALLINA. RESISTENTE A PRESSOCHÉ TUTTI I PRODOTTI CHIMI- CI.  
TEMPERATURA DI UTILIZZO DA -200 °C A +300 °C.  
LA SUPERFICIE NON È ADESIVA.  
LE CARATTERISTICHE DI SCORREVOLEZZA E RESISTENZA ELETTRICA SONO MIGLIORI RISPETTO A QUELLE DI FEP E PFA.  
PARTIALLY CRYSTALLINE STRUCTURE. RESISTANT TO MOST CHEMICAL AGENTS.  
USABLE FROM -200 °C TO +300 °C. THE SURFACE IS NOT ADHESIVE.  
BETTER CHARACTERISTICS OF FLOWABILITY AND ELECTRICAL RESISTANCE THAN FEP AND PFA.

PVC: POLIVINILCLORURO - PVC: POLYVINYLCHLORURE  
BUONA RESISTENZA AI PRODOTTI CHIMICI, IN PARTICOLARE AGLI OLII.  
GOOD RESISTANCE TO CHEMICAL PRODUCTS, IN PARTICULAR TO OILS.

SAN: STIRENE-ACRILONITRILE - SAN: STYRENE-ACRYLONITRILE  
TRASPARENTE SIMILVETRO. LIMITATA TENDENZA ALLA FORMAZIONE DI CREPE.  
RESISTENZA CHIMICA LEGGERMENTE MAGGIORE A QUELLA DEL PS.  
TRANSPARENT IMITATION GLASS. IT MIGHT CAUSE CRACKS.

DISPOSITIVI MEDICI – SIMBOLI DA UTILIZZARE NELLE INFORMAZIONI CHE DEVONO ESSERE FORNITE DAL FABBRICANTE UNI CEI EN ISO 15223-1 – PARTE 1: REQUISITI GENERALI
