

FDR606

FORTUNE TIRES

The Fortune FDR606 successfully obtained TÜV Mark certification.

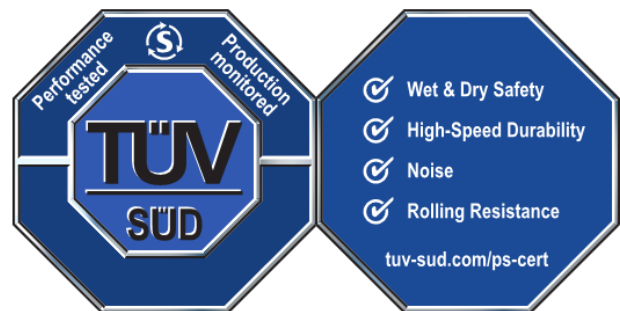

After undergoing extensive and demanding tests, the FDR606 has received the prestigious TÜV SÜD Test Mark. This signifies that the FDR606 is in full compliance with the high requirements of TÜV SÜD for four specifically tested product characteristics:

Robustness
Wet braking
Rolling resistance
Pass by noise

The highly respected German TÜV Test Mark stands for safety, reliability and neutrality and is a well-known quality brand, accompanied by the strong claim:

Add value. Inspire trust.

Only companies that have subjected their products and production facilities to voluntary testing on the basis of the TÜV testing and certification regulations receive a TÜV SÜD Product Service GmbH Test Mark. The inspection of the production facilities certifies that the production quality in the manufacturing plant is consistently high.

Designed to perform
in severe snow and cold weather
conditions.

FORTUNE
TIRES

REGIONAL / LONG HAUL HYBRID

 Drive

The FDR606 is the new On-Road drive axle tyre for regional application delivering top-class mileage, enhanced durability and retreadability and very good all-season capability throughout the full tyre life. With its exceptional mileage potential, the FDR606 is also an excellent choice for long haul use on drive axles.

Performance Ratings:

MILEAGE POTENTIAL

ALL SEASON TRACTION

DAMAGE RESISTANCE

The FDR606 impresses with good performance in all-season use and offers excellent traction on dry, wet and snowy roads thanks to its "Cap & Base" tread construction, while at the same time providing low fuel consumption due to its optimised rolling resistance.
